Managing Organizations In Developing Countries An Integrative Approach:

Managing Organizations for Sustainable Development in Emerging Countries Angappa Gunasekaran, Charbel José Chiappetta Jabbour, Ana Beatriz Lopes de Sousa Jabbour, 2017-10-02 Managing Organizations for Sustainable Development in Emerging Countries focuses on the main challenges and opportunities of managing firms and emerging economies in the light of sustainable development One of the key questions of sustainable development is how organizations from developing countries are achieving their economic goals while considering simultaneously environmental issues like conservation of natural resources eco efficiency biodiversity conservation and climate change mitigation These questions are relevant for government industry and urban sustainability However in the modern literature that discusses organizational management for sustainable development few studies focus on the reality of organizations from emerging countries Moreover changing environmental legislation in emerging countries such as China and Brazil will affect organizational managers In this context this book may contribute to organizational management in the search for more sustainable organizations as well as deal with the challenges of managing organizations in the context of increased social problems degradation of natural resources loss of biodiversity and climate change This book was published as a special issue of the International Journal of Sustainable Development World Ecology *Routledge Handbook of Organizational Change in Africa* Franca Ovadje, Samuel Aryee, 2018-08-06 Although change management and therefore effective adaptation to environmental complexity is considered a uniquely human cultural activity the extensive change management literature is largely based on the experiences of organizations in the advanced economies of the West As the economies of African countries become increasingly open African organizations will need to be agile in order to adapt and grow in a dynamic global environment Currently there is a dearth of contextualized knowledge on change management within Africa but this handbook aims to address this by bringing together a wide range of experts to explore organizational change and change management from an African context The handbook adopts a multidisciplinary historical philosophical processual and strategic perspective as well as empirical accounts of change management It addresses such issues as What are the external and internal pressures for change What is the content and process of change management What are the essentials of effective change management How can change management be theorized from an African perspective What sort of leadership can best align with change management demands in an African context How do organizations build internal change management capability It is hoped that answers to these questions contained in the handbook will provide a contextualized understanding of change management which African organizations and scholars can leverage to respond to the threats and opportunities inherent in their increasingly dynamic environment The handbook should constitute an essential reference for academics researchers and advanced students of change management development studies and African studies as well as practitioners
