Research Methods for Forensic Psychologists Sarah Brown, Emma Sleath, 2015-06-26 Research Methods for Forensic Psychologists is an accessible and comprehensive textbook that introduces students to the research process in forensic psychology. Adopting a problem based learning approach, this book offers a how to guide to the whole research process and empowers readers to develop their own programme of research from initial vague ideas to developing a research question to carrying out a methodologically rigorous research project to disseminating the findings. The text is centred on five case studies sufficiently different in nature to address the most common research methodologies. Each case study is linked with a specific research question that will be used to illustrate the research process throughout the rest of the book. Topics covered in the book include Design and Planning including a literature search, a discussion of different sorts of data, practical and feasibility issues, research ethics and developing a research proposal. Conducting research including the submission of ethics proposals and responding to feedback, collecting data and dealing with the problems and challenges of analysing data. Dissemination of findings, an overview of the different types of papers with examples listed and other methods of disseminating findings discussed such as conference presentations and the use of social media. Throughout, issues of common difficulty or confusion are highlighted and activities are provided for readers to consider and apply the information discussed further. Additional reading sections and summaries are also provided at the end of each chapter. This book is essential reading for advanced students in Forensic Psychology as well as trainees and practitioners within relevant forensic psychology organisations.

Programming Interviews Exposed John Mongan, Noah Suojanen, Kindler, Eric Giguère, 2018-03-28 Ace technical interviews with smart preparation. *Programming Interviews Exposed* is the programmer's ideal first choice for technical interview preparation. Updated to reflect changing techniques and trends, this new fourth edition provides insider guidance on the unique interview process that today's programmers face. Online coding contests are being used to screen candidate pools of thousands, take home projects have become commonplace and employers are even evaluating a candidate's public code repositories at GitHub and with competition becoming increasingly fierce, programmers need to shape themselves into the ideal candidate well in advance of the interview. This book doesn't just give you a collection of questions and answers; it walks you through the process of coming up with the solution so you learn the skills and techniques to shine on whatever problems you're given. This edition combines a thoroughly revised basis in classic questions involving fundamental data structures and algorithms with problems and step by step procedures for new topics including probability, data science, statistics and machine learning which will help you fully prepare for whatever comes your way. Learn what the interviewer needs to hear to move you forward in the process. Adopt an effective approach to phone screens with non technical recruiters. Examine common interview problems and tests with expert explanations. Be ready to demonstrate your skills verbally in contests on GitHub and more. Technical jobs require the skillset but you won't get hired unless you are able to effectively and efficiently demonstrate that skillset under pressure in competition with hundreds of others with the same
