working environment were all found to be central to a climate of bullying and unfairness. Although the organisation was committed to the adoption of HRM best practice and initiatives geared towards promoting employees' well-being, employees still believed they were being bullied and treated unfairly. It was found that different perspectives on the psychological contract, fairness and bullying at work were highlighted by managerial and non-managerial employees. The author's conclusions contribute to a clearer understanding than hitherto of workers' voice in relation to work leader-member exchanges and well-being in the public sector and she offers a model depicting employees' understanding of what their quality of working life line manager's leadership and well-being should be that might be used by organisational leaders, researchers, policy makers, Human Resources managers and other practitioners and consultants to move towards a more holistic multidimensional well-being at work paradigm.
