The Fleet Air Arm in the Second World War, Volume II, 1942-1943 Ben Jones, 2018-06-13 This is the second of three volumes covering the transformation of the Fleet Air Arm during the Second World War As the subtitle of this volume The Fleet Air Arm in Transition suggests the years 1942-1943 marked a stepping stone between the small pre war cadre operating from a small number of carriers to a naval air arm flying modern aircraft types from a large number of ships and as will be seen in Volume III capable of operating a number of Fleet Carriers in the Pacific Ocean for sustained periods Whereas the majority of Volume I dealt with operations this volume has a much more even balance covering planning and policy on the one hand and operations on the other This reflects the crucial nature of this period as the development and expansion of the Fleet Air Arm gathered pace whilst an increasingly diverse range of operations took place with those in the Mediterranean and the Atlantic reaching a climax The reader will gain a clear appreciation of the growing importance indeed primacy of the aircraft carrier within the proposals for the future composition of Royal Navy's surface fleet together with the nature of the Fleet Air Arm's expansion programmes Such expansion programmes were hindered by the constraints of aircraft production and the acquisition of sufficient shore facilities for the formation of new squadrons and the continued support of others Some of the Fleet Air Arm's most famous operations occurred during these years such as the escort of the Pedestal convoy to Malta air cover for the landings in North Africa Sicily and at Salerno and the gallant but ill fated attack of 825 Squadron during the Channel Dash The increasing role played by the Fleet Air Arm aircraft operating from Escort Carriers and Merchant Aircraft Carriers in the Battle of the Atlantic during 1943 is also apparent The documents in this volume will bring to life the difficulties of operating aircraft at sea the nature of air combat and the complexities involved in expanding an organisation such as the Fleet Air Arm under wartime conditions As such it will enhance our understanding of the history of the Royal Navy's air arm during the Second World War

Story of the Spitfire Ken Delve, 2025-01-30 An in depth exploration of the Spitfire's combat legacy pilot tactics and its enduring iconic status To many people the Supermarine Spitfire was Britain's saviour during the Battle of Britain and the embodiment of air combat during the Second World War The Story of the Spitfire presents a thrilling appraisal of this unique aircraft focusing on its fighting capability and the tactics of the pilots who flew it Using official evaluations and reports alongside technical and tactical developments plus the recollections of Spitfire pilots

Ken Delve provides a fascinating insight into the combat career of this legendary aircraft. Despite some problems with their new aircraft, the Fighter Command pilots of 1938 were generally delighted with the Spitfire; speed, manoeuvrability and firepower were all far greater than they had been with the earlier biplanes. In tactics and training, the RAF was outdated but it adapted quickly and the air battles over Britain in late 1940 forged the Spitfire legend. How justified was the legend? There were only nineteen Spitfire squadrons in Fighter Command during the Battle of Britain; it was only later as the RAF turned to the offensive that the number of Spitfire units increased dramatically. At certain times the combat initiative was lost to improved Messerschmitt Bf 109s and Focke Wulf Fw 190s but with increased performance and better training the Spitfire clawed back the advantage. By 1944 the Spitfire was operating as a fighter bomber in various theatres of war with new tactics and new problems. Many fighter pilots thought that having bombs strapped under the aircraft verged on an insult but with aerial targets in short supply this was the most effective if risky way of taking the war to the enemy. After the war the Spitfire saw action right up to 1948 in the Arab Israeli War. Today there are approximately seventy airworthy Spitfires in existence and R J Mitchell's remarkable aircraft is still the highlight of flying displays around the world.
