antecedents that have contributed to the decline of financial sources Here the major literature that investigates the causes and consequences of urban fiscal strain is reviewed In Part Two Reacting Toward Fiscal Stress the chapters deal specifically with different management techniques available to municipalities to cope with resource decline The strategic advantages and political ramifications of these approaches are discussed in detail These chapters also provide an inventory of response techniques for urban managers Part Three Retrenchment and the Urban Policy Process builds upon the garbage can model developed by March and Simon by proposing that the retrenchment process is haphazard and random The book concludes with some considerations of what happens to the urban policy process during periods of resource scarcity This book should appeal to anyone interested in public administration urban studies or political science **Managing Urban**
