Religion and Nature Charles Birch, 1984 Encyclopedia of Religion and Nature Bron Taylor, Jeffrey Kaplan, 2005-01-01
No Marketing Blurbs **Law, Religion and the Environment in Africa** M. Christian Green, Muhammed Haron, 2020-06-03
This volume explores themes of ecotheology ecofeminism environmental pollution and degradation climate change human and environmental rights sustainable development human animal relations through totem and taboo sacred sites and spaces and other environmental topics in ways that add immeasurably to the study of African environmentalisms and the interaction of law and religion In terms of religion the capability of humans not only to sin and destroy the earth but also to repair and redeem it is very much in evidence across Christianity Islam and Africa s many indigenous religious and cultural traditions In terms of law the need for effective policies and for states and governments to work with indigenous groups and communities towards environmental solutions is also apparent **The Blackwell Companion to Science and Christianity** J. B. Stump, Alan G. Padgett, 2012-03-12 A cutting edge survey of contemporary thought at the intersection of science and Christianity Provides a cutting edge survey of the central ideas at play at the intersection of science and Christianity through 54 original articles by world leading scholars and rising stars in the discipline Focuses on Christianity s interaction with Science to offer a fine grained analysis of issues such as multiverse theories in cosmology convergence in evolution Intelligent Design natural theology human consciousness artificial intelligence free will miracles and the Trinity amongst many others Addresses major historical developments in the relationship between science and Christianity including Christian patristics the scientific revolution the reception of Darwin and twentieth century fundamentalism Divided into 9 Parts Historical Episodes Methodology Natural Theology Cosmology Evolution The Human Sciences Christian Bioethics Metaphysical Implications The Mind Theology and Significant Figures of the 20th Century Includes diverse perspectives and broadens the conversation from the Anglocentric tradition **Multicultural and Religious Perspectives on Protecting the Environment, the Biosphere, and Biodiversity** Joseph Tham, John Lunstroth, Sameer Advani, 2025-09-30 This thought provoking volume unites bioethics experts from seven major world religions Buddhism Christianity Confucianism Daoism Hinduism Islam and Judaism alongside secular thinkers to explore environmental protection through the lens of the UNESCO Declaration on Bioethics and Human Rights It foregrounds the power of diverse perspectives in addressing one of humanity s most pressing challenges the ecological crisis The contributions provide rich and distinct religious and cultural viewpoints as they confront the anthropological ethical and social dimensions of this crisis Showcasing dialogue where traditions and philosophies collide they offer unique insights into global bioethics and human rights that should inspire new ways of thinking and foster meaningful collaboration in the fight for our planet s future The book is valuable reading for researchers scholars and students in bioethics environmental ethics religious studies and beyond *Early Ecotheology and Joseph Sittler* Panu Pihkala, 2017 When did Christians begin to address environmental questions What can be learned from these

pioneering thinkers This study reveals that between 1910 and 1954 many theologians called for responsibility towards nature The focal point is the work of Joseph Sittler 1904 1987 an American Lutheran and ecumenical theologian The role of these early ecotheologians is discussed in relation to environmental history and education The findings show that ecotheology was not as strongly separated from other environmentalism as it was after the 1960s Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 12 Subject Religious Studies Environmental Studies Ecotheology Joseph Sittler **Religion and Nature - with Charles Birch and Others** Kevin J. Sharpe, John M. Ker, 1984 *Consenting to God and Nature* Byron C. Bangert, 2006-03-08 This book an exploration in theological ethics is motivated by two central questions First How can we think and speak with integrity about God as One who is active in human affairs and the world How can God make a difference in our world and in our lives Second and no less important What is the character of God s activity in the world and how are we to relate and respond to this activity How does God make a difference in our world and our lives and what are some of the implications for our own actions As the book s title indicates Bangert claims that a proper engagement in theological ethics requires both consenting to God and consenting to nature This means both consenting to the reality that is God the One with whom we ultimately have to do and the acceptance of the natural or physical world as hugely determinative of the limits and possibilities of human life and all existence He argues that this calls for a theocentric naturalistic theological ethics Bangert shows how the work of three major contemporary Protestant thinkers James M Gustafson Sallie McFague and David Ray Griffin may be fruitfully appropriated for the articulation of just such an ethics one that is responsive to the Christian tradition while also sharing the modern commitment s appeal to human experience and reason Each of these three thinkers eschews a priori appeal to the authority of religious tradition as each takes seriously scientific knowledge of our world Each accents ways in which current scientific understandings inform and in some cases are informed by contemporary appropriations of the language and thought of Christian tradition Each is also concerned to relate his or her approach to human valuing life and action A critical appraisal of their work shows that none provides a sufficient basis for an intellectually and religiously adequate theological ethics but that each contributes elements necessary to the articulation of such an ethics within the Protestant Christian tradition as it confronts the religious and intellectual challenges of today s world Religion and the Natural Sciences James E. Huchingson, 2005-02-07 The first half of Religion and the Natural Sciences is an introduction to the discussion of science and religion Here the reader learns why there is any debate at all and what resources exist for responding to it The second half deals with specific issues that arise in the individual sciences from astronomy and physics to biology and ecology Any project hoping to connect science and religion must supply the categories of connection which are found primarily although not exclusively in philosophy The simplicity of the arrangement and the nature of the selections are intended to make Religion and the Natural Sciences available to as wide an audience as possible including students from the sciences and technology the professions the humanities and liberal studies

and theology **Faith in America** Charles H. Lippy, 2006-09-30 Over the last 25 years there has been much talk of the presumed decline in religious participation in America In addition from the 1960s on surveys that mark the influence of religion in American life have shown a mixed response Many suggest that religion is losing influence in the culture as a whole others indicate that while organized religion may be experiencing challenges spirituality is on the upswing At the same time however there have been signs that religious life in the U S is extraordinarily healthy But religion in America has changed to be sure in a number of ways And it has changed us and our culture in return This timely set looks at the major forces that are changing the shape of religion in American life With an influx of immigrants from Asia Latin America and other regions the diversity of religion has grown to include Buddhism Hinduism Islam and other faiths Latin American and African American communities have experienced changes in the ways they practice their faith and in turn influence American culture in general Women have entered the clergy in record numbers and the push for allowing women and gays to enter the clergy in religions that limit or prohibit their roles is on the increase In addition gay couples are leading the same sex marriage movement and other social issues such as abortion stem cell research end of life care etc are still being debated Interest over how people actually live out their religion or spirituality has mushroomed in recent decades thanks in part to the information revolution and popular culture What folks do when they gather together to worship and where they come together has changed dramatically with the advent of the Internet and the role of sports in American life So much has changed and faith in America has become more important than ever as part of our culture our way of life and the way we relate to each other and the world around us The essays found in these pages shed light on our understanding of these transformations and help us comprehend the enormous role of religion in our society and in our world **Saving Nature** Tarjei Rønnow, 2011

Environmentalism has moved into the center of the most influential social movements in late modernity From preserving pre industrial landscapes advocating the intrinsic value of nature and protecting ecosystems against overexploitation it has developed into a worldview ethos and practice that is radically shifting the frontiers of politics economics and ethics Saving Nature approaches environmentalism as a belief system The book explores the impact of environmentalism on faith communities and vice versa and analyzes how environmental worldviews values attitudes and discourses affect religion By drawing on sources in the sociology of religion and environmental sociology it sheds light on the religious dimensions of environmentalism It locates the quick growth of environmentalism in the history of allegedly secular modernity and interprets environmentalism in the context of modernity's re sacralization Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 4 **The Oxford Handbook of Religion and Ecology** Roger S. Gottlieb, 2006-11-09 Ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the book's essays will reflect the three dominant dimensions of the field Part I will explore Analytic Philosophy of Religion James Franklin

Harris,2013-03-14 When Gene Long editor of Kluwer s Handbook of Contemporary Philosophy of Religion Series first invited me to write the volume on Analytic Philosophy of Religion I accepted with great enthusiasm My only explanation for that enthusiasm now is that I was younger and more naive at the time Soon after starting work on the volume my enthusiasm was dampened by the daunting magnitude of the task I began as a sprinter and quickly settled into the pace of a long distance runner Although I considered myself well read in the subject I soon discovered that I had a great deal of research to do to be confident that I had considered all of the major contributions to the various discussions issues and of religion As I read more and more problems found within analytic philosophy books and articles I realized that I had rushed into a territory already well trodden by the angels I am greatly impressed by the sophistication and subtlety of philosophical argument that characterize the different debates in contemporary analytic philosophy of religion This volume covers a vast amount of material I have endeavored to provide the fairest possible reading of different authors and in cases where I include my own critical evaluations and develop my own positions I have endeavored to provide the strongest possible interpretations of the positions I criticize

Faith and Knowledge Douglas Sloan,1994-01-01 Sloan explores the impact that the Protestant theological renaissance 1925 1960 had on American colleges and universities focusing in particular on the church s most significant claim to have a continuing voice in higher education He traces the role of the national ecumenical and denominational organizations and studies the changing place of college chaplains

Science And Theology Ted Peters,2019-05-20 How can we think about God s action in a quantum world of indeterminacy in a world that began with a Big Bang in a world in which life evolved and is continually evolving in a world governed by entropy and heading toward its eventual heat death These are some of the most perplexing questions that have arisen from the rapid scientific and techno

Sourcebook of the World's Religions Joel Beversluis,2011-02-08 Now in its third edition this is the most comprehensive work available on the rich variety of paths available to today s spiritual seekers More than an academic reference it explores how religions can collaborate to help the world Essays exploring the realm of building an interfaith community add to the book s detailed portraits of the major religious traditions The Sourcebook also contains essays on spiritual practices as diverse as theosophy wicca and indigenous religions This revised edition of the Sourcebook offers an unparalleled look at where spirituality is headed in the coming millennium

The Rights of Nature Roderick Frazier Nash,1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip

Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader **Barth and Ecotheology** Adrian Langdon, 2025-03-31 Barth and Ecotheology offers a critical and constructive reading of Karl Barth's theology in the context of the Anthropocene. It reflects on how a contemporary doctrine of creation must be broad enough to address issues such as climate change, colonialism, and racism, sexism, as well as integrating modern science. Such a theology would resist the human domination of nature and the various forms of displacement occurring in modernity. With Barth, the author contends that a theology of creation grounded in the self-revelation of God in Jesus Christ is the best place to rethink what it means to be human and to exist within the community of creation. Nevertheless, if we are to affirm the livingness of the world, creaturely differences, and a central place for land and place, then critical additions to Barth are needed. To accomplish this, the book provides constructive reinterpretations of Barth's theological method, doctrine of God, creation by the Word and Spirit, anthropology, and reconciliation. What emerges is a vision of the triune God of love as the source and ground of all that is. Along the way, Barth is brought into dialogue with ecotheology as well as theologians such as Wolfhart Pannenberg, Dietrich Bonhoeffer, and Bruce McCormack. The volume will be of particular interest to theologians focused on the doctrine of creation, ecotheology, and Barth studies.

Revelation and the Environment, AD 95-1995 Patmos Symposium 1995, Patmos, Greece, Jane Lubchenco, 1997. This book is the culmination of a remarkable symposium held at sea to mark the 1900th anniversary of the writing of the Book of Revelation by the Theologian St John. Also known as the Apocalypse, it was the source of inspiration for 200 scientists, religious leaders, philosophers, economists, and policy makers from all over the world to come together and contemplate the dangers to the planet's survival due to wasteful abuses of the environment, particularly the oceans. The Book of Revelation and the Environment AD 95-1995 provides a forum to integrate current scientific knowledge with a spiritual approach so as to ensure careful stewardship of the earth's finite resources. Ecological Imaginations in the World Religions Tony Watling, 2011-10-20. The field of religion and ecology is an emerging and growing movement that is becoming relevant and influential in the world. It seeks to analyse, encourage, inspire, use, compare, and combine religious traditions to engage and shape environmental issues. Tony Watling seeks to ethnographically analyse this important field and its expressions. In particular, he analyses and compares its explorations of different world religions for ecological themes and the resulting expressions of ecological visions in what he terms religious ecotopias: idealized environmentally friendly reimaginings of nature and humanity and correspondingly religion which seek to influence environmental attitudes.
