Self-Reference S.J. Bartlett, P. Suber, 2012-12-06 Self reference although a topic studied by some philosophers and known to a number of other disciplines has received comparatively little explicit attention For the most part the focus of studies of self reference has been on its logical and linguistic aspects with perhaps disproportionate emphasis placed on the reflexive paradoxes The eight volume Macmillan Encyclopedia of Philosophy for example does not contain a single entry in its index under self reference and in connection with reflexivity mentions only relations classes and sets Yet in this volume the introductory essay identifies some 75 varieties and occurrences of self reference in a wide range of disciplines and the bibliography contains more than 1 200 citations to English language works about reflexivity The contributed papers investigate a number of forms and applications of self reference and examine some of the challenges posed by its difficult temperament The editors hope that readers of this volume will gain a richer sense of the still largely unexplored frontiers of reflexivity and of the indispensability of reflexive concepts and methods to foundational inquiries in philosophy logic language and into the freedom personality and intelligence of persons

The Event of Death: a Phenomenological Enquiry I.

Leman-Stefanovic,2012-12-06 Building upon the preliminary conception of Phenomenology introduced by Heidegger in section II of the Introduction to *Sein und zeit* I one may say that a phenomenology of death would mean to let death as that which shows itself be seen from itself in the very way in which it shows itself from itself Does this mean then that a properly phenomenological description of death may reveal to us what death as a factual event is like in the very way in which it shows itself from itself Although I cannot experience my death in order to describe it may some kind of phenomenological inference or extrapolation² be the condition for a unique and privileged revelation of what it is like to be dead There is an important element of phenomenological description which renders such an extrapolation implausible and it involves what Husserl originally called the reduction to significance or meaning It can never be true for the phenomenologist 1 Heidegger Martin *Sein und zeit* p 34 e t page 58 2 Henry W Johnstone Jr thinks that while one cannot extrapolate from the experience of sleep to the experience of death it may be possible to extrapolate from the phenomenology of sleep to the phenomenology of death Cf H W Johnstone Jr *Toward a Phenomenology of Death in Philosophy and Phenomenological Research* Vol XXXV No 3 1975 pages 396-7 Cf
