Managing Structural Deficit Reduction:

Managing Structural Deficit Reduction Organisation for Economic Co-operation and Development, 1996 On cover PUMA *Strategic Decisionmaking in Cabinet Government*, 1999-01-01 Collective cabinet decisionmaking provides the institutional mechanism by which many governments prioritize their policies and guard against unpredictable policy reversals Mansood Ahmed Vice President Poverty Reduction and Economic Management Network The World Bank The style and membership of cabinets vary in every country The heads of democratic governments form a cabinet for three principal reasons 1 The threat that the legislature will significantly amend the government's program as expressed in the budget proposals made by the executive 2 The threat of dismissal between elections 3 The risk that the executive will be seen by the public as having departed from a previous tradition of cabinet government and judged poorly as a result Strategic Decisionmaking in Cabinet Government shows that cabinet government is a rational response to these risks and sets out the institutional arrangements that make the cabinet a binding device This report recognizes the significance of the budget process for collective decisionmaking but moves beyond the simplistic assumption that tradeoffs in cabinet government can only be made by reallocating the budget It supports practical approaches for assessing the strength of cabinet decisionmaking arrangements and for identifying practical steps to improve the prospect that decisions will be collectively binding

Public Financial Management and Its Emerging Architecture Mr.M. Cangiano, Ms. Teresa R Curristine, Mr. Michel Lazare, 2013-04-05 The first two decades of the twenty first century have witnessed an influx of innovations and reforms in public financial management The current wave of reforms is markedly different from those in the past owing to the sheer number of innovations their widespread adoption and the sense that they add up to a fundamental change in the way governments manage public money This book takes stock of the most important innovations that have emerged over the past two decades

Public Management in Times of Austerity Eva Moll Sørensen, Hanne Foss Hansen, Mads Bøge Kristiansen, 2017-06-26 Since 2008 the world has experienced an enormous decrease of wealth By many measures the impact of the crisis was severe The fall in GDP the collapse of world trade the rise in unemployment and the credit slump reached bigger proportions than in any other crisis since World War II Although the economic figures seem to improve in some countries the crisis continues being a challenging issue and is said to be one of the most important problems governments face today The crisis has put public finances under ever increasing pressure and governments have responded through austerity measures such as new fiscal rules and budgeting procedures and cutbacks of public spending Public Management in Times of Austerity seeks to explore the austerity policies adopted by European governments and their consequences to public management It asks how governments have implemented new rules leading to more stringency in public budgeting and financial management and how they have cut back public expenditure These questions are examined comparatively through case studies in different parts of Europe and variations across countries are discussed and explained

Throughout the volume the consequences of the crisis and austerity policies for public management are discussed What is the relationship between crisis and decision making in the public sector and how does austerity affect public sector organisation As the previous crisis in the 1970s resulted in a major reform movement which was later referred to as New Public Management Public Management in Times of Austerity look to understand whether the current crisis also leads to a wave of public management reform and if so what is the content of this Handbook of Debt Management Gerald J.

Public Financial Management in the European Union Marta Postuła, 2022-04-19

This book reveals how to create efficient institutions and coordinate policy on a transnational scale to ensure that European Union integration can best meet social needs It offers a combined technocratic and humanist perspective on the discussion of public financial management The state as part of its public policy should seek to preserve our social and environmental values yet there are mounting imbalances in society which point to the growing role of the state in minimising them Under such circumstances it is worth reflecting on how new challenges could require updated more complex formulas to deal with crises in current times and for social and economic policy making by states and the European Union generally which would ensure their compatibility with the world financial markets The work offers an in depth and unique performance analysis of European Union institutions compared to the national entities of EU Member States It contributes to the ongoing debate on global public goods and the processes involved in managing their provision Further it discusses public finance management instruments indicating their historical evolution in practice and their effectiveness measured with the Human Development Index The author presents a proposal of how to manage global European and national public goods across three areas environmental protection transnational infrastructure projects and social policy The book analyses public financial management instruments used during the recent pandemic making a distinction between regular and emergency instruments and assessing their effectiveness in specific economic situations This will be of interest to researchers and students of economics and finance as well as decision makers and practitioners from governments international organisations and specific non governmental organisations concerned with issues of public finance management

Performance Budgeting Mr. Jack Diamond, 2003-02-01 This paper reviews the role of accounting in budget system reform from the perspective of emerging economies who wish to adopt the OECD s performance budgeting reforms While many OECD countries pursuing the reforms associated with the New Public Management have moved their accounting systems from a cash to an accrual basis this paper argues that given the costs involved such a move is perhaps only worthwhile in the context of adopting much wider public sector management reforms Moreover while recognizing that accrual accounting does support public expenditure management best practices it is also argued that many of the objectives of performance oriented budgeting can be attained by less than full accrual accounting and that unless certain preconditions are met it is safer for countries to remain with and improve their cash based accounting systems For those countries with sound enough cash based systems the paper describes a possible phased approach to the introduction of accruals as well as the parallel stages of adopting the new international GFSM 2001 reporting requirements
