Abstract

Objective: Early motherhood and its impact on mothers, children, families and communities is a prevalent health challenge in developing countries that needs to be urgently explored. The aim of this study was exploring the challenges encountered by Iranian adolescent mothers during the transition to motherhood.

Materials and methods: Inductive conventional content analysis approach was used in this qualitative study. Face to face in-depth semi-structured interviews were conducted with 16 Iranian teenage mothers in the Kerman province of Iran from March to December 2016. Data collection continued until the point of data saturation and MAXQDA software was utilized in the analysis of the data.

Results: Six main categories increasing burden of responsibility, experiencing physical problems, receiving insufficient support, inefficiency in maternal role, emotional and mental distress; and role conflict and 18 sub-categories were extracted from the data analysis.

Conclusion: The findings of this study showed that adolescent mothers experience many physical, psychological, mental and social challenges. Therefore, it is expedient that special attention and care support is made available to them by health care providers. A comprehensive understanding of the challenges encountered by adolescent mothers, will aid the development of culturally appropriate health promotion guidelines and strategies.

Introduction

Motherhood is a significantly important event in the life of a woman (1). Maternal role attainment is a process that requires acquire necessary abilities, learn appropriate behavior, and establish in maternal identity (2). Preparation to accept the maternal role

has important effects on maternal adjustment and transition to adulthood (3). However, increasing number of teenage mothers is one of the important concerns in many countries (4). According to the World Health Organization, every year, approximately 16 million teenage girls give birth worldwide while South Korea has minimum rate and maximum rate is in sub-Saharan Africa (5). Among 1,000 Iranian adolescent girls, 27 become mothers (6).

Early motherhood has significantly affected not only adolescent girls, but also their spouse, family,

The Future of Motherhood in Western Societies Gijs Beets, Joop Schippers, Egbert R. te Velde, 2010-12-06 Most people value to have children still highly But what is the optimal moment to have the first The decision on having children or not and if yes on the timing of the first is one of the most difficult ones to make also because it more or less coincides with various other heavy decisions on shaping the life course like on union formation labour market career housing accommodation etc People realise that having children will fundamentally change their life and in order to fit this unknown and irreversible adventure perfectly into their life course postponement of the first birth is an easy way out as long as doubts continue and partners try to make up their mind Modern methods of birth control are of course a very effective help in that period What is the best moment to have the first child And to what moment is postponement justified There are no easy answers to these questions Best solutions vary per person as they depend on personal circumstances and considerations the partner may have conflicting ideas housing accommodation job income free time activities Existing parental leave and child care arrangements are weighted as well Unfortunately the biological clock ticks further And also unfortunately assisted reproductive technology IVF etc is unable to guarantee a successful outcome Several couples end up without children involuntarily and that may lead to sorrow and grief This interdisciplinary book overviews the process of postponement and its backgrounds in modern Western societies holistically both at the personal and the societal level Contributions come from reproductive evolutionary biological and neurological sciences as well as from

demography economy sociology and psychology It holds not only at women but also at men becoming first time fathers The discussion boils down to a new policy approach for motherhood and emancipation on how to shape work and family life It is argued that a public window where one can compose a cafeteria like set of supportive arrangements according to personal preferences could lead to a break in the rising age at first motherhood **Healing Garden Journal** ,2004 Serves as a resource for people in their discovery and celebration of total well being body mind and spirit The journal builds community promotes environmental and social awareness and advocates wellness through natural foods nutrition fitness and complementary health care Committed to promoting conscious choices that lead to a higher quality of life and a greater experience of personal and global harmony Mothers, Infants and Young Children of September 11, 2001 Beatrice Beebe,Phyllis Cohen,K. Mark Sossin,Sara Markese,2013-09-13 The group of papers presented in this volume represents ten years of involvement of a group of eight core therapists working originally with approximately forty families who suffered the loss of husbands and fathers on September 11 2001 The project focuses on the families of women who were pregnant and widowed in the disaster or of women who were widowed with an infant born in the previous year This book maps the support and services provided without cost to the families by the primary prevention project the September 11 2001 Mothers Infants and Young Children Project organised by a highly trained group of therapists specialising in adult child mother infant and family treatment as well as in nonverbal communication The demands of the crisis led these therapists to expand on their psychoanalytic training fostering new approaches to meeting the needs of these families They sought out these families offering support groups for mothers and their infants and young children in the mothers own neighbourhoods They also brought the families to mother child videotaped play sessions at the New York State Psychiatric Institute at Columbia University followed by video feedback and consultation sessions In 2011 marking the 10th anniversary of the World Trade Center tragedy the Project continues to provide services without cost for these mothers who lost their husbands for their infants who are now approximately ten years old and for the siblings of these children This book was originally published as a special issue of the Journal of Infant Child and Adolescent Psychotherapy *Childbearing and the Changing Nature of Parenthood* Rosalina Pisco Costa,Sampson Lee Blair,2019-11-25 Around the globe the very conceptualization of family is associated with the relationship between a parent and a child The birth of a child represents both the end of one experience and the beginning of another **Modern Motherhood and Women's Dual Identities** Petra Bueskens,2018-05-31 Why do women in contemporary western societies experience contradiction between their autonomous and maternal selves What are the origins of this contradiction and the associated double shift that result in widespread calls to either lean in or opt out How are some mothers subverting these contradictions and finding meaningful ways of reconciling their autonomous and maternal selves In *Modern Motherhood and Women's Dual Identities* Petra Bueskens argues that western modernisation consigned women to the home and released them from it in historically unprecedented yet interconnected ways Her ground

breaking formulation is that western women are free as individuals and constrained as mothers with the twist that it is the former that produces the latter Bueskens theoretical contribution consists of the identification and analysis of modern women's duality drawing on political philosophy feminist theory and sociology tracking the changing nature of discourses of women freedom and motherhood across three centuries While the current literature points to the pervasiveness of contradiction and double shifts for mothers very little attention has been paid to how some women are subverting contradiction and rewriting the sexual contract Bridging this gap Bueskens interviews ten revolving mothers to reveal how periodic absence exceeding the standard work day disrupts the default position assigned to mothers in the home and in turn disrupts the gendered dynamics of household work A provocative and original work *Modern Motherhood and Women's Dual Identities* will appeal to graduate students and researchers interested in fields such as Women and Gender Studies Sociology of Motherhood and Social and Political Theory *A Guide to Mastery in Clinical Nursing* Joyce J. daughters progressing in their own careers It finds that mothers with careers whilst highly influential in their daughters choice of career path rarely mentor their daughters as they progress This is partly explained by quiet ambition the tendency of women to be modest about their achievements Bigger issues are the twin pressures from contemporary motherhood and workplace culture that ironically lead career women s daughters to believe that being a good mother means working part time This stalls career progress Based on a large cross generational qualitative sample this book offers a timely and original perspective on the debate about gender equality in leadership positions **Milk Art Journal, Vol. 2** Katherine Oktober Matthews,2023-06-20 Milk is a limited series art journal of written and visual artworks by artist mothers about motherhood Volume 2 is themed Body poetry by Christa Fairbrother Faith Paulsen Marin Smith and J Hope Stein and interviews with Chelsea Conaboy and Cassie Arnold The cover features a photograph by Jocelyn Allen **Counseling Fathers , The New Midwifery** Lesley Ann Page,Rona McCandlish,2006-10-06 The eBook version of this title gives you access to the complete book content electronically Evolve eBooks allows you to quickly search the entire book make notes add highlights and study more efficiently Buying other Evolve eBooks titles makes your learning experience even better all of the eBooks will work together on your electronic bookshelf so that you can search across your entire library of Midwifery eBooks Please note that this version is the eBook only and does not include the printed textbook Alternatively you can buy the Text and Evolve eBooks Package which gives you the printed book plus the eBook Please scroll down to our Related Titles section to find this title I still have the confidence of that whole period And I think that will stay with me for the rest of my life Definitely a great sense of triumph really It s incredible Being a midwife today requires not only good clinical skills but also a broad understanding of the social and emotional changes a woman goes through before and after birth The New Midwifery Second Edition looks at combining scientific knowledge with the more intangible skills needed in sensitive communication to provide the best possible care for the mother and her family There was a kind of silence in the relationship a stillness which was very important And we d done all the talking in the build up So the talking was done I felt confident that she the midwife knew where I was coming from and vice versa It was like we d done all our dress rehearsal what if what if And on the day there was nothing left to say really So it just felt very calm and I think that was the most important thing The second edition of this celebrated text explores vividly the various skills and approaches that lead to successful midwifery practice and uses care stories to bring these to life Building on a thorough grounding of theory and research evidence The New Midwifery will enable all midwives to practise with a more effective range of skills and as these real life quotes from mothers bear out provide unique professional support before during and after birth I think we had a really good relationship actually It was more of a friend relationship but a friend you could trust in a professional friend you could rely on Provides a refreshingly new approach to key areas of midwifery practice in a way that brings practice to life Illustrates and supports the fundamental changes currently taking place in midwifery around the world Builds on the most up to date evidence based research to
