Principles of Artificial Intelligence Nils J. Nilsson, 2014-06-28 A classic introduction to artificial intelligence intended to bridge the gap between theory and practice *Principles of Artificial Intelligence* describes fundamental AI ideas that underlie applications such as natural language processing automatic programming robotics machine vision automatic theorem proving and intelligent data retrieval Rather than focusing on the subject matter of the applications the book is organized around general computational concepts involving the kinds of data structures used the types of operations performed on the data structures and the properties of the control strategies used *Principles of Artificial Intelligence* evolved from the author's courses and seminars at Stanford University and University of Massachusetts Amherst and is suitable for text use in a senior or graduate AI course or for individual study

Search Methods in Artificial Intelligence Deepak Khemani, 2024 Artificial Intelligence as a subject has grabbed a lot of attention after getting a place in the All India Council for Technical Education's AICTE list of emerging areas It was included as an elective core subject in the undergraduate curriculum of the computer science program by many universities AI is evolving as a subject and now many colleges are offering separate undergraduate programs in AI In most universities the AI course is made up of AI algorithms machine learning and deep learning This book is written for readers interested in the algorithms and their usage involved in Artificial Intelligence AI There are several aspects important in the study of AI like natural language understanding knowledge representation machine learning image processing pattern recognition and so on However the text focusses categorically on cognitive computing including the areas like knowledge representation reasoning and search It focuses on theoretical analysis of search algorithms and their implementation and will be useful for both undergraduate and graduate courses offering a degree in AI or where AI is taught as a paper with a focus on search algorithms The coverage has evolved around the syllabus of the courses like probability and statistics theory of probability statistics and so on The learners taking this course usually struggle with the mathematical concepts and applications of theoretical concepts The author has tried to bridge this gap with the case based approach and computer oriented projects The MATLAB Python based exercises and the case study projects in the book will also provide hands on experience to the students The author has earnestly made an attempt at creating a path for experiential learning through his book which is a key takeaway from the Indian New Education Policy 2020

Methods and Applications of Artificial

Intelligence George A. Vouros, Themistoklis Panayiotopoulos, 2004-04-22 Artificial intelligence has attracted a renewed interest from distinguished scientists and has again raised new more realistic this time expectations for future advances regarding the development of theories models and techniques and the use of them in applications pervading many areas of our daily life The borders of human level intelligence are still very far away and possibly unknown Nevertheless recent scientific work inspires us to work even harder in our exploration of the unknown lands of intelligence This volume contains papers selected for presentation at the 3rd Hellenic Conference on Artificial Intelligence SETN 2004 the official meeting of the Hellenic Society for Artificial Intelligence EETN The first meeting was held in the University of Piraeus 1996 and the second in the Aristotle University of Thessaloniki AUTH 2002 SETN conferences play an important role in the dissemination of the innovative and high quality scientific results in artificial intelligence which are being produced mainly by Greek scientists in institutes all over the world However the most important effect of SETN conferences is that they provide the context in which people meet and get to know each other as well as a very good opportunity for students to get closer to the results of innovative artificial intelligence research
