Indian Naval Strategy in the Twenty-first Century James R. Holmes,Andrew C. Winner,Toshi Yoshihara,2009-04-02 This is

the first academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions. By a quirk of historical fate, Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea, ushering in centuries of Western dominance. In the 21st century, however, Asian states are once again resuming a naval focus, with both China and India dedicating some of their new-found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces. The United States, like the British Empire before it, is attempting to manage these rising sea powers while preserving its maritime primacy. This book probes how India looks at the sea, what kind of strategy and seagoing forces New Delhi may craft in the coming years, and how Indian leaders may use these forces. It examines the material dimension, but its major premise is that navies represent a physical expression of a society's history, philosophical traditions, and culture. This book then ventures a comprehensive appraisal of Indian maritime strategy. This book will be of interest to students of sea power, strategic studies, Indian politics, and Asian Studies in general. James R. Holmes is an Associate Professor of Strategy at the U.S. Naval War College and a former U.S. Navy surface warfare officer. Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College. Andrew C. Winner is Professor in the Strategic Research Department at the U.S. Naval War College.

Chinese Naval Strategy in the 21st Century James R. Holmes, Toshi Yoshihara, 2012-09-10
Alfred Thayer Mahan has been called America's nineteenth-century evangelist of sea power and the intellectual father of the modern US Navy. His theories have a timeless appeal, and Chinese analysts now routinely invoke Mahan's writings exhorting their nation to build a powerful navy. Economics is the prime motivation for maritime reorientation, and securing the sea lanes that convey foreign energy supplies and other commodities now ranks near or at the top of China's list of military priorities. This book is the first systematic effort to test the interplay between Western military thought and Chinese strategic traditions vis-à-vis the nautical arena. It uncovers some universal axioms about how theories of sea power influence the behaviour of great powers and examines how Mahanian thought could shape China's encounters on the high seas. Empirical analysis adds a new dimension to the current debate over China's rise and its importance for international relations. The findings also clarify the possible implications of China's maritime rise for the United States and illuminate how the two powers can manage their bilateral interactions on the high seas. Chinese Naval Strategy in the 21st Century will be of much interest to students of naval history, Chinese politics, and security studies.

Military Strategy in the 21st Century Kersti Larsdotter, 2020-05-21
Military Strategy in the 21st Century explores military strategy and the new challenges facing Western democracies in the twenty-first century, including strategy in cyber operations and peacekeeping challenges for civil-military relations and the strategic choices of great powers and small states. The volume contributes to a better understanding of military strategy in the twenty-first century through exploring strategy from three perspectives: first, the study of strategy and how our understanding of strategy has changed over time; second, new areas for strategic theory such as peacekeeping and

cyberspace and third the makers of strategy and why states choose suboptimal strategies With the increasing number of threats challenging strategy makers such as great power rivalry terrorism intrastate wars and transnational criminal organisations Military Strategy in the 21st Century will be of great value to scholars of IR Security Studies Strategic Studies and War Studies as well as policymakers and practitioners working with military strategy in particular and international security and war in general The chapters were originally published as a special issue of the Journal of Strategic Studies

India's Naval Strategy and Asian Security Anit Mukherjee, C. Raja Mohan, 2015-11-19 This book examines India's naval strategy within the context of Asian regional security Amidst the intensifying geopolitical contestation in the waters of Asia this book investigates the growing strategic salience of the Indian Navy Delhi's expanding economic and military strength has generated a widespread debate on India's prospects for shaping the balance of power in Asia This volume provides much needed texture to the abstract debate on India's rise by focusing on the changing nature of India's maritime orientation the recent evolution of its naval strategy and its emerging defence diplomacy In tracing the drift of the Navy from the margins of Delhi's national security consciousness to a central position analysing the tension between its maritime possibilities and the continentalist mind set and in examining the gap between the growing external demands for its security contributions and internal ambivalence this volume offers rare insights into India's strategic direction at a critical moment in the nation's evolution By examining the internal and external dimensions of the Indian naval future both of which are in dynamic flux the essays here help a deeper understanding of India's changing international possibilities and its impact on Asian and global security This book will be of much interest to students of naval strategy Asian politics security studies and IR in general

Understanding Contemporary Strategy Thomas M. Kane, David J. Lonsdale, 2012-03-12 Understanding Contemporary Strategy provides an accessible and comprehensive introduction to the theory and practice of modern strategy Covering all the main issues in the field the book explores the major themes through a combination of classical and modern strategic theory history and current practice The book is split into three main sections Definition and Context including discussion of the human technological intelligence ethical and grand strategic dimensions Strategy in the Geographic Environments land sea air and space Contemporary Strategic Challenges terrorism insurgency and nuclear strategy Each chapter presents the reader with a succinct summary of the topic but also provides a challenging analysis of current issues supporting students with pedagogical features such as suggested further reading boxed case studies and study questions This book will be essential reading for upper level students of strategic studies war studies military history and international security
