Water Resources in the Built Environment Colin A. Booth, Susanne M. Charlesworth, 2014-03-31 Water management is a key environmental issue in controlling of floods and reducing droughts This book provides analysis of the main issues offering solutions and describing good practice Water Resources for the Built Environment management issues and solutions develops an appreciation of the diverse complex and current themes of the water resources debate across the built environment urban development and management continuum The integration of physical and environmental sciences combined with social economic and political sciences provide a unique resource useful

to policy experts scientists engineers and subject enthusiasts By taking an interdisciplinary approach water resources issues and impacts on the built environment are presented in the inventive and strategic setting of considering the constraints of delivering potable water to an ever demanding society who at the same time are increasingly aware of living in an urban landscape where excessive surface water creates a flood threatened environment hence the need to portray a balance between too little vs too much This unique approach to the water resources debate presents a multifaceted collection of chapters that address the contemporary concomitant issues of water shortage and urban flooding and proffers solutions specifically for the built environment The book is structured into three parts the first part Sections 2 3 and 4 addresses management issues and solutions to minimise water shortages and provide water security for society whilst the second part of the book Sections 5 and 6 addresses management issues and solutions to control excessive rainfall and minimise flooding impacts The third part Section 7 contextualises the issues of the earlier sections within international case studies from the developing world

The Politics of Water in Post-War Britain Glen O'Hara, 2017-05-10 This is the first book to cover the British people's late twentieth century engagement with water in all its domestic national and international forms and from bathing and household chores to controversies about maritime pollution The British Isles a relatively wet and rainy archipelago cannot in any way be said to be short of liquid resources Even so it was the site of highly contentious and revealing political controversies over the meaning and use of water after the Second World War A series of such issues divided political parties pressure groups government and voters and form the subject matter of this book problems as diverse as flood defence to river and beach cleanliness from the teaching of swimming to the installation of hot and cold running water in the home from international controls over maritime pollution and from the different housework duties of men and women to the British state's proposals to fluoridise the drinking water supply

Environmental Regulation Through Financial Organisations: Comparative Perspectives on the Industrialised Nations Benjamin Richardson, 2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental

governance **Town and Country Planning in the UK** J. B. Cullingworth, Vincent Nadin, 2002 This thirteenth edition has been completely revised to take into account all the changes that have occurred in British planning including the policies introduced by the Labour government devolution innovations and the European Union **Wolf and Stanley on Environmental Law** Susan Wolf, Neil Stanley, 2003-11-21 Wolf and Stanley on Environmental Law provides law students non law students and professionals such as Environmental Health Officers with detailed but accessible coverage of environmental law in England and Wales Drinking Water Supply and Agricultural Pollution G.J. Schrama, 2012-02-02 Agricultural pollution with nitrates and pesticides is one of the biggest threats to drinking water resources At many places regional and local water authorities together with the water supply industry are involved in preventive action aimed at farming practices Three national case studies Germany The Netherlands and the United Kingdom analyse these efforts within the context of problematical national agricultural policy and the need to implement EU directives on water quality Additional case studies cover the role of the European Union while the same problem in a different setting is analysed for the United States The central question of how national and European governments can reinforce the control capacity of the actors at the regional and local level is treated from the theoretical perspective of the policy network approach *Institutional Dynamics in Environmental Governance* Bas Arts, Pieter Leroy, 2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives **Managing Policy Change in Britain** William A. Maloney, Jeremy John Richardson, 1995 This book describes the historical development of the water industry through the 1980s privatisation controversy in England and Wales and the contentious hybrid reorganisation in Scotland to current environmental and social concerns **Dismantling Public Policy** Michael W. Bauer, 2012-12-13 Dismantling does not even merit a mention in most public policy textbooks Journal of Public Policy, 1998 **River Conservation and Management** Philip Boon, Paul Raven, 2012-02-10 This book is intended for those with an academic scientific and practical interest in river conservation and management It provides an overview of how changes in legislation policies institutional responsibilities science technology practical techniques and public perception have influenced how rivers have been managed over the past 20 years and the challenges that lie ahead during the next 20 years

The book is based on the international conference River Conservation and Management 20 Years On held at York Thirty one chapters with contributions from North and South America Europe Asia and Australasia provide a wide ranging perspective on this complex but profoundly important subject Following an introduction that chronicles the most important contextual changes the book is organized into four broad topics Catchment management ecosystem integrity and the threats to river ecosystems this covers progress on understanding and addressing the pressures affecting rivers many of which will be amplified by climate change and increasing human demands for water Methods and approaches illustrating some recent techniques that have been developed to assess condition and conservation status across different types of river Recovery and rehabilitation providing an insight into the principles practice public involvement and institutional networks that support and make improvements to modified river reaches Integrating nature conservation into wider river management demonstrating the importance of integrated planning involvement of local communities and the use of adaptive management in achieving multiple environmental and economic benefits along rivers used for different purposes The final chapter discusses the challenges faced in dealing with an uncertain future More than 1200 different references and numerous web site citations provide the reader with an invaluable source of knowledge on the subject area
