

Michael Faraday, *Ludlow 1085-1660: A Social, Economic and Political History*. Chichester: Phillimore, 1991. xii + 257pp. 54 plates and figures. £20.00.

Small towns are the subject of considerable current interest. Ludlow, a planned town of the twelfth century, which seems never to have grown to more than some 2,600 persons over the entire period covered by this study, would seem to provide excellent material for a case study. Certainly Faraday has employed an impressive array of primary sources from both the borough archives and from central government records. The result, however, is mixed for this is a rather old-fashioned study, full of detail, strong on local families, clearly aimed at a local readership, but somewhat patchy in construction and disappointing in terms of reference to comparative studies and a wider literature. That is not, however, to say that there is nothing of interest here. Indeed, the chapters on the government of the town, the Palmers' Guild, and on population are of real value.

The choice of period permits the traditional medieval/early modern divide to be bridged, but much of the discussion relates to the fifteenth century and after. At times the use of material drawn from a variety of sources over many years masks any sense of secular change, but individual chapters are often divided into shorter chronological sections. Disappointingly the author has almost nothing to say about the plantation of Ludlow by the de Lacy family, but the discussion of the growth of civic government is more substantial. Faraday produces convincing evidence that Ludlow was a borough some decades before 1300, the date noted by Beresford and Finberg. He also shows that royal charters often legitimated what was already *de facto* the case and from 1461 he is able to illuminate the *cursus honorum* within the narrow ruling oligarchy in some detail. Also of value is the discussion of the Palmers' Guild itself effectively absorbed by the corporation at its dissolution in 1551. This seems to have been founded following the sixth crusade, but in time attracted a membership well beyond the town. It provided a school and came to control an alms-house. Interestingly from the later fifteenth century men became wardens of the Guild only after they had held the senior civic office of high bailiff.

The chapter on the economy focuses on the trades in wool and cloth, but acknowledges that the leather industry was also of importance. Other trades are only noted *en passant* and the role of women within the economy goes unexplored, despite the observation that by the eve of the Civil War women conspicuously outnumbered men. The poor are noted briefly in a chapter on the people of Ludlow. More substantial is the penultimate chapter on population, especially for the earlier seventeenth century, though reference to the work of Brodsky and Souden would have informed the analysis. The discussion of the taxes of 1641 and 1667 is of particular interest. The final chapter concerns the Civil War and the Siege of Ludlow. It says something of the period that one absentee landlord found that his tulips had been dug up and onions planted in their place.

Two general, but related, problems detract from the work. The first is that although all references are scrupulously acknowledged, there is no discussion of the range of sources used. Here the lack of a proper bibliography is frustrating. The substantial list of abbreviations (inexplicably incomplete) helps a little, but it could have been more detailed. Neither this nor the text allows a full picture of what kinds of sources survive nor how complete are those that do survive. Thus it is not until page 152 that we learn that only fifty Ludlow wills survive for the entire period 1300-1500, but much prior discussion of pious patronage is dependent upon an

standard view that England emerged as a dominant power and Wales faded into obscurity after Edward I's conquest in 1282 this book considers how Welsh and British history became an enduringly potent instrument of political power in the late Middle Ages Brought into the broader stream of political consciousness by major baronial families from the March the borderlands between England and Wales this inventive history generated a new brand of literature interested in succession land rights and the origins of imperial power as imagined by Geoffrey of Monmouth These marcher families leveraged their ancestral political and ideological ties to Wales in order to strengthen their political power both regionally and nationally through the patronage of historical and genealogical texts that reimagined the Welsh past on their terms In doing so they brought ideas of Welsh history to a wider audience than previously recognized and came to have a profound effect on late medieval thought about empire monarchy and succession

Wales and the Crusades Kathryn Hurlock,2011-10-15 This original study focussing on

the impact of the crusading movement in medieval Wales considers both the enthusiasm of the Welsh and those living in Wales and its borders for the crusades as well as the domestic impact of the movement on warfare literature politics and patronage The location of Wales on the periphery of mainstream Europe and its perceived status as religiously and culturally underdeveloped did not make it the most obvious candidate for crusading involvement but this study demonstrates that both native and settler took part in the crusades supported the military orders and wrote about events in the Holy Land Efforts were made to recruit the Welsh in 1188 suggesting contemporary appreciation for Welsh fighting skills even though crusaders from Wales have been overlooked in modern studies By looking at patterns of participation this study shows how domestic warfare influenced the desire and willingness to join the crusade and the effect of such absences on the properties of those who did go The difference between north and south Wales Marcher lord and native prince Flemish noble and minor landholder are considered to show how crusading affected a broad spread of society Finally the political role of crusading participation as a way to remove potential troublemakers and cement English control over Wales is considered as the close of the peak years of crusading coincided with the final conquest of Wales in 1282
