Eileen Claussen,Vicki Arroyo Cochran,Debra P. Davis,2001-01-01 It is the greatest environmental challenge of the 21st
Century But what do we truly know about global climate change And what can we do about it Most of the world s top
scientists agree that emissions of carbon dioxide and other greenhouse gases from human activities such as industrial
processes fossil fuel combustion and land use changes are causing the earth to get warmer Impacts of this warming may
include damage to our coastal areas accelerated rates of species loss altered agricultural patterns and increased incidences
of infectious diseases The effects of climate change and efforts to mitigate climate change could also have substantial
economic ramifications The book presents the latest research and analysis from prominent scientists economists academics
and policy makers including Tom Wigley and Joel Smith who along with other authors of the Science and Impacts chapter
explain the basic science of climate change the growing evidence that human activities are changing our climate and the
impacts of these changes Eileen Claussen John Gummer Henry Lee and other authors of the Global Strategies chapter who
describe what nations are or are not doing to address climate change and the state of international climate talks Robert
Stavins John Weyant Ev Ehrlich and other economists who explain why economic analyses of climate policy are conducted
why the projected costs of addressing climate change vary so widely among economic models and how changes driven by
today s economy can influence climate policy Gov Jean Shaheen and other authors of the Innovative Solutions chapter who
describe what state and local governments in theUnited States and multinational companies are doing to monitor and curb
greenhouse gas emissions and Forest Reinhardt who offers business leaders advice on steering their companies on a path
that is healthy for business as well as the global climate This publication has also been published in paperback please click
