Seabrook Station Henry F. Bedford, 1990 [American Energy Policy in the 1970s](#) Robert Lifset, 2014-04-03 This historical investigation focuses exclusively on American energy policy in the 1970s Revisiting the last time energy issues came to the forefront of national political discourse the essays collected here provide new insight into the energy crisis of that decade insights with clear implications for our present dilemmas *Nuclear Power and Social Power* Rick Eckstein, 1997 We often think of progress and economic growth as natural developments that benefit various members of society This title challenges this view and instead suggests that specific definitions of progress and economic growth can be molded by powerful individuals organizations and classes [Bulletin of the Atomic Scientists](#) , 1991-03 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world

[Utopias](#) Howard P. Segal, 2012-03-02 This brief history connects the past and present of utopian thought from the first utopias in ancient Greece right up to present day visions of cyberspace communities and paradise Explores the purpose of utopias what they reveal about the societies who conceive them and how utopias have changed over the centuries Unique in including both non Western and Western visions of utopia Explores the many forms utopias have taken prophecies and oratory writings political movements world s fairs physical communities and also discusses high tech and cyberspace visions for the first time The first book to analyze the implicitly utopian dimensions of reform crusades like Technocracy of the 1930s and Modernization Theory of the 1950s and the laptop classroom initiatives of recent years **Bulletin of the Atomic Scientists** , 1991-03 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Nuclear Threats, Nuclear Fear and the Cold War of the 1980s** Eckart Conze, Martin Klimke, Jeremy Varon, 2017 The book brings together cutting edge scholarship from the United States and Europe to address political and cultural responses to the arms race of the 1980s **Solar Energy, Technology Policy, and Institutional Values** Frank N. Laird, 2001-03-26 Energy policies that promote new technologies and energy sources are policies for the future They influence the shape of emergent technological systems and also condition our social political and economic lives Solar Energy Technology Policy and Institutional Values demonstrates the difficulties of deliberating such properties by providing a historical case study that analyses US renewable energy policy from the end of World War II through the energy crisis of the 1970s The book illuminates the ways beliefs and values come to dominate official problem frames and get entrenched in institutions In doing so it also explains why advocates of renewable energy have often faced ideological opposition and why policy makers fail to take them seriously [The State and Social Power in Global Environmental Politics](#) Ronnie D. Lipschutz, Ken Conca, 1993 The State and Social Power in Global Environmental Politics

examines how the difficult issues of social political and economic relations will complicate the efforts initiated at the June 1992 Earth Summit in Rio de Janeiro The contributors argue that national governments must begin to acknowledge the role of new actors in their environmental policies The authors of these original essays including Jesse C Ribot James N Rosenau Barbara Jancar and Ann Hawkins envision a world in which governments driven by various pressures find themselves increasingly bound to common efforts and joint solutions A New Dawn for the New Left B. Slonecker, 2012-12-05 This book examines the underground Liberation News Service and the commune Montague Farm to trace the evolution of the New Left after 1968 In the process it extends the chronological breadth of the long Sixties rethinks the relationship between political and cultural radicalism and explores the relationships between diverse social movements Seabrook Station Henry F. Bedford, 1990 Critical Masses Thomas Raymond Wellock, 1998 The grassroots battle against nuclear power told by a historian who did time on both sides of the issue CRITICAL MASSES tells how the citizens of California from the tiny town of Wasco in the Central Valley to the vast suburbs of Los Angeles challenged the threat of nuclear power transformed the anti nuclear movement and helped change the face of U S politics 21 photos *The Grid* Julie A Cohn, 2018-02-02 The history of the grid the world s largest interconnected power machine that is North America s electricity infrastructure The North American power grid has been called the world s largest machine The grid connects nearly every living soul on the continent Americans rely utterly on the miracle of electrification In this book Julie Cohn tells the history of the grid from early linkages in the 1890s through the grid s maturity as a networked infrastructure in the 1980s She focuses on the strategies and technologies used to control power on the grid in fact made up of four major networks of interconnected power systems paying particular attention to the work of engineers and system operators who handled the everyday operations To do so she consulted sources that range from the pages of historical trade journals to corporate archives to the papers of her father Nathan Cohn who worked in the industry from 1927 to 1989 roughly the period of key power control innovations across North America Cohn investigates major challenges and major breakthroughs but also the hidden aspects of our electricity infrastructure both technical and human She describes the origins of the grid and the growth of interconnection emerging control issues including difficulties in matching generation and demand on linked systems collaboration and competition against the backdrop of economic depression and government infrastructure investment the effects of World War II on electrification postwar plans for a coast to coast grid the northeast blackout of 1965 and the East West closure of 1967 and renewed efforts at achieving stability and reliability after those two events **Front Porch Politics** Michael S. Foley, 2013-09-17 An on the ground history of ordinary Americans who took to the streets when political issues became personal It is widely believed that Americans of the 1970s and 80s were exhausted by the upheavals of the 60s and eager to retreat to the private realm When they did take action it was mainly to express their disillusionment with government by supporting the right In fact as Michael Stewart Foley shows neither of these assumptions is correct On the

community level the 1970s and 80s saw vibrant new forms of political activity emerge Tenants challenged landlords farmers practiced civil disobedience to protect their land and laid off workers asserted a right to own their idled factories Activists fought to defend the traditional family or to expand the rights of women while entire towns organized to protest the toxic sludge in their basements In all these arenas Americans were propelled by their own experiences into the public sphere Disregarding conventional ideas of left and right they turned to political action when they perceived an immediate threat to the safety and security of their families homes or dreams Front Porch Politics is a people s history told through on the ground experiences Recalling crusades famous and forgotten Foley shows how Americans followed their outrage into the streets Their distinctive style of visceral local and highly personal activism remains a vital resource for the renewal of American democracy

American Public Policy: Promise and Performance, 9th Edition B. Guy Peters, 2012-10-16 Voting and elections may often be cited as the most entertaining aspect of political theatre however it is the arena of public policy that has the most direct impact on the lives of the citizenry And as we have seen played out in recent debates over healthcare reform policy changes can be dramatic sweeping and often hotly contested Known for providing a trusted and comprehensive overview of the policy process B Guy Peters returns with the ninth edition of American Public Policy Promise and Performance Beyond walking students through the governmental structures and policy making procedures Peters efficiently covers a wide swath of policy areas and then concludes with a look at both cost benefit analysis and ethical analysis Framed in context of the aftermath of the financial crisis and Great Recession the ninth edition considers how policy has been impacted by persistent unemployment and growing income inequality In addition Peters discusses the strain on education budgets increased oversight of financial activities fiscal policies meant to stimulate the economy and the political challenge of balancing the budget in light of increased public spending

Counter-shock Duccio Basosi, Giuliano Garavini, Massimiliano Trentin, 2018-04-30 The oil price collapse of 1985-6 had momentous global consequences non fossil energy sources quickly became uncompetitive the previous talk of an OPEC imperium was turned upside down the Soviet Union lost a large portion of its external revenues and many Third World producers saw their foreign debts peak Compared to the much debated 1973 oil shock the countershock has not received the same degree of attention even though its legacy has shaped the present day energy scenario This volume is the first to put the oil counter shock of the mid 1980s into historical perspective Featuring some of the most knowledgeable experts in the field Counter Shock offers a balanced approach between the global picture and local study cases In particular it highlights the crucial interaction between the oil counter shock and the political counterrevolution against state intervention in economic management put forward by Ronald Reagan and Margaret Thatcher in the same period

Radiation Nation Natasha Zaretsky, 2018-02-13 On March 28 1979 the worst nuclear reactor accident in U S history occurred at the Three Mile Island power plant in Central Pennsylvania Radiation Nation tells the story of what happened that day and in the months and years that followed as local residents tried

to make sense of the emergency The near meltdown occurred at a pivotal moment when the New Deal coalition was unraveling trust in government was eroding conservatives were consolidating their power and the political left was becoming marginalized Using the accident to explore this turning point Natasha Zaretsky provides a fresh interpretation of the era by disclosing how atomic and ecological imaginaries shaped the conservative ascendancy Drawing on the testimony of the men and women who lived in the shadow of the reactor Radiation Nation shows that the region's citizens especially its mothers grew convinced that they had sustained radiological injuries that threatened their reproductive futures Taking inspiration from the antiwar environmental and feminist movements women at Three Mile Island crafted a homegrown ecological politics that wove together concerns over radiological threats to the body the struggle over abortion and reproductive rights and eroding trust in authority This politics was shaped above all by what Zaretsky calls biotic nationalism a new body centered nationalism that imagined the nation as a living mortal being and portrayed sickened Americans as evidence of betrayal The first cultural history of the accident Radiation Nation reveals the surprising ecological dimensions of post Vietnam conservatism while showing how growing anxieties surrounding bodily illness infused the political realignment of the 1970s in ways that blurred any easy distinction between left and right

Zimmer Alyssa S. McClanahan, 2025-04-15 In 1969 a combination of utility companies announced they would build a 395 million nuclear power plant in Moscow Ohio about thirty miles southeast of Cincinnati Named after the president of Cincinnati Gas and Electric CG E the William H Zimmer nuclear power station was expected to provide the Cincinnati metropolitan area with affordable and clean energy well paying jobs and tax revenue However as news spread that construction on the Zimmer plant was unsafe as well as over budget public opinion of the project soured culminating in a consumer led campaign that ultimately compelled investors to abandon the nuclear station in 1984 Zimmer The Movement That Defeated a Nuclear Power Plant traces the story of the activists who worked to secure the plant's cancellation Influenced by environmentalism civil rights and consumer rights a broad based coalition of concerned citizens including parents educators local and state officials whistleblowing construction workers antinuclear activists and lawyers joined together to insist on public input and government accountability Although the nuclear project was 99 percent complete pressure from the anti Zimmer campaign and government regulators along with major financial strain caused CG E to repurpose the facility as a coal burning plant By combining oral histories with government and corporate documentation Zimmer pieces together a yet untold narrative about political agency demonstrating that ordinary motivated people have the power to shape public health and energy infrastructure

Energy Capitals Joseph A. Pratt, Martin V. Melosi, Kathleen A. Brosnan, 2015-03-23 Fossil fuels propelled industries and nations into the modern age and continue to powerfully influence economies and politics today As Energy Capitals demonstrates the discovery and exploitation of fossil fuels has proven to be a mixed blessing in many of the cities and regions where it has occurred With case studies from the United States Canada Mexico Norway Africa and Australia this volume views a range of

older and more recent energy capitals contrasts their evolutions and explores why some capitals were able to influence global trends in energy production and distribution while others failed to control even their own destinies Chapters show how local and national politics social structures technological advantages education systems capital infrastructure labor force supply and demand and other factors have affected the ability of a region to develop and control its own fossil fuel reserves The contributors also view the environmental impact of energy industries and demonstrate how in the depletion of reserves or a shift to new energy sources regions have or have not been able to recover economically The cities of Tampico Mexico and Port Gentil Gabon have seen their oil deposits exploited by international companies with little or nothing to show in return and at a high cost environmentally At the opposite extreme Houston Texas has witnessed great economic gain from its oil natural gas and petrochemical industries Its growth however has been tempered by the immense strain on infrastructure and the human transformation of the natural environment In another scenario Perth Australia Calgary Alberta and Stavanger Norway have benefitted as the closest established cities with administrative and financial assets for energy production that was developed hundreds of miles away Whether coal oil or natural gas the essays offer important lessons learned over time and future considerations for the best ways to capture the benefits of energy development while limiting the cost to local populations and environments

Three Mile Island: a Nuclear Crisis in Historical Perspective J. Samuel Walker, 2017-03-10

The author presents a bit of history about nuclear power that began in 1954 when the U S Congress signed the Atomic Energy Act a law that made the development of nuclear power possible by allowing basic information about atomic energy for civilian applications to be available in hopes it would building an industry that could provide a new source of electrical power The author explores the initial political business construction reactor safety and environmental elements with the debates to build nuclear plants within the United States as a source of energy then leads into regulation of nuclear power This scholarly text coupled with some black and white illustrations provides some insights to other nuclear plants that were build within the United States and some reactor faults prior to Three Mile Island s accident Majority of this book centers around Three Mile Island s accident evacuation of employees causes political crisis aftermath at State and Federal levels NRC US Nuclear Regulatory Commission and business community response and the growing public concerns are covered Related products Permissible Dose ISBN 9780160949432 The Road to Yacca Mountain ISBN 9780160949425 Other products produced by the US Nuclear Regulatory Commission USNRC can be found here <https://bookstore.gpo.gov/agency/nuclear-regulatory-commission/nrc>
