*Religion and Creation* Keith Ward, 1996-06-20 This book is the second part of a major project of comparative theology begun with *Religion and Revelation* Clarendon Press 1994 which looks at major concepts of faith in all four of the main scriptural religions of the world In *Religion and Creation* the author explores the idea of a creator God in the work of twentieth century writers from Judaism Islam Hinduism and Christianity He develops a positive concept of God which stresses God's dynamic and responsive relation to the temporal structure of the universe and the importance of that structure to the self expression of the divine being Professor Ward goes on to present a Trinitarian doctrine of creation drawing inspiration from a wider set of theistic traditions and recent discussions in physics in the realm of cosmology

**Evolution and Religious Creation Myths : How Scientists Respond** Paul F. Lurquin School of Molecular Biosciences Washington State University, Linda Stone Department of Anthropology Washington State University, 2007-06-08 Polls show that 45% of the American public believes that humans were created about 10 000 years ago and that evolution is non-existent Another 25% believes that changes in the natural world are directed by a supernatural being with a particular goal in mind This thinking clashes frontally with scientific findings obtained in the past 150 years A large portion of the general public espouses the views of creationists and their descendants and ignores or is unaware of scientific advances Critical thinking about the natural world within a scientific framework is lacking in the USA and many parts of the world This manuscript provides a multidisciplinary explanation and defense for the science of evolution not just Darwinism as it is being challenged by arguments for intelligent design and other creation myths It draws in the life physical and social sciences and recent studies of human evolution that rely much on the idea of change over time which is evolution writ large It puts the evolution ID issue into international perspective by including opinions held in world religions other than Christianity It is clearly written and also can easily be used as a guide for those with some science background The authors make a convincing case that other books do not achieve this as much as they do in this work The book is written for a whole spectrum of educated people including teachers and teachers in training who are interested in the broad issues of the origins of the universe life and humans and who may not quite grasp the potential magnitude of the negative influence on all of science education of people embracing creationist and ID thinking This includes high school teachers and people on boards of education and in municipal governments anyone involved in education It could be used also in college courses such as contemporary social issues and Science and Society sometimes team taught by sociologists and scientists The authors show that when they are teleological dogmatic or politically inspired religious and creation myths threaten scientific efforts The book does not require any extensive knowledge of science The principle of change over time pervades all of science from cosmology to the search for the origin for life to human physical and cultural evolution The book educates readers on scientific matters that overwhelmingly support the idea of evolution not only in the living world but also in physical and social science It explains

too how evolution physical and biological is a random unguided process whose roots can be already found in quantum physics     Destiny: Volume Two: God, Creation and Religion Edward Nagell,2006-08 Need for religion seems independent of culture or training and many exist throughout the world This book describes religions that had or continue to have some impact on the USA     **From Creation to Eternity** Raymond J. Jerome,2010-01-07 Sometimes I have a difficult time accepting my good fortune to be living at this particular time nothing has made me feel more that way than reading Dr Jerome s fascinating realistic and informative book It is a treasure house of wonderful information useful knowledge and excellent writing This book essentially takes the basic religious truths that have been handed down to us over hundreds of years from our major world religions and shows how current findings in subatomic particle physics quantum theory and laser technology gives us a way of seeing how they may well be agreeing on the same basic truths that construct and maintain our matter and spiritual existence Larry Dossey M D President of Isthmus Institute and author of Space Time and Medicine and Beyond Illness has written an excellent introduction and endorses Dr Jerome s work I believe that any creditable scientist would do the same and certainly every New Thought student should be enthusiastic about the work This book is not another scientific text It is that of course but is so much more and such fun reading Take a look at this book which is entertaining informative and above all else a book which has great application to daily living Jack H Holland PhD D D Theologian Reviewer of scientific and theological literature for The New Thought Quarterly and Director of The Institute for Human Growth and Awareness Dr Jerome s book just might be one of the most important books of this era It explains the holographic nature of God s consciousness in terms that are understandable Tommy Sellers communications expert in computer science and laser research Dr Jerome personifies a new breed of human now emerging He is a scientist who realizes that his science represents only part of the path to understand his existence and his reality It is an essential part but incomplete in itself To be whole to be balanced in life he knows it is necessary to discover the path s other essential part As the parts of the path become visible before him Dr Jerome integrates them for us As he says in his preface If science is right and if religion is also right then they must allude to the same basic truths The quest to uncover this sameness is the goal of this book This is a sensitive and beautiful book written by an admirable man It deserves to be read then pondered then reread and finally referred to often John C Carls PhD in particle physics and author of What It Means To Be Human     **The Nature of Creation** Mark Harris,2014-09-19 It is generally assumed that science and religion are at war Many now claim that science has made religious belief redundant others have turned to a literalist interpretation of biblical creation to reject or revise science others try to resolve Darwin with Genesis The Nature of Creation addresses this complex debate by engaging with both modern science and biblical scholarship together Creation is central to Christian theology and the Bible and has become the chosen battleground for scientists atheists and creationists alike The Nature of Creation presents a sustained historical investigation of what the creation texts of the Bible have to say and how this relates to modern scientific

ideas of beginnings The book aims to demonstrate what science and religion can share and how they differ and ought to differ

**Genesis, Creation, and Creationism** Lloyd R. Bailey, 2006-05-28 Genesis Creation and Creationism is an important new study that explores all sides of the creationism debate and gives a sound and spiritually rich way of understanding the creation stories of Genesis Creationism is an ardently proclaimed and widely held point of view involving both scientific and biblical data While much has been written about scientific creationism much less is available about its counterpart biblical creationism Genesis Creation and Creationism provides this much needed evaluation of creationism by uniquely allowing the Bible to speak for itself Author Lloyd R Bailey who is a biblical scholar and also holds a degree in physics begins his investigation by inviting all sides of the creationism debate to set aside their prejudices for or against the theory of evolution and read the biblical story of creation in Genesis 1 1 2 4a He then examines the creationist phenomenon and compares this data with the agenda of the young earth creationist All the while Bailey enhances the Bible s ability to speak for itself by withholding judgment on many of the assumptions of historical critical biblical scholarship for example the date and authorship of Genesis The result is a scientifically straightforward study of Genesis that explicitly answers fundamentalist questions on creationism Genesis Creation and Creationism is a thought provoking study on the relationship of science and religion that speaks to all Christian denominations It provides excellent resource material for high school science classes religion classes and for seminarians engaged in biblical studies

**God's Existence: Religious and Scientific Reflection** Ravi K. Puri Ph.D., 2022-12-06 When war crimes and calamities occur the belief in God is shaken The idea comes to mind Does God Exist If there is a God then why is he not preventing deadly events comprising genocides assassinations crimes and atrocities On the contrary He does not interfere That means there is no God Are people worshiping at various religious places Churches Mosques and Temples for various reasons wasting their time If God does not exist all these religious places should be closed and turned into cinemas entertainment clubs and sports stadiums God is not any object that His existence can be proved It can be felt by seeing His splendid creation The act of creation reveals the creator To know His existence is to know his magnificent creation and redemption He is the transcendent designer and has not revealed Himself so far to anyone No God His prophet deputy or beloved can interfere with any life on any planet Each soul has its journey and is responsible for its actions God is apathetic to the creation of the

*Creation: A Guide for the Perplexed* Simon Oliver, 2017-06-29 This addition to our popular Guides for the Perplexed series tackles a subject that is enjoying renewed debate Christianity along with Judaism and Islam claims that the universe is not a brute fact It is created But what do we mean by creation Do we mean that the universe is designed Is it the product of an evolutionary process How are creatures related to God and does God act within creation Simon Oliver begins with the background to the Christian theology of creation in Greek philosophy and the Old Testament This provides a route into understanding the claim that we are part of a created order that is also the theatre of God's providential action He examines different understandings of creation including creation out of nothing and the analogy of being with close reference to the work of patristic and medieval theologians such as Augustine and Thomas Aquinas This leads to an historical overview of the relationship between theological philosophical and scientific approaches to creation in the modern period Some of the ethical issues concerning humanity's place within and treatment of creation and our environment are also examined A distinctive yet traditional theology of creation is proposed focused on the concepts of gift and participation as ways of understanding more fully the meaning and implications of the claim that the universe is created
