The SEA Brings Forth

A nature book about an adventurous commercial enterprise—collecting exotic sea creatures from the shore and the deeps for scientific use

by *Jack Rudloe*

Assuredly, then, that Butler was a successful business of his era, he had the first scientific article ever written published in this magazine. However, his venture is even better justified by the fact that he was a pioneer in collecting the Mammalia, and has joined a distinguished company of British natural collectors with this book. Dr. Butler was born in New York and educated in Florida, then Tennessee, although his biography is short, his attainments are long and long. He seems to be a well known in scientific laboratories and in the scientific community. Butler is a member of the American Academy of Arts and Sciences, and has a long list of scientific papers, but his scientific reputation has been up and down the years, and he has been a member of the International Union of Academies in Washington.
