Religion And Education:

The Routledge International Handbook of Religious Education Derek Davis, Elena Mikhailovna Miroshnikova, 2013

How and what to teach about religion is controversial in every country. The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions. It discusses how three models in particular seem to dominate the landscape. Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion, often to the detriment of other religions and their adherents. Countries with traditions that differentiate church and state tend to adopt a separation model, thus either offering instruction in a wide range of religions or in some cases teaching very little about religion, intentionally leaving it to religious institutions and the home setting to provide religious instruction. Still, other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught. Inevitably, there are countries which do not fit any of these dominant models, and the range of methods touched upon in this book will surprise even the most enlightened reader. Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country. These chapters discuss legal parameters in terms of subjective versus objective instruction in religion, constitutional, statutory, social, and political contexts to religious approaches. Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning. Regional assessments which provide a welcome overview and comparison. This comprehensive and authoritative volume will appeal to educators, scholars, religious leaders, politicians, and others interested in how religion and education interface around the world.

Faith Ed Linda K. Wertheimer, 2015-08-18. An intimate cross-country look at the new debate over religion in the public schools. A suburban Boston school unwittingly started a firestorm of controversy over a sixth-grade field trip. The class was visiting a mosque to learn about world religions when a handful of boys, unnoticed by their teachers, joined the line of worshippers and acted out the motions of the Muslim call to prayer. A video of the prayer went viral with the title "Wellesley Massachusetts Public School Students Learn to Pray to Allah." Charges flew that the school exposed the children to Muslims who intended to convert American schoolchildren. Wellesley school officials defended the course but also acknowledged the delicate dance teachers must perform when dealing with religion in the classroom. Courts long ago banned public school teachers from preaching of any kind. But the question remains: How much should schools teach about the world's religions? Answering that question in recent decades has pitted schools against their communities. Veteran education journalist Linda K. Wertheimer spent months with that class and traveled to other communities around the nation, listening to voices on all sides of the controversy, including those of clergy, teachers, children, and parents who are Muslim, Jewish, Christian, Sikh, or atheist. In Lumberton, Texas, nearly a hundred people filled a school board meeting to protest a teacher's dress-up exercise that allowed

freshman girls to try on a burka as part of a lesson on Islam In Wichita Kansas a Messianic Jewish family s opposition to a bulletin board display about Islam in an elementary school led to such upheaval that the school had to hire extra security Across the country parents have requested that their children be excused from lessons on Hinduism and Judaism out of fear they will shy away from their own faiths But in Modesto a city in the heart of California s Bible Belt teachers have avoided problems since 2000 when the school system began requiring all high school freshmen to take a world religions course Students receive comprehensive lessons on the three major world religions as well as on Sikhism Hinduism Buddhism and often Shintoism Taoism and Confucianism One Pentecostal Christian girl terrified by idols including a six inch gold Buddha learned to be comfortable with other students beliefs Wertheimer s fascinating investigation which includes a return to her rural Ohio school which once ran weekly Christian Bible classes reveals a public education system struggling to find the right path forward and offers a promising roadmap for raising a new generation of religiously literate Americans

Religion and Education Gert Biesta, Patricia Hannam, 2020-11-30 As diversity increases across the world there is renewed interest in the place of religion in the public sphere Is religion a private matter or of concern to everyone even if they are not religious What should religious education look like in the public sphere Is religious education something for everyone in all schools What is educational about religious education What is the justification for religious education How do we make sense of religion itself bearing in mind the wide variety of views and traditions The chapters in Religion and Education The Forgotten Dimensions of Religious Education deal with these questions focusing particularly on the two constituting elements of religious education religion and education Rather than discussing curriculum pedagogy and assessment the authors delve into more fundamental questions

and concerns Through this they provide a range of different responses to the question of whether religion and education may have become the forgotten dimensions of contemporary religious education Covering different educational views and traditions and exploring a range of different religious ideas traditions and practices whilst connecting this all to the challenge of religious education in the public sphere this book seeks to make a contribution to the ongoing conversation about the importance of religious education for all

Religion, Education, Dialogue and Conflict Robert Jackson, 2014-01-02 Religion Education Dialogue and Conflict analyses the European Commission funded REDCo project which addressed the question of how religions might contribute to dialogue or conflict in Europe Researchers in education from eight countries the UK Estonia France Germany the Netherlands the Russian Federation Norway and Spain studied how young Europeans of different religious cultural and political backgrounds could engage in dialogue in the context of the school Empirical studies conducted with 14 16 year old students included them offering their own perspectives and analyses of teaching and learning in both dialogue and conflict situations Although there were some different national patterns and trends most students wished for peaceful coexistence across differences and believed this to be possible The majority agreed that peaceful coexistence depended on knowledge about each other s religions and worldviews sharing common interests and doing things together The project found that students who learn about religious diversity in school are more willing to discuss religions and beliefs with students of other backgrounds than those who do not The international range of expert contributors to this book evaluate the results of the REDCo project providing examples of its qualitative and quantitative studies and reflecting on the methods and theory used in the project as a whole This book was originally published as a special issue of the British Journal of Religious Education
