 and history It lists books of a general nature as well as works in the disciplines of history and the humanities These large
 divisions are then broken down by subject genre type of document and province or territory Titles of national provincial

 four ways by name title French subject and English subject And to facilitate browsing the major reference books those dealing
 with more than one subject or a large geographical region are also cross referenced Two entries have been created for each
 bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages Entries
 for unilingual works include citation in the language of the publication and a bilingual annotation The annotations are
 descriptive and provide information on the content arrangements and indexing of works the availability of non print formats

 21st 2022 in Magelang Central Java Indonesia *Research-Creation in Music and the Arts* Sophie Stévanne, Serge
 Lacasse, 2017-12-12 Since the 1970s the landscape of higher education and research has been considerably altered by the
 integration of the arts within the university environment Even though a form of research is inherent to artistic creation the
 creative process is not comparable to the established procedures involved in academic research As such how can the
 imperatives of intellectual and sometimes restrictive rigour characteristic of scholarly endeavours be reconciled with the
 more explorative and intuitive approach of artistic creation The concept of research creation allows artists and scholars to

collaborate on a common project acknowledging each participant's expertise in the production of an artistic work that either generates theoretical reflections or has emerged from academic research. This fully revised and updated translation of Sophie St Vance and Serge Lacasse's original French book offers an overview of the historical political social cultural and academic contexts within which research creation has emerged in Quebec and Canada before similar yet often divergent conceptions appeared elsewhere in the world. Focussing primarily on the case of music the book goes on to explore the pedagogical potential of research creation within a university based environment and proposes a clear and encompassing definition as well as a theoretical model of research creation supported by concrete examples. By underscoring the reciprocal nature of this approach and the potential benefits of collaborative relationships the authors' vision of research creation extends far beyond the field of music and art alone rather it has the potential to integrate all approaches and disciplines that seek to combine practice and research.

Art Films, 1982 **Paul Gauguin** Dario Gamboni, 2014-09-15 French artist Eugène Henri Paul Gauguin 1848-1903 once reproached the Impressionists for searching around the eye and not at the mysterious centre of thought. But what did he mean by this enigmatic phrase? In this innovative investigation into Gauguin's art and thought Dario Gamboni illuminates Gauguin's quest for this mysterious centre and offers a fresh look at the artist's output in all media from ceramics and sculptures to prints paintings and his large corpus of writings. Foregrounding Gauguin's conscious use of ambiguity Gamboni unpacks what the artist called the language of the listening eye. Gamboni shows that the interaction between perception cognition and imagination was at the core of Gauguin's work and he traces a line of continuity in them that has been previously overlooked. Emulating Gauguin's wide ranging curiosity with literature psychology theology and the natural sciences not to mention the whole of art history this richly illustrated book provides new insight into the life and works of this well known yet little understood artist.
