Evaluating Interreligious Peacebuilding and Dialogue Mohammed Abu-Nimer, Renáta Katalin Nelson, 2021-09-20 In the emerging fields of religious and interreligious peacebuilding the question of monitoring and evaluation is a challenging yet necessary process The need to develop comprehensive yet fitting evaluation models for religious and interreligious peacebuilding is not only

important for donor interests but also critical as a means of documenting and learning for peacebuilders themselves Theories and best practices in monitoring and evaluation have become prevalent in many fields yet the amount of literature on evaluating intercultural and especially religious and interreligious projects remains scant in comparison This volume offers a unique contribution that not only looks at several of the challenges and implications faced by religious and interreligious peacebuilders but also provides concrete examples of new models and tools for monitoring and evaluating religious and interreligious peacebuilding projects In doing so this volume serves as a tool and point of reference for individuals and organizations developing and implementing interreligious dialogue and peacebuilding projects

Decolonizing Religion and Peacebuilding Atalia Omer, 2023 An investigation of what consolidating religion as a technology of peacebuilding and development does to people s accounts of their religious and cultural traditions and why interreligious peacebuilding entrenches colonial legacies in the present Throughout the global south local and international organizations are frequent participants in peacebuilding projects that focus on interreligious dialogue Yet as Atalia Omer argues in Decolonizing Religion and Peacebuilding the effects of their efforts are often perverse reinforcing neocolonial

practices and disempowering local religious actors Based on empirical research of inter and intra religious peacebuilding practices in Kenya and the Philippines Omer identifies two paradoxical findings first religious peacebuilding practices are both empowering and depoliticizing and second more doing of religion does not necessarily denote deeper or more critical religious literacy Further she shows that these religious actors generate decolonial openings regardless of how closed or open their religious communities are Hence religion s occasional usefulness in peacebuilding does not necessarily mean justice oriented outcomes The book not only uses decolonial and intersectional prisms to expose the entrenched and ongoing colonial dynamics operative in religion and the practices of peacebuilding and development in the global South but it also speaks to decolonial theory through stories of transformation and survival

The Ashgate Research Companion to Religion and Conflict Resolution Lee Marsden, 2016-03-23 A comprehensive overview of the latest research in religion and conflict resolution this collection of twenty three essays brings together leading scholars in the field examining the contribution

religious actors have made and are making towards peace and resolving The Ashgate Research Companion to Religion and Conflict Resolution is primarily aimed at readerships with special interest in conflict resolution international security and religion and international relations and will also serve as a valuable resource for policy makers and conflict resolution practitioners The collection comprises five thematic sections each with chapters on vital and mainly contemporary topics in the field of religion and conflict resolution The principal themes include **Peace, Politics, and Religion** Jeffrey Haynes, 2020 Relationships between peace politics and religion are often controversial and sometimes problematic Religion is a core source of identity for billions of people around the world and it is hardly surprising that sometimes it becomes involved in conflicts At the same time we can see religion involved not only in conflict It is also central to conflict resolution peace making and peacebuilding Religious involvement is often necessary to try to end hatred and differences frequently central to political conflicts especially but not only in the Global South Evidence shows that religious leaders and faith based organisations can play constructive roles in helping to end violence and in some cases build peace via early warnings of conflict good offices once conflict has erupted as well as advocacy mediation and reconciliation The chapters of this book highlight that religion can encourage both conflict and peace through the activities of people individually and collectively imbued with religious ideas and ideals **The ^AOxford Handbook of Religion, Conflict, and Peacebuilding** Atalia Omer, R. Scott Appleby, David Little, 2015-03-02 The book provides a comprehensive overview of the literature on religion conflict and peacebuilding With a focus on structural and cultural violence the volume also offers a cutting edge interdisciplinary reframing of the scope of scholarship in the field **Faith-Based Organizations in Transnational Peacebuilding** Tanya B. Schwarz, 2018-03-23 How do faith based organizations influence the work of transnational peacebuilding development and human rights advocacy How is the political role of such organizations informed by their religious ideas and practices This book investigates this set of questions by examining how three transnational faith based organizations Religions for Peace the Taiz Community and International Justice Mission conceptualize their own religious practices values and identities and how those acts and ideas inform their political goals and strategies The book demonstrates the political importance of prayer in the work of transnational faith based organizations specifically in areas of conflict resolution post conflict integration agenda setting and in constituting narratives about justice and reconciliation It also evaluates the distinctive strategies that faith based organizations employ to navigate religious difference A central goal of the book is to propose a new way to study religion in international politics by actively questioning and reflecting on what it means for an act idea or community to be religious **The Complex Reality of Religious Peacebuilding** Katrien Hertog, 2010-08-20 This insightful book focuses on the multifaceted subject of sustainable religious peacebuilding Katrien Hertog discusses the ways in which religious actors can utilize resources to prevent violent conflict from occurring reduce conflict when it does happen and rebuild bridges between sides in after conflict has ceased She examines the emergence of

the field of religious peacebuilding developing a conceptual framework that outlines how aspects of religious organizations can contribute to effectual peacebuilding and creating a screening model that allows readers to analyze the resources and obstacles to peacebuilding in depth Using the Russia and the Orthodox Church as a major case study Hertog clearly shows what the concrete resources for peace are how they are applied what obstacles are hindering their realization and how these resources can be better utilized and supported This book tackles the controversial issue of the place of religion and religious organizations in the peace process While recognizing that no simple answer exists in solving ethnic religious and tribal conflict Hertog presents the ways religion can be used to create lasting sustainable peace *Interfaith Dialogue and Peacebuilding* David R. Smock, 2002 As the Christian Muslim and Jewish contributors to this volume have discovered firsthand religion is better at fostering peace than at fueling war Rarely conclude the authors is religion the principal cause of international conflict even though some adversaries may argue differently But religion can often be invaluable in promoting understanding and reconciliation and the need to exploit that potential has never been greater Drawing on their extensive experience in organizing interaction and cooperation across religious boundaries in the Middle East Africa Southeast Asia Northern Ireland and the Balkans the contributors explore the formidable potential of interfaith dialogue The first part of the volume analyzes the concept and its varied application the second focuses on its practice in specific zones of conflict and the third assesses the experiences and approaches of particular organizations When organized creatively interfaith dialogue can nurture deep engagement at all levels of the religious hierarchy including the community level It draws strength from the peacemaking traditions shared by many faiths and from the power of religious ritual and symbolism Yet as the authors also make plain it also has its limitations and carries great risks State and Politics in Religious Peacebuilding Tale Steen-Johnsen, 2017
