Co-operative Community in Public Housing Jorge Sousa, 2013-12-06 Public housing projects were the original form of government supported housing for low income residents Over the last fifty years many projects have struggled with high crime rates and numerous social problems One solution proposed to address these ongoing issues is granting residents decision making power within their community by converting into a co operative Building a Co operative Community in Public Housing follows the journey of a Toronto public housing complex as it was converted into a resident operated co operative a first in Canada Jorge Sousa traces the story of Alexandra Park which became the Atkinson Housing Co operative in 2003 after a ten year conversion process Sousa who himself was raised in the community provides an empirical account of the contributing factors that influenced its decision to pursue community based control as well as the experiences of both residents and government officials engaged in this process Finally Building a Co operative Community in Public Housing offers a framework for other communities facing similar circumstances who want to learn how to go about undertaking this process All royalties from this book will be contributed to the Co operative Housing Federation of Toronto Charitable Fund

Cooperatives and Local Development Christopher D. Merrett, Norman Walzer, 2016-09-16 First Published in 2004 The market economy has changed profoundly over the past two centuries In the nineteenth century business enterprises were largely single product ventures managed directly by the owners and rooted within national economies In the twentieth century firms employed managers who were not owners Firms also evolved into multiproduct multiunit entities that could employ thousands of workers In the twenty first century many firms operate on a global scale taking advantage of free trade policies and rapidly evolving computer and telecommunications technologies Given this potential it is crucial that producers consumers economic developers and researchers realize how co ops can promote local economic and community development Hence this book includes the perceptions of experts on a variety of cooperative issues including the challenges involved in starting a co op and in understanding its impact on surrounding communities This book can be especially useful because it provides the theoretical foundations and practical applications of cooperative behavior **Rural Cooperation F.**

F. Lyimo, 2012 No person no country in the world irrespective of its stage of development is fully self sufficient Cooperation brings together peoples and nations and facilitates peaceful co existence So begins Rural Cooperation In The Cooperative Movement In Tanzania what will undoubtedly be seen as a seminal work in the field The author has lectured a course on Rural Cooperation in Tanzania at the University of Dar es Salaam for seven consecutive years but lack of appropriate books

with adequate coverage of the course content obliged him to conduct extensive research on cooperation and cooperatives. The resulting book covers the entire field and addresses the subject by providing a foundation on which wider study can be based. It is intended to make its readers aware of the strategies and challenges of cooperation and has a wider relevance as it will be useful to policy makers in the cooperative sector which is a significant part of the private sector in Tanzania and indeed in most African countries. By June 2008 there were 2614 agricultural marketing cooperative societies, 4780 savings and credits cooperative societies, 71 livestock cooperative societies, 129 fishing cooperative societies, 11 housing cooperative societies, 3 mining cooperative societies, 185 industrial cooperative societies, 98 water irrigation cooperative societies, 4 transport cooperative societies, 103 consumer cooperative societies and 553 service and other cooperative societies perfectly illustrative of the movement's scope and the need to pay it careful attention. The topics included make it appropriate for use in Sociology, Rural Development, Marketing, Development Studies and studies in other specialties in the Social Sciences. From an exploration of the cooperative movement's various international iterations to a perspicacious survey of the history of cooperatives in Tanzania, Dr Lyimo highlights the issues facing farmers and business people and illustrates the way in which cooperative effort enterprises that put people and not capital at the center of their business can not only improve members' economic power in bargaining for better marketing conditions and prices but also to increase employment opportunities thereby improving the standard of living for a large number of people. In these times of penury and economic disenfranchisement, this book not only fills the information gap but provides in the ultimate chapters, Procedures for Organizing a Cooperative Society and Managing Rural Cooperative Societies, the basic principles and advice for those considering the cooperative model as the best means of improving their economic viability.

Understanding Community Peter Somerville, 2016-04-25. This substantially revised edition of a highly topical text draws upon theory from Marx and Bourdieu to offer a clearer understanding of community in capitalist society. The book takes a more critical look at the literature on community, community development and the politics of community and applies this critical approach to themes introduced in the first edition on economic development, learning, health and social care, housing and policing, taking into account the changes in policy that have taken place particularly in the UK since the first edition was written. It will be a valuable resource for researchers and students of social policy, sociology and politics as well as areas of housing and urban studies.

Alternative Work Organizations M. Atzeni, 2012-09-18. Current and historical examples in the labour movement worldwide have helped to debunk the myth that workers cannot run production. This volume uses geographically and historically diverse examples to analyse the challenges and questions that alternative forms of work present to those involved.

Social Movements David S. Meyer, Nancy Whittier, Belinda Robnett, 2002-06-27. Why do social movements take the forms they do? Why do activists take particular strategic paths and how do their strategies affect the course and impact of the movement? Social

Movements aims to bridge the gap between political opportunities theorists who look at the circumstances and effects of social movement efforts and collective identity theorists who focus on the reconstruction of meaning and identity through collective action The volume brings together scholars from a variety of perspectives to consider the intersections of opportunities and identities structures and cultures in social movements Representing a new generation of social movement theory the contributors build bridges between political opportunities and collective identity paradigms between analyses of movements internal dynamics and their external contexts between approaches that emphasize structure and those that emphasize culture They cover a wide range of case studies from both the U S and Western Europe as well as from less developed countries Movements include feminist organizing in the U S and India lesbian gay movements revolutionary movements in Burma the Philippines and Indonesia labor campaigns in England and South Africa civil rights movements community organizing political party organizing in Canada student movements of the left and right and the Religious Right Many chapters also pay explicit attention to the dynamics of gender race and class in social movements Combining a variety of perspectives on a wide range of topics the contributors synthetic approach shifts the field of social movements forward in important new directions

The Routledge Companion to Alternative Organization Martin Parker, George Cheney, Valérie Fournier, Chris Land, 2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields
