Managing Historic Sites And Buildings Balancing Presentation And Preservation:

Managing Historic Sites and Buildings David Baker, Gill Chitty, 2013-02-01 Managing Historic Sites and Buildings looks at the choices and the tensions that exist in conservation and interpretation of the heritage Preservation and presentation are central activities arguably means and ends in the conservation of the historic environment But are they self reinforcing or do they work against each other In a series of essays which span from prehistoric sacred site to Second World war military remains from medieval monastery to 1970s housing estate we look at contemporary concerns and debates about the way the past is shaped physically and metaphorically by these two aspects of heritage management Starting from the position that the fundamental purpose of the whole process is to communicate understanding about the human past these essays examine how far the ideologies strategies tactics and techniques of preservation and presentation are mutually supportive the success of integrated approaches that are inclusive of social economic and green environmental concerns is understood but the value of developing truly sustainable management for individual historic places is only just becoming evident At the heart of such an approach lies a crucial relationship between the activity of preserving historic places and of promoting understanding of their significance
