Managing Creative People Gordon Torr, 2011-01-19 A clash between the ideology of growth and the growth of ideas between control and creativity between measurement and the immeasurable between predictability and the fickle muses of inspiration in engulfing our boardrooms In this scathing swipe at the institutionalised idiocy that is stifling creativity just at the time the world needs it most Gordon Torr draws from the leading lights of creativity research to demolish the myths that surround the generation of ideas in the modern organisation The curse of the brainstorm the commoditisation of creative talent the deskilling of the imagination the startling inadequacies of management theory these and the many other horrors of idea assassination that run rampant in creative sector companies are dissected and disembowelled in this hilarious expose of the drama that unfolds every time a new idea slides across the boardroom table This book sets out to address the black hole that surrounds the management of creative people debunking many myths of creativity and outlining a revolutionary approach to the pressing issue of creative productivity in the contemporary creative

sector company A handbook of tools techniques methods and practical ideas whose USP is a framework for thinking about efficient creative management how to extract value from creative time Gordon Torr presents a logical argument that puts in place the building blocks of the author s knowledge and experience towards the final architecture We need them as never before And we know that they re somehow different Yet the productive management of creative people is an almost totally neglected science I doubt if there s a single industry that wouldn t gain immediate advantage from Gordon Torr s scrupulous and enlightening detective work Jeremy Bullmore

Transcendent Leadership and the Evolution of Consciousness

Lisa Aldon,2005-03-03 Is there a process to provide the opportunity for people to connect in the essence of spiritual humanism to undertake great and difficult tasks provide holistic contexts from which we can create our future together and cause us to take charge of our own evolution as we transcend Could this be the true nature of leadership The purpose of this book is to suggest that leadership theories are inadequate unless they include transcendence as an essential element influencing human behavior It is believed that if transcendence is included in leadership theories an ebb and flow relationship will exist providing opportunities where introspection and reflection of one s role can cause individual transcendence to a higher level of consciousness while at the same time causing transforming change in the individual and the organization This book examines theories of the evolution of consciousness as the context for understanding transcendence Utilizing the elements of transcendence and consciousness as a foundation these concepts could help further not only the study but the practice of leadership as well

The Spirit of Project Management Judi Neal,Alan

Harpham,2017-03-02 Projects have always been essentially human endeavours Large modern projects are generally highly complex fraught with technical difficulties and supported by diverse often apparently conflicted stakeholders The spirituality that originally defined some of the great construction projects of the classical era surely has a role in project management today The Spirit of Project Management explains the context for spirituality in projects and explores how it can be used to create a larger sense of purpose and achievement to help encourage an esprit de corps amongst all those involved to act as a touchstone for ethical and sustainable decision making This is a very pragmatic book The first part includes an explanation and a variety of useful models for understanding the significance and value of spirituality in projects Judi Neal and Alan Harpham devote the second part of the book to help you integrate these ideas into your day to day management of projects Thus there are chapters on spirituality from the perspective of the individual the project team the project organization and even project management within a sustainable world framework Read this book use the ideas to help you articulate your projects engage and sustain your project team and your stakeholders and frame how you work in terms of your organisation society and the environment

Cultural Values in Strategy and Organization T. K. Das,2021-06-01

The field of strategy science has grown in both the diversity of issues it addresses and the increasingly interdisciplinary approaches it adopts in understanding the nature and significance of problems that are continuously emerging in the world of human endeavor These

newer kinds of challenges and opportunities arise in all forms of organizations encompassing private and public enterprises and with strategies that experiment with breaking the traditional molds and contours The field of strategy science is also perhaps inevitably being impacted by the proliferation of hybrid organizations such as strategic alliances the upsurge of approaches that go beyond the customary emphasis on competitiveness and profit making and the intermixing of time honored categories of activities such as business industry commerce trade government the professions and so on The blurring of the boundaries between various areas and types of human activities points to a need for academic research to address the consequential developments in strategic issues Hence research and thinking about the nature of issues to be tackled by strategy science should also cultivate requisite variety in issues recognized for research inquiry including the conceptual foundations of strategy and strategy making and the examination of the critical roles of strategy makers strategic thinking time and temporalities business and other goal choices diversity in organizing modes for strategy implementation and the complexities of managing strategy to name a few This book series on Research in Strategy Science aims to provide an outlet for ideas and issues that publications in the field do not provide either expressly or adequately especially as regards the comprehensive coverage deserved by certain emerging areas of interest The topics of the volumes in the series will keep in view this objective to expand the research areas and theoretical approaches routinely found in strategy science the better to permit expanded and expansive treatments of promising issues that may not sufficiently align with the usual research coverage of publications in the field Cultural Values in Strategy and Organization contains contributions by leading scholars on the role of cultural values in the field of strategy science research The 11 chapters in this volume cover the topics of ecological organizing and evolving cultural values corporate cultural responsibility cultural integration in mergers and acquisitions culture and paradoxical frames cultural values in the fair trade market national culture and legitimacy family businesses as values driven organizations cultural intelligence of executives building an alliance culture personal values of civil engineers and architects and cultural characteristics of Chilean and Brazilian workforces The chapters collectively present a wide ranging review of the noteworthy research perspectives on the role of cultural values in strategy and organization

Creating a Nonviolent Culture in a Modern Organization Miriam Baermann, 2021-12-21 Increasing violence amongst youth in society burn out as a widespread disease and scandals in companies are only some of the headlines which appear regularly in the news media Politics scarcely seems to have any success in fighting violence and injustice in society and in the world The thesis here suggests that people do not have to wait for a savior such as a politician but that everyone can contribute to a less violent more peaceful and just world It will be demonstrated that organizations have an enormous influence on society and this book deals with the possibilities which an organization has to contribute to a less violent culture By the term organization all forms of organized groups of people who come together for a certain purpose are meant for example schools clubs public social aids and others whilst we mainly concentrate on companies in our research The intention

is to focus particularly on the issues related to the theme of creating a nonviolent culture in the workplace In the first part on culture we deal with several questions regarding culture including such fundamental questions as What is organizational culture What are the dimensions of culture and is it possible to influence it and if yes how does it work In the second part we take a look at the terms violence and nonviolence and a survey of how these aspects occur in society and organizations is made The third part is the largest and deals with the qualities of leadership and with the organizational conditions which are necessary to create a nonviolent culture We hope it will become clearer to the reader that nonviolence is not a strategy or a formula to be used It can appear very different in different situations There are component elements which can promote it and there are certain principles that cannot be violated if one wishes to establish true nonviolence Nevertheless there is no one patent formula nor one exclusively correct way of creating a nonviolent culture It requires considerable creativity and endurance to create it and can take a variety of forms

Courageous Hope Leonard Doohan,2011 This book's focus on leadership and hope is very appropriate given today's climate of distrust that many find results in a sense of hopelessness in their current leaders Individuals and organizations are desperate for leaders of hope Many books on leadership point to the need for inner motivation but that inner motivation must be hope in new possibilities for a changed future It is hope that gives a meaningful expression to leadership and enables the leader to be creative in dealing with the present More than anything else it is a vision of hope that can excite and empower leaders to inspire others to strive for a common vision You can have faith in a vision but it is only hope that keeps you working for it for dedication to vision is only proved in hope Today's world and its many manifestations in organizational life are crying out for a new dedication to the vocation of leadership The greedy the abusers the power hungry the selfish will always be with us May there also always be those men and women who will give their lives to leadership in service for others and in dedication to a future for which we hope The aim of this book is to invite the reader to think about what he or she hopes for in leadership and how to be faithful to those hopes
