The Quattro Cento Adrian Stokes, 2002 Adrian Stokes 1902-1972 was a British painter and author whose writings on art have been allowed to go out of print despite their impact on Modernism and ongoing acclaim for their beauty and intellectual acuity Two of his most influential books *The Quattro Cento* of 1932 and *Stones of Rimini* of 1934 are brought together for the first time in this new volume which includes all their original illustrations This new edition also provides a foreword by Stephen Bann and introductions by David Carrier and Stephen Kite that place Stokes's masterworks in the context of early twentieth century culture and discuss their structure and relevance to today's experience of art and architecture Written as parts of an incomplete trilogy *The Quattro Cento* and *Stones of Rimini* mark a crossroads in the transition from late Victorian to Modernist conceptions of art especially sculpture and architecture Stokes continued even extended John Ruskin's and Walter Pater's belief that art is essential to the individual's proper psychological development but wove their teaching into a new aesthetic shaped by his analysis with Melanie Klein and recent innovations in literature dance and the visual arts Few writers have been able to invoke the material presence of works of art in the way Stokes does in *The Quattro Cento* and *Stones of Rimini* They combine travel writing with acts of looking spun out so as to reinterpret the imposing legacy of the Italian Renaissance through an aesthetic of the direct carving of stone which has parallels in the sculpture of Henry Moore and Barbara Hepworth but was for Stokes the discovery of artists in fifteenth century Italy To his way of thinking there then arose a realization that the materials of art were the actual objects of inspiration the stocks for the deepest fantasies During the Renaissance Stokes maintained stone accordingly blossomed into sculpture and buildings

Primal Robin Baker, 2009-11-10 Presumed dead a group of undergraduate students who go missing on a deserted Pacific island emerge one year later in two groups of ragged and naked survivors All but one of the surviving women have conceived and two students plus their professor are said to have died In the glare of the world's media every survivor sticks to the same unconvincing version of events Piece by piece the narrator examines the evidence and conducts interviews with the survivors to work out exactly what happened on the island during that year Slowly a disturbing picture emerges of feral humans driven by rivalry and sexual tension a *Lord of the Flies* scenario for adults that suspiciously seems to test the dead professor's theory that by nature people are no different from apes in the wild

The Federated States of Micronesia's Engagement with the Outside World Gonzaga Puas, 2021-09-28 This study addresses the neglected history of the people of the Federated States of Micronesia's FSM engagement with the outside world Situated

in the northwest Pacific FSM's strategic location has led to four colonial rulers. Histories of FSM to date have been largely written by sympathetic outsiders. Indigenous perspectives of FSM history have been largely absent from the main corpus of historical literature. A new generation of Micronesian scholars are starting to write their own history from Micronesian perspectives and using Micronesian forms of history. This book argues that Micronesians have been dealing successfully with the outside world throughout the colonial era in ways colonial authorities were often unaware of. This argument is sustained by examination of oral histories, secondary sources, interviews, field research, and the personal experience of a person raised in the Mortlock Islands of Chuuk State. It reconstructs how Micronesian internal processes for social stability and mutual support endured rather than succumbing to the different waves of colonisation. This study argues that colonisation did not destroy Micronesian cultures and identities but that Micronesians recontextualised the changing conditions to suit their own circumstances. Their success rested on the indigenous doctrines of adaptation, assimilation, and accommodation, deeply rooted in the kinship doctrine of *eaea fengen* (sharing) and *alilis fengen* (assisting each other). These values pervade the Constitution of the FSM, which formally defines the modern identity of its indigenous peoples, reasserting and perpetuating Micronesian values and future continuity.

Culture and Sustainable Development in the Pacific Antony Hooper, 2005-04-01

Throughout the South Pacific, notions of culture and development are very much alive in political debate, the media, sermons, and endless discussions amongst villagers and the urban lites, even in policy reports. Often the terms are counterposed, and development along with economic rationality, good governance, and progress is set against culture or custom, tradition, and identity. The decay of custom and impoverishment of culture are often seen as wrought by development, while failures of development are haunted by the notion that they are due somehow to the darker, irrational influences of culture. The problem is to resolve the contradictions between them so as to achieve the greater good: access to material goods, welfare, and amenities, modern life without the sacrifice of the traditional values and institutions that provide material security and sustain diverse social identities. Resolution is sought in this book by a number of leading writers from the South Pacific, including Langi Kavaliku, Epli Hau ofa, Marshall Sahlins, Malama Meleisea, Joeli Veitayaki, and Tarcisius Tara Kabutaulaka. The volume is brought together for UNESCO by Antony Hooper, Professor Emeritus at the University of Auckland. UNESCO experts include Richard Engelhardt, Langi Kavaliku, Russell Marshall, Malama Meleisea, Edna Tait, and Mali Voi.

Ebb and Flow Easkey Britton, 2023-04-11

An exploration of water's power to heal us, inspire us, and offer us spiritual meaning. This is a feminist reimagining of the meaning of power through the lens of water. Easkey offers a range of wellness practices to encourage the reader to connect with water as healer, restoring a relationship of care. Our strength lies in being soft like water. This book is about the power we gain by connecting to water. It's about how we can restore our relationship with the world's different bodies of water and by doing so, restore both the water and ourselves. By sharing Easkey's own experiences as surfer and marine scientist, as well as those of many of her mentors who are at the forefront of water protection and activism around the

world it guides readers into reimagining the spirituality of water and restoring our innate connection with this lifeblood of the planet. The book also provides the reader with water inspired strategies to restore calm, reduce stress and soothe anxiety. These range from simple breathing and visualization exercises to undertaking a journey from a water source to the ocean in order to forge a deep connection with the water. The emphasis is as much on the benefit to water as it is to the individual and on creating a culture of reciprocity and care. By regaining this lost connection with water we learn to develop an empathic connection with the force of all life and in the process restore our own hearts and minds.

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 1 Jo Boaler, Jen Munson, Cathy Williams, 2021-01-27. Engage students in mathematics using growth mindset techniques. The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume you'll find a collection of low floor, high ceiling tasks that will help you do just that by looking at the big ideas at the first grade level through visualization, play and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning. Open, creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that there is no such thing as a math person; anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics. With engaging questions, open ended tasks and four color visuals that will help kids get excited about mathematics. Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.

Voyaging Through the Contemporary Pacific David Hanlon, Geoffrey M. White, 2000-11-08. The Pacific has long been a site for debates over disciplinary approaches and the ethics and politics of research within neocolonial and postcolonial contexts. This volume makes a significant contribution to these debates and to the related and ongoing exchanges concerning area studies, the globalization of capitalism and its attendant cultural, social and political effects. In so doing, the authors link work from the Pacific with theoretical and methodological issues raised in other areas of the globe. This collection of the best from Contemporary Pacific will prove invaluable to scholars, students and all interested in the study

of history culture and identity in the Pacific and in post colonial societies everywhere **Mapping Malory** D. Armstrong, K. Hodges, 2014-07-10 Medievalists are increasingly grappling with spatial studies This timely book argues that geography is a crucial element in Sir Thomas Malory's *Morte Darthur* and contributors shine a light on questions of politics and genre to help readers better understand Malory's world *Exploring the 3-D World* Rosanne Regan Hansel, 2021-05-25 We live in a three dimensional world but many of our learning environments today offer few opportunities for three dimensional exploration Spatial reasoning is also integral to everyday life in social studies the arts and geography as well as new careers like computer animation Navigating the 3 D World will help early childhood teachers feel confident in implementing more mathematical and spatial concepts into their rooms *Deepest Oceans* Yves Earhart, AI, 2025-02-12 *Deepest Oceans* unveils the largely unexplored realm of the deep ocean highlighting its vital role in Earth's systems This book ventures into the abyssal plains and deep sea trenches revealing unique ecosystems thriving under extreme pressure and darkness One intriguing aspect is the presence of extremophiles near hydrothermal vents offering clues about the origins of life The book also emphasizes the importance of underwater technology in unraveling the geological and biological secrets of these depths The book progresses from basic oceanography concepts to detailed explorations of deep sea topography life forms and the impact of human activities like deep sea mining It adopts an interdisciplinary approach integrating Earth science marine science and technological perspectives *Deepest Oceans* underscores that the deep ocean despite its remoteness is inextricably linked to the surface world influencing climate regulation and global environmental health
