

THE NEW NATURALIST

"A series which has set a new standard in *Natural History Books*."
THIRD LITERARY SUPPLEMENT

THE SEA COAST by J. A. Steers

"As our greatest authorities on coastal topography remain to be supplanted than Professor Steers to write the natural history of our sea coast. This book is a complete study showing the contours, the evolution and origin of the cliffs, streams, sea margins, beaches and dunes, together with the plants and animals that support."
NATURALIST

BIRDS AND MEN by E. M. Nicholson

The Bird Life of British Towns, Villages, Gardens and Farmland "Explores a new subject and evokes themes: what exactly has been the impact of modern civilization upon bird life? A notable blend of high scholarship with graphic writing."
NATURALIST

THE FULMAR (Special Volume) by James Fisher

"The species of British bird has never been monographed so completely as the Fulmar in its splendid volume, and none can be a more worthy subject for so exhaustive a study. The author's researches have given us a book that is an example of scientific bird ornithology as no book. He is to be congratulated on successfully accomplishing this monumental work, which will be a standard for many years to come."

Nature-based Tourism and Conservation Clement Allan Tisdell, Clevo Wilson, 2012-01-01 This book tackles the two edge sword of non consumptive wildlife tourism on net does it add to or detract from species conservation The book does so with a treasure trove of original survey research on the supply and demand for wildlife tourism on both public and private lands from Antarctica to rainforests to marine wildlife The economic analysis is one of the first to apply new behavioral economics to analyzing tourists choices John Loomis Colorado State University US Does nature based tourism help or hinder biodiversity conservation The answer provided by this authoritative volume is that it depends on context and type of tourism and is no easy panacea Indeed it can result in an under supply of nature conservation from an economic point of view This book provides an excellent synthesis supported by case studies of the tourism conservation trade off problem it will appeal to both academic and practitioner audiences R Kerry Turner CBE University of East Anglia UK This book encapsulates a lifetime

,1980 Volume 1: Seabird Biodiversity and Human Activities Jaime A. Ramos, Leonel Pereira, 2022-06-30 Seabirds are global travellers connecting oceans and seas all over the world and facing multiple threats at local and global scales Seabirds are long lived top predators reflecting changes at lower trophic levels and are good models to assess ecological changes produced by human societies Thus world wide collaborations are needed to understand seabird ecology and to develop effective conservation measures benefitting both humans and seabird populations This book provides a modern overview on seabird biodiversity studies it begins by covering the most up to date techniques to study seabirds and then focus on pragmatic issues related with interactions between seabirds and humans the use of seabirds as ecological indicators and conservation of seabirds It gives an updated insight on all these topics and highlights gaps that need further development for a comprehensive understanding of the relationships between seabirds and human actions This book covers the response of the seabird research community to a biodiversity crisis aiming to contribute towards environmental sustainability It should provide inspiration to a wide range of professionals and students including the much needed world wide collaboration between research groups and practitioners In this way seabird research and conservation provide an inspiration for the solution of global issues such as climate change
