R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries *The English Novel at Mid-Century* Michael Gorra, 2016-07-27 So far as the young were concerned Orwell wrote of Britain in the years after the Great War the official beliefs were dissolving like sandcastles Most critical accounts of that postwar generation have been constrained by having to deal with the myth of the thirties Michael Gorra's innovation in this exciting study of the postwar generation's major novelists lies in seeing the

consequences of that dissolution in formal rather than political terms arguing that the novelist's difficulty in representing human character in what Wyndham Lewis called a shell shocked age is itself a sign of that loss of belief But while most studies of this generation end with the coming of World War 2 Gorra follows these novelists throughout their careers The result is a book that not only shows how the British novel's increasing consciousness of its own limitations stands as a mirror to the country's loss of power but also provides memorable portraits of four major twentieth century writers *The Search for E. T. Bell* Constance Reid,1993 This is a compelling account of this complicated difficult man **Reading Narrative**

Reading Graphic Novels Achim Hescher, 2016-02-22 Distinguishing the graphic novel from other types of comic books has presented problems due to the fuzziness of category boundaries Against the backdrop of prototype theory the author establishes the graphic novel as a genre whose core feature is complexity which again is defined by seven gradable subcategories 1 multilayered plot and narration 2 multireferential use of color 3 complex text image relation 4 meaning enhancing panel design and layout 5 structural performativity 6 references to texts media and 7 self referential and metafictional devices Regarding the subcategory of narration the existence of a narrator as known from classical narratology can no longer be assumed In addition conventional focalization cannot account for two crucial parameters of the comics image what is shown point of view including *mise en scene* and what is seen character perception On the basis of François Jost s concepts of ocularization and focalization this book presents an analytical framework for graphic novels beyond conventional narratology and finally discusses aspects of subjectivity a focal paradigm in the latest research It is intended for advanced students of literature scholars and comics experts
