The manual will be useful to the following categories of the people in the mining complexes in the Country and Abroad: Mine planners in planning and designing of the mining activities and integration of environmental management measures in the mining methods; Mine operators in implementing the environmental management measures; monitoring and compliance of legislation; Regulatory agencies and their executives in developing a better understanding of the mining environment related aspects and implementing the legislation; Research workers in planning, designing and undertaking research and development activities; Educationists in imparting the knowledge and know how to the participants in various academic and human resource development programs; The Non Governmental Organizations (NGOs) in developing a better understanding of the mining environment and assisting the mineral industry in effective implementation of the environmental management efforts; The people in the mining complexes in developing the understanding of various aspects of the management of mining environment. In addition, the Manual will be an important addition to the knowledge base in the libraries of all the institutions and organizations associated with mining and environmental management. The user is advised to read the Manual carefully and understand the various topics discussed and then use their own wisdom and the suggestions made in the Manual in design, planning, implementation and monitoring of the mining activities. The legislative aspect of mining environmental management is dynamic and time to time changes are made in the Acts, Rules and Regulations by the Central and State Governments. The user is therefore advised to get abreast with the latest developments through the web sites of the MOEF and the Central and State Pollution Control Boards and other regulatory agencies e.g. DGMS, IBM etc.

*ENVIRONMENTAL LAW* DHARMENDRA S. SENGAR, 2007-01-21

Today more than ever before there is considerable concern about the deterioration of the environment arising from environmental pollution: water, air, noise, radiation and others. For such pollution has a huge adverse impact on human health and the hazards it poses are too numerous. There is also a felt need for environmental protection and management and effective implementation of environmental laws. This comprehensive book authored by Prof. Sengar, an eminent academic with his wealth of experience in various areas of environmental law and management, brings these issues into sharp focus. The book highlights problems such as public health and safety, right to carry on trade, vis-à-vis duty to protect environment, right to information about hazardous installations, right to clean environment and ecological balance for sustainable development. It stresses the need for striking a balancer between environment and development to bring about sustainable development.

Finally the text shows how important it is to formulate a legal framework for environmental protection

**KEY FEATURES** While giving a broad conceptual overview of environmental law the text explains the major environmental laws examines the relevant provisions and traces the origin of constitutional support to environmental protection Refers to all leading cases on environmental law and highlights the role of judiciary on entertaining as well as restraining public interest litigations PILs to stop environmental violations Provides Appendices containing various environmental laws The accompanying CD ROM contains text of all relevant environmental laws both general and specific to help readers have access to those laws instantly Primarily intended as a text for students of law LL B BA LL B LL M MBL and management MBA the book should also prove to be an excellent reference for academics lawyers judges environmental activists environmental managers and corporates concerned with environmental protection
