Veroniek Collewaert, Justin J.P. Jansen, 2025-07-15 This pioneering Handbook explores the nature of scaling and high growth. It identifies specific patterns and strategies and discusses important drivers and determinants of high growth presenting a state of the art overview of existing research and introducing crucial new insights into the field both for academics and scaleup entrepreneurs, advisors and ecosystem stakeholders. Managing Growth Gideon Nieman, Marius Pretorius, 2004 The problems inherent in the business venture life cycle are discussed theoretically and applied to case studies in this business guide for entrepreneurs and small business owners on growth and management strategies for business start ups.

Strategic Entrepreneurial Finance Darek Klonowski, 2014-11-27 Entrepreneurial finance is a discipline that studies financial resource mobilization, resource allocation, risk moderation, optimization in financial contracting, value creation and value monetization within the context of entrepreneurship. However, without proper strategic consideration, the discipline is incomplete. This book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision making. The most unique feature of the book is its focus on value creation. For entrepreneurs, value creation is not a one-off activity but rather a continuous cycle of incremental improvements across a wide range of business activities. Entrepreneurial value creation is described in four comprehensive stages: value creation, value measurement, value enhancement and value realization, referred to as the C-MER model. This book focuses on what creates value rather than merely presenting value creation in a straight accounting framework. At the same time, deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish. Vigorous strategic deliberations maximize the entrepreneurial firm's chances of making the right business decisions for the future, enable the firm to manage its available financial and non-financial resources in the most optimal manner, ensure that the necessary capital is secured to progress the development of the firm to its desired development level and build value. While financial considerations are important, the field of strategic entrepreneurial finance represents a fusion of three disciplines: strategic management, financial management and entrepreneurship. This orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different perspectives which may better encapsulate actual entrepreneurial practices. Resourcing the Start-up Business Oswald Jones, Allan Macpherson, Dilani Jayawarna, 2022-10-31

Drawing on the most up to date and relevant research, this concise textbook is an accessible guide to harnessing the appropriate resources when launching a new start-up business. The focus is on the wide range of tangible and intangible resources available to entrepreneurs in the early stages of a new venture. This second edition brings in material on crowdfunding, digitalization and Covid-19 and dedicates new chapters to lean start-ups and business models, idea generation and opportunity development and business incubators and accelerators. The book supports students with learning objectives, a summary, discussion questions and a practical call to action in each chapter. A teaching guide and slides are also available.

for instructors Resourcing the Start up Business will be a valuable textbook for students of entrepreneurship and new venture creation globally

and innovation *Earnings quality and earnings management* Sanjay Wikash Bissessur,2005 *The Entrepreneur's Guide to Managing Growth and Handling Crises* Theo J. van Dijk,2007-12-30

Everyone knows the typical entrepreneurial success story A couple of entrepreneurs have a great idea work their tails off to establish the business and before long they re set for life Right Hardly Turnaround artist Theo van Dijk knows two things First young businesses that have survived the start up years will face periods of stagnation Second every venture at some point reaches a complacent plateau owners take their eyes off the ball and wham a crisis charges through the door Entrepreneurs can avoid that fate by watching for signs of trouble and taking the action steps van Dijk outlines And it s worth the effort because troubles and crises all have a silver lining they position the company for greater long term growth Entrepreneurs predictably become overconfident just when they think they have it made A crisis of leadership and or direction then occurs and it usually has to do with mismanaged growth Suddenly the company can t fill orders or customers complain about service and delivery Or family bickering slows momentum just when the company is poised to take off Theo van Dijk has seen it all and he knows what the real problem is During the start up years everyone is focused on creating a product and building a list of customers Informality and flexibility are the rule But at some point what used to work no longer does Survival is once again at stake and the odds are once again very much against the survivors of the early entrepreneurial phase It s right at this point van Dijk argues that the structure of the organization needs to become more formal and built to last He shows many ways companies in crisis can overcome challenges by changing the way they handle customers putting new processes and procedures in place and managing employees in a more professional manner This work is painful but it s necessary if the company is to survive trouble and set a course for long term growth Handbook of Research on Family Business Panikkos Poutziouris,Kosmas Smyrnios,Sabine Klein,2008-01-01 this Handbook is a good example for those interested in giving a more articulated and solid flavour to their research Andrea Colli Business History The authors have taken a lot of pain in putting this Handbook together As the name indicates this is an excellent Handbook for researchers Global Business Review The Handbook of Research on Family Business has collected and synthesized a broad variety of topics by notable researchers who share a common dedication to family business research This Handbook provides a comprehensive treatment that advances the frontiers of knowledge in family business provoking valuable thoughts and discussion The Handbook serves as both an authoritative and comprehensive reference work for researchers investigating family enterprises A Bakr Ibrahim Concordia University Montreal Canada Although family business research is a young discipline it is both necessary and important For the wellbeing and future development of our society the survival of prosperous and passionate family business entrepreneurs is indispensable In order to help the families in business to better understand how to succeed with their enterprises we need qualified and updated research This book is the answer Hans Jacob Bonnier Bonnier Business Press Group Sweden and 6th Generation Chairman of the Family Business Network International This Handbook is a unique compilation of the most

important and the best recent family business research The field has grown so rapidly that this effort will be a mark for the research to follow The Handbook of Research on Family Business will be the reference for scholars in family business for many years to come It will also stimulate new ideas in research John L Ward IMD Switzerland and Northwestern University US The Handbook of Research on Family Business provides a comprehensive first port of call for those wishing to survey progress in the theory and practice of family business research In response to the extensive growth of family business as a topic of academic inquiry the principal objective of the Handbook is to provide an authoritative and scholarly overview of current thinking in this multidisciplinary field The contributors examine recent advances in the study of family business which has undertaken significant strides in terms of theory building empirical rigour development of sophisticated survey instruments systematic measurement of family business activity use of alternative research methodologies and deployment of robust tools of analysis A wide selection of empirical studies addressing the current family business research agenda are presented and issues and topics explored include validation of the protagonist role that family firms play in social economic spheres operational and definitional issues surrounding what constitutes a family business historical development of the field of family business methodologies encompassing micro and macro perspectives challenges to the orthodox microeconomic view of homo economicus firms by highlighting the virtues of family influence and social capital Comprising contributions from leading researchers credited with shaping the family business agenda this Handbook will prove an invaluable reference tool for students researchers academics and practitioners involved with the family business arena
