Religion And Ethics For A New Age Evolutionist Approach:

Religion & Ethics for a New Age Emmanuel K. Twesigye, 2001 In *Religion Ethics for a New Age* the problems of traditional Christian dogmas of evil death the fall violence sexuality patriarchal theological language and symbols are discussed within a global evolutionary context as well as that of the existential reality of cultural moral and religious pluralism Agape as the central commandment of Christ is adopted as the new universal grounding for true global Christian ethics sound religion humane moral and cultural values God's supernatural activities of creation and redemption are presented as coextensive with evolutionary history and life in the world as God's unfolding kingdom **Evolutionary History** Edmund Russell, 2011-04-11 We tend to see history and evolution springing from separate roots one grounded in the human world and the other in the natural world Human beings have however become probably the most powerful species shaping evolution today and human caused evolution in other species has probably been the most important force shaping human history This book introduces readers to evolutionary history a new field that unites history and biology to create a fuller understanding of the past than either can produce on its own Evolutionary history can stimulate surprising new hypotheses for any field of history and evolutionary biology How many art historians would have guessed that sculpture encouraged the evolution of tuskless elephants How many biologists would have predicted that human poverty would accelerate animal evolution How many military historians would have suspected that plant evolution would convert a counter insurgency strategy into a rebel subsidy With examples from around the globe this book will help readers see the broadest patterns of history and the details of their own life in a new light **AFER.**, 2003 **Bioethical and Evolutionary Approaches to Medicine and the Law** W. Newport, 1998 John Newport delivers a comprehensive study of the impact of New Age beliefs on contemporary culture and on Christianity itself while also offering an effective biblical antidote to today's worldview crisis After first surveying the historical development of the New Age worldview from ancient times through important tendencies in nineteenth century America to recent Far Eastern influences Newport explores in depth eleven key areas of the New Age worldview and contrasts each area of belief with the traditional biblical worldview *American Book Publishing Record*, 2003 **Kevin Macdonald's Metaphysical Failure: a Philosophical, Historical, and Moral Critique of Evolutionary**

Psychology, Sociobiology, and Identity Politics Jonas E. Alexis, 2022-04-25 In Kevin MacDonald's *Metaphysical Failure* Jonas E. Alexis offers a thoroughly researched nuanced and lucid analysis of Kevin MacDonald's thought in particular MacDonald's belief in biological and philosophical Darwinism. It is an important book that fills a critical gap in the literature on the history of revolutionary movements and Darwinism both in the West and in Asia. It is also a study that adds many significant strands to the densely interwoven history of ideas such as Malthusianism and Eugenics. Alexis's book engages debates in the history of ideas going back to Madison Grant and beyond and the history of Darwinism. It challenges many of the life-long prevailing assumptions about identity politics and produces a powerful critique of how scientific theories have been misused to uphold misguided and faulty categorizations. Powerfully reasoned and backed with a startling array of documented studies, Kevin MacDonald's *Metaphysical Failure* presents an in-depth look at key beliefs behind many mistaken and consequently destructive actions taken by numerous writers and thinkers particularly Darwin's ardent enthusiasts and devoted disciples. The book presents eye-opening insights into the historical development of Darwin's ideological project and how that project ended up crippling Darwin's intellectual children from Richard Dawkins, Francis Crick, James Watson, Daniel Dennett, Ernst Mayr, and E. O. Wilson to Kevin MacDonald, Richard Spencer, David Duke, and Jared Taylor. **Encyclopedia of Religion and Nature** Bron Taylor, 2008-06-10

The Disunity of American Culture John C. Caiazza, 2013-06-30 The Disunity of American Culture describes culture now when different forces are influencing it than in the past altering it to near incomprehensibility Identity issues have an effect on culture and politics more influential is the question of what support the state is obligated to provide the individual John C Caiazza seeks to explain how this situation came to be He begins with an explanation of the origins of Protestantism in America Caiazza describes how the American religion has declined and the recent responses the decline has provoked Caiazza follows with an analysis of science as it presently exists in American culture The work of three scientists prominent in their respective fields Steven Weinberg in physics E O Wilson in biology and Stanley Milgram in psychology are examined with respect to how their work has influenced culture The author examines the failure of America's school of philosophy pragmatism to explain the relationship between religion science and general culture even though its founders Charles S Peirce and William James made serious efforts to do so He concludes by making the case that there is a contradiction between scientific reason and the claim of state power Caiazza argues that cultural disharmony will guarantee that the secular state never achieves the dominance over culture and political life it desires

Psychedelic Humanities Erika Dyck, Tehseen Noorani, Nicolas Langlitz, Alex Dymock, Anne Katrin Schlag, Oliver Davis, 2024-06-19 Psychedelics are part of a resurgence of interest in consciousness studies especially as altered states of consciousness are being re-examined in the context of psychedelic assisted therapies To date discussions about psychedelics in modern medicine have been dominated by studies in biomedicine However given that cultural factors play a significant role in the subjective effects of psychedelics psychedelics can be considered a uniquely powerful point of convergence

between the cultural and biomedical Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences
