Managing Strategically:

Public Health Leadership and Management Stuart A. Capper, Peter M. Ginter, Linda E. Swayne, 2002 Public Health leadership and Management offers students the opportunity to develop and practice the skills needed to make difficult public health decisions. It presents fifteen public health case studies that address a wide array of challenging and complex public health issues. These case studies attempt to vicariously place the reader into a position in which he or she is required to size up the situation and suggest some action for the organization. The first section of the book supplies the tools needed to research, analyze, and present cases orally; includes a helpful template that guides students through the process of thinking through and making decisions. The format has been enlarged and the interior of the book re-designed. The fourth edition treats both analytical and behavioural aspects of planning in depth. Strategic analysis is covered in particular detail with examples reporting proven and often original applications of these theories. Six major case studies have been added to illustrate the application of strategic management theory in practice and a chapter discusses the impact of new approaches to strategy. With comprehensive reference lists and a guide to research resources, this volume will prove invaluable to researchers and advanced students as well as to the practising manager.
