Eye Guidance in Reading and Scene Perception G. Underwood, 1998-07-16 The distinguished contributors to this volume have been set the problem of describing how we know where to move our eyes There is a great deal of current interest in the use of eye movement recordings to investigate various mental processes The common theme is that variations in eye movements indicate variations in the processing of what is being perceived whether in reading driving or scene perception However a number of problems of interpretation are now emerging and this edited volume sets out to address these problems The book investigates controversies concerning the

variations in eye movements associated with reading ability concerning the extent to which text is used by the guidance mechanism while reading concerning the relationship between eye movements and the control of other body movements the relationship between what is inspected and what is perceived and concerning the role of visual control attention in the acquisition of complex perceptual motor skills in addition to the nature of the guidance mechanism itself The origins of the volume are in discussions held at a meeting of the European Society for Cognitive Psychology ESCOP that was held in Wurzburg in September 1996 The discussions concerned the landing effect in reading an effect that if substantiated would provide evidence of the use of parafoveal information in eye guidance and these discussions were explored in more detail at a small meeting in Chamonix in February 1997 Many of the contributors to this volume were present at the meeting but the arguments were not resolved in Chamonix either Other leaders in the field were invited to contribute to the discussion and this volume is the product The argument remains unresolved but the problem is certainly clearer

comprehension **Readers and Mythic Signs** Debra Modellmog,1993 Some literary scholars view myth criticism as passe an approach to literature that enjoyed a heyday in the 1950s and 1960s before being replaced by approaches that are considered to be more theoretically sophisticated and satisfying such as feminism new historicism and deconstruction Modellmog argues that there are many good reasons not to cast out myth criticism from the community of critical approaches Most obvious among them is that myth has attracted many writers of this century from James Joyce to Thomas Pynchon Virginia Woolf to Flannery O Connor Thomas Mann to Alain Robbe Grillet William Faulkner to Alberto Moravia and that to ignore myth is to dismiss an essential part of their work Modellmog suggests that by reconstruing the relationship between myth and literature we will find that mythic approaches are frequently not only necessary but also highly stimulating engaging readers in many varieties of questions quests and conclusions Publisher description
