**The Global Outlook for Government Debt Over the Next 25 Years** Joseph E. Gagnon, 2011-06-15 This study addresses a fundamentally new feature of the contemporary world economy the simultaneous buildup of very large public deficits and debt positions in virtually all of the advanced high income countries The recent global financial crisis sharply accelerated this fiscal deterioration but it was already well underway in some countries including the United States where demographic prospects had posed extremely worrisome trajectories for a number of years The book has three basic objectives First it projects the global fiscal outlook to 2035 Second it asks whether the combination of deficits and debt in a large number of countries at the same time produces an impact on the world economy that is qualitatively different from the more traditional emergence of such problems in one or a few countries in any given period Third it analyzes the effects of the fiscal prospects on key economic variables including global interest rates and growth rates The analysis finds that the current public debt profiles in most advanced economies will grow to dangerous and unsustainable levels over the next couple of decades unless major changes are made in projected spending and revenue levels The authors conclude that the United States and Japan in particular need to start planning now for significant future budget cuts to minimize the risk of a crisis Acting soon enables the adjustment to be phased in over an extended period which cushions the inevitable adjustment costs while avoiding the potentially enormous pressures that could be levied by markets if correction is delayed too long

time since then He compares the existing efforts with the more radical recommendations of the Meltzer Report and considers the implications of his analysis for the role of the IMF He then offers his own recommendations for further reform c Book News Inc

**Local Content Requirements** Gary Clyde Hufbauer,Jeffrey J Schott,Cathleen Cimino-Isaacs,2013-10-05 In the wake of the Great Recession of 2008 09 economists feared that protectionist policies might sweep the world economy echoing the wave of tariff escalations during the Great Depression of the 1930s To some surprise officials were more restrained and largely avoided traditional forms of protection tariffs and quotas As a result economists underestimated the incidence of new protectionism because policymakers increasingly turned to more opaque behind the border nontariff barriers NTBs Using a combination of statistical analysis and case studies the authors show that local content requirements LCRs a form of NTB have become increasingly popular How much was global trade actually reduced on account of LCRs A conservative estimate might be 93 billion Case studies featured cover the healthcare sector in Brazil wind turbines in Canada the automobile industry in China solar cells and modules in India oil and gas in Nigeria and Buy American restrictions on government procurement

*Responding To Financial Crisis* Changyong Rhee,Adam S Posen,2013-09-30 The Asian financial crisis of 1997 98 was devastating for the region but policymakers at least believed that they gained a great deal of knowledge on how to prevent mitigate and resolve crises in the future Fifteen years later the Asian developing countries escaped the worst effects of the global crisis of 2008 10 in part because they had learned the right lessons from their own experience In this important study the Asian Development Bank and Peterson Institute for International Economics join forces to illuminate the contrast between Asia s performance during the more recent crisis with its performance during its own crisis and the gap between what the US and EU leaders recommended to Asia then and what they have practiced on themselves since then The overriding lessons emerging from the essays in this volume are that countries need to prepare for crises as if they cannot be prevented make room for stabilization policies and deploy them rapidly when crises hit and address the need for self insurance globally if they can or regionally if they must

**China-Africa and an Economic Transformation** Arkebe Oqubay,Justin Yifu Lin,2019 This volume considers China Africa relations in the context of a global division of labour and power and through the history and experiences of both China and Africa It examines the core ideas of structural transformation productive investment and industrialization international trade infrastructure development and financing

The Globalization of International Law PaulSchiff Berman,2017-07-05 International law is no longer a sufficient rubric to describe the complexities of law in an era of globalization Accordingly this collection situates cross border norm development at the intersection of interdisciplinary scholarship on comparative law conflict of laws civil procedure cyberlaw legal pluralism and the cultural analysis of law as well as traditional international law It provides a broad range of seminal articles on transnational law making governmental and non governmental networks judicial influence and cooperation across borders the dialectical relationships among national international and non state legal norms and the possibilities of bottom up and

plural law making processes The introduction situates these articles within the framework of law and globalization and suggests four important ways in which such a framework enlarges the traditional focus of international law This book therefore provides a crucial reference for scholars and practitioners seeking to understand the varied processes of norm development in the emerging global legal order

*WTO Disciplines on Subsidies and Countervailing Measures* Dominic Coppens, 2014-05-22 A legal and normative analysis of WTO disciplines on industrial and agricultural subsidies and countervailing duties

**Industrial Policy in an Era of Globalization** Marcus Noland, Howard Pack, 2003 Globalization reigns supreme as a description of recent economic transformation and it carries many meanings In the policy realm the orthodox terms of engagement have been enshrined in the Washington consensus But disappointing results in Latin America and transitional economies plus the Asian financial crisis have shaken the faith in Washington and elsewhere One response has been to hark back to the more statist policies that the consensus marginalized In this regard Japan Korea and Taiwan are promoted as the poster nations that have derived great benefits from increasing integration with the international economy without surrendering national autonomy in the economic or cultural spheres effectively beating the West at its own game The fundamental questions addressed in this monograph are whether industrial policy was indeed a major source of growth in these three economies and if so can it be replicated under current institutional arrangements and if so is it worth replicating or would developing countries today be better off embracing the suitably refined orthodoxy

*Crimes and Punishments?: Retaliation under the WTO* Robert Z. Lawrence, 2003 One of the unique aspects of the WTO as an international organization is that it authorizes members to retaliate against violations by raising tariffs These authorizations have become increasingly common and increasingly controversial In this analysis of the retaliation system Robert Lawrence considers the guiding principles that govern responses to WTO violations examines how these principles are implemented in practice and considers options for reform
