Managing Risk In Developing Countries National Demands And Multinational Response:

Managing Risk in Developing Countries Barbara C. Samuels, 2014-07-14 In light of the increasing global competition among both multinational companies and national economies Barbara Samuels examines a source of economic tension that has broad social implications as multinational companies MNCs strive for cheaper labor and new markets less developed countries LDCs are becoming more concerned with extracting benefits from these companies to achieve their development objectives Samuels centers her study on the variables shaping the responses of MNCs to national demands while considering current debates on country risk global competitiveness and national industrial policy Advancing a micro view of the MNC and its host country in two case studies Samuels shows how an MNC subsidiary's integration with headquarters and its closeness with local government affect its management of risk and its ability to deal with LDC demands Here the author investigates the labor and investment policy changes brought about when various automotive subsidiaries interacted with national interest groups in Brazil and with the government in Mexico Both cases illustrate how the policy response of one subsidiary creates the dynamics for defensive policy changes of its competitors MNC managers and LDC policymakers can draw important conclusions Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The United Nations library on transnational corporations : [international business and the world economy]. 7. Governments and transnational corporations* Theodore H. Moran, 1993 *Ford and the Global Strategies of Multinationals* Maria Isabel Studer Noguez, 2003-08-27 Today the Multinational Enterprise MNE is seen as a leading agent in the process of globalization As they adopt global strategies MNEs are seen to be creating stronger deeper and more lasting links amongst countries thus shifting the balance of power inexorably in their favour to the detriment of the state This book interrogates this idea by undertaking a historical analysis of the global strategies of Ford Hybrid Factories in the United States Tetsuji Kawamura, 2011-07-07 This book assesses the transferability of Japanese style management and production systems to 81 factories in North America owned by Japanese companies All of the book's investigations are based on an original methodology hybridization analysis which quantifies the degree to which features of the Japanese system have been transplanted using an elaborate checklist and scoring system With its wealth of data it should serve as a handy reference volume to anyone interested in the issue of international management and the impact of globalization upon production models **Foreign Direct Investment and Development** Theodore Moran, 1998-12-01 Foreign direct investment FDI has grown dramatically and is now the largest and most stable source of private capital for developing countries and economies in transition accounting for nearly 50 percent of all those

flows Meanwhile the growing role of FDI in host countries has been accompanied by a change of attitude from critical wariness toward multinational corporations to sometimes uncritical enthusiasm about their role in the development process What are the most valuable benefits and opportunities that foreign firms have to offer What risks and dangers do they pose Beyond improving the micro and macroeconomic fundamentals in their own countries and building an investment friendly environment do authorities in host countries need a proactive rather than passive policy toward FDI In one of the most comprehensive studies on FDI in two decades Theodore Moran synthesizes evidence drawn from a wealth of case literature to assess policies toward FDI in developing countries and economies in transition His focus is on investment promotion domestic content mandates export performance requirements joint venture requirements and technology licensing mandates The study demonstrates that there is indeed a large energetic and vital role for host authorities to play in designing policies toward FDI but that the needed actions differ substantially from conventional wisdom on the topic Dr Moran offers a pathbreaking agenda for host governments aimed at maximizing the benefits they can obtain from FDI while minimizing the dangers and suggests how they might best pursue this agenda

The Politics of Labor in a Global Age Christopher Candland, Rudra Sil, 2001-09-20 The Politics of Labor in a Global Age is one of the first works to analyse and compare recent shifts in patterns of industrial relations across late industrializing and post socialist economies The volume features original and timely essays on labor relations at national local and workplace levels as economic and political actors cope with the similar challenges associated with economic adjustment measures and the impact of globalization The authors reveal that while globalization has threatened the position of organized labor and prompted business and state elites to accommodate greater labor market flexibility the legacies of past institutions remain evident in distinctive trends in labor politics within and across late industrializing and post socialist settings The comparisons suggest that globalization is best understood not as a source of convergence but as a set of common pressures that are mediated by specific historical inheritances that spur varied responses on the part of industrial relations actors and that facilitate quite diverse institutional outcomes

Walmart in the Global South Carolina Bank Muñoz,Bridget Kenny,Antonio Stecher,2018-05-02 As the largest private employer in the world Walmart dominates media and academic debate about the global expansion of transnational retail corporations and the working conditions in retail operations and across the supply chain Yet far from being a monolithic force conquering the world Walmart must confront

and adapt to diverse policies and practices pertaining to regulation economy history union organization preexisting labor cultures and civil society in every country into which it enters This transnational aspect of the Walmart story including the diversity and flexibility of its strategies and practices outside the United States is mostly unreported Walmart in the Global South presents empirical case studies of Walmart s labor practices and supply chain operations in a number of countries including Chile Brazil Argentina Nicaragua Mexico South Africa and Thailand It assesses the similarities and differences in Walmart s acceptance into varying national contexts which reveals when and how state regulation and politics have served to redirect company practice and to what effect Regulatory context state politics trade unions local cultures and global labor solidarity emerge as vectors with very different force around the world The volume s contributors show how and why foreign workers have successfully though not uniformly driven changes in Walmart s corporate culture This makes Walmart in the Global South a practical guide for organizations that promote social justice and engage in worker struggles including unions worker centers and other nonprofit entities
