Belle Baranceanu Jennifer Peoples Hernandez, 2023-01-20 In this first biography of artist Belle Goldschlager Baranceanu Jennifer Peoples Hernandez tells the extraordinary story of a woman who rose from humble beginnings to become the most important female muralist in San Diego during the Great Depression and a prominent California Modern artist Her meteoric rise in the art world began in Chicago in the 1920s but the onset of the Great Depression nearly ended her career Drawing from previously unpublished letters and archival records Hernandez skillfully weaves Baranceanu's resilient story into the larger history of the Depression and New Deal in Chicago and San Diego and highlights the success of the government's work relief programs For Baranceanu and others fortunate enough to work for the New Deal art projects the Depression turned out to be a golden age in American art history with a level of government patronage that has been unmatched ever since Art Deco Chicago Robert Brueggemann, 2018-10-02 An expansive take on American Art Deco that explores Chicago's pivotal role in developing the architecture graphic design and product design that came to define middle class style in the twentieth century Frank Lloyd Wright's lost Midway Gardens the iconic Sunbeam Mixmaster and Marshall Field's famed window displays despite the differences in scale and medium each belongs to the broad current of an Art Deco style that developed in Chicago in the first half of the twentieth century This ambitious overview of the city's architectural product industrial and graphic design between 1910 and 1950 offers a fresh perspective on a style that would come to represent the dominant mode of modernism for the American middle class Lavishly illustrated with 325 images the book narrates Art Deco's evolution in 101 key works carefully curated and chronologically organized to tell the story of not just a style but a set of sensibilities Critical essays from leading figures in the field discuss the ways in which Art Deco created an entire visual universe that extended to architecture advertising household objects clothing and even food design Through this comprehensive approach to one of the 20th century's most pervasive modes of expression in America Art Deco Chicago provides an essential overview of both this influential style and the metropolis that came to embody it *Alloys* Marin R. Sullivan, 2022-03-22 A new look at the interrelationship of architecture and sculpture during one of the richest periods of American modern design *Alloys* looks at a unique period of synergy and exchange in the postwar United States when sculpture profoundly shaped architecture and vice versa Leading architects such as Gordon Bunshaft and Eero Saarinen turned to sculptors including Harry Bertoia Alexander Calder Richard Lippold and Isamu Noguchi to produce site determined large scale sculptures tailored for their buildings highly visible and well traversed threshold spaces The parameters of these spaces atriums lobbies plazas and entryways led to various designs like sculptural walls ceilings and screens that not only embraced new industrial materials and processes but also demonstrated art's ability to merge with lived architectural spaces Marin Sullivan argues that these sculptural commissions represent an alternate history of midcentury American art Rather

than singular masterworks by lone geniuses some of the era's most notable spaces Philip Johnson's Four Seasons Restaurant in Mies van der Rohe's Seagram Building Max Abramovitz's Philharmonic Hall at Lincoln Center and Pietro Belluschi and Walter Gropius's Pan Am Building would be diminished without the collaborative efforts of architects and artists At the same time the artistic creations within these spaces could not exist anywhere else Sullivan shows that the principle of synergy provides an ideal framework to assess this pronounced relationship between sculpture and architecture She also explores the afterlives of these postwar commissions in the decades since their construction A fresh consideration of sculpture's relationship to architectural design and functionality following World War II Alloys highlights the affinities between the two fields and the ways their connections remain with us today

A Place in the Sun Thomas Brent Smith, 2016-01-20 Of the hundreds of foreign students who attended the Munich Art Academy between 1910 and 1915 Walter Ufer 1876 1936 and E Martin Hennings 1886 1956 returned to the United States to foster the development of a national art They ultimately established their reputations in the American Southwest The two German American artists shared much in common and both would gain membership in the celebrated Taos Society of Artists Featuring nearly 150 color plates and historical photographs A Place in the Sun is a long overdue tribute to the lives achievements and artistic legacy of these two important artists In tracing the lifelong friendship and intersecting careers of Ufer and Hennings the contributors to this volume explore the social and artistic implications of the artists German heritage and training Following their training in Munich both men hoped to build careers in the spirited art environment of Chicago Both were sponsored by wealthy businessmen many of German descent The support of these patrons allowed Ufer and Hennings to travel to the American Southwest where they like so many other talented artists fell under the spell of Taos and its picturesque scenery They also encountered the region's Native peoples and Hispanic culture that inspired many of their paintings Despite their mutual interests Ufer and Hennings were not identical by any means Each artist had a distinct artistic style and as the essays in this volume reveal the two men could not have had more different personalities or career trajectories Connoisseurs of southwestern art have long admired the masterworks of Ufer and Hennings By offering a rich sampling of their paintings alongside informative essays by noted art historians A Place in the Sun ensures that their significant contributions to American art will be long remembered A Place in the Sun is published in cooperation with the Denver Art Museum
