

The background of the book cover is a surreal, dark-toned illustration. It features a large, pale, crescent-shaped moon or celestial body in the upper right. In the upper left, a small, glowing yellow orb with a face-like pattern is surrounded by radiating lines. Below this, a large, reddish-brown, draped fabric or sail-like structure flows across the lower left. In the center, a small boat or platform with several figures is visible, and a thin pole or mast extends upwards. The overall style is painterly and atmospheric, with a focus on maritime and celestial themes.

Interdisciplinarity in World History Ahmed Abushouk, Mahjoob Zweiri, 2016-06-22 This book represents selected papers of an international conference convened by the Department of Humanities at Qatar University Doha in March 2013 Its theme was Interdisciplinarity in History An Old Method in New World Context Twelve out of the fifty papers presented at the conference have been thoroughly reviewed revised and compiled in this volume Their contributions emphasize that interdisciplinarity in history has become a key term for professional historians who reject the professional identity of history based on its claimed autonomy and the distinctiveness of its research methods and argue that this claim has seriously narrowed the intellectual horizons of the discipline in terms of both teaching and research The chapters also stress that historical research should not be confined to political events as it was by ancient historians but rather be open to other complex issues which require thorough investigation and collaboration between history and other disciplines In this sense interdisciplinarity in history is a process of answering questions solving problems or examining topics that are too broad or multifaceted to be tackled adequately by history as a discipline on its own Therefore history should not be regarded as a stationary subject as Robinson wrote but as a discipline that would transcend the limitations formerly imposed upon the study of the past and integrate with other social science disciplines to widen its methodological scope and investigate many issues that had previously ignored or marginalized *English/British Naval History to 1815* Eugene L. Seapower in the Post-modern World Basil Germond, 2024-04-16 In an era of increasing geopolitical tensions disruptive technologies and the rise of authoritarianism the question of who masters the seas is more than ever central to the future of the international order But while naval operations maritime security and ocean governance have become increasingly relevant in world politics the concept and definition of seapower have largely been neglected by the scholarship in the international relations

field Seapower in the Post modern World fills this gap with an analysis of the naval economic and ideational dimensions of seapower from antiquity to today Exploring the extent to which the permanent elements associated with seapower such as technology commerce and maritime culture transcend historical periods Basil Germond frames contemporary seapower as a combination of components including traditional naval power post modern conceptions of collective and civilian seapower and the neo modern phenomena of maritime territorialization and the naval arms race By giving seapower a new conceptual definition Seapower in the Post modern World offers key analytical tools for understanding the stability of the global maritime order and seapower s contribution to global leadership more broadly

Globalization and Global History Barry K. Gills,William Thompson,2012-11-12 Globalization and Global History argues that globalization is not an exotic and new phenomenon Instead it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations With this historical advantage the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past The book is divided into three sections The first focuses on how globalization has been written about from a historical perspective The second part advances three different takes on how best to view globalization from a very long term stance The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions

The Deep Roots of Modern Democracy John Gerring,Brendan Apfeld,Tore Wig,Andreas Forø Tollefsen,2022-08-25 This book explores the deep roots of modern democracy focusing on geography and long term patterns of global diffusion Its geographic argument centers on access to the sea afforded by natural harbors which enhance the mobility of people goods capital and ideas The extraordinary

connectivity of harbor regions thereby affected economic development the structure of the military statebuilding and openness to the world and through these pathways the development of representative democracy The authors second argument focuses on the global diffusion of representative democracy Beginning around 1500 Europeans started to populate distant places abroad Where Europeans were numerous they established some form of representative democracy often with restrictions limiting suffrage to those of European heritage Where they were in the minority Europeans were more reticent about popular rule and often actively resisted democratization Where Europeans were entirely absent the concept of representative democracy was unfamiliar and its practice undeveloped
