Money and Gift at Work Davide Pellegrini, 2013-01-18T00:00:00+01:00 The frequent attempts by companies to promote intermediate and intercept individual conversations within digital communities are today opening up new ideological debate In this work our aim was to ascertain whether the new social game is actually providing wealth for players and examine any theoretical implications of the growing overlap between dialogue and sale between market and society or more simply between money and gift A review of recent literature is followed by discussion of logic and empirical evidence which leads into a focus on the convergence currently taking place between the roles of customer and citizen We develop a new theory of convergence and test it through a specially developed model of a co value chain The metrics of the Covalue Model are used to measure and clarify the roles of customers companies and communities The model is applied to a large number of recent case histories providing a topical focus on implications for management

Innovation and Employment Charles Edquist,Leif Hommen,Maureen D. McKelvey,2001-01-01 This book is an important addition to what can be broadly referred to as the national systems of innovation NSI approach The particular contribution of the book is in the examination of the employment effects of innovation something only indirectly considered hitherto It is a thorough integration of existing knowledge on the key employment implications of innovation Rachel Parker Labour and Industry This is a highly readable non technical book a highly clear and well argued book that should be useful for policymakers and higher education alike It brings together much of the most recent and useful literature in the area of innovation employment and related public policy It is an opportune addition to the existing documentation on the subject Journal of Economics Zeitschrift f r National konomie Which kinds of growth lead to increased employment and which do not This is one of the questions that this important volume attempts to answer The book explores the complex relationships between innovation growth and employment that are vital for both research into and policy for the creation of jobs Politicians claiming that more rapid growth would remedy unemployment do not usually specify what kind of growth is meant Is it for example economic GDP or productivity growth Growing concern over jobless growth requires both policymakers and researchers to make such distinctions and to clarify their employment implications The authors initially address their theoretical approach to and conceptualization of innovation and employment where the distinction between process and

product innovations and between high tech and low tech goods and services are central. They go on to address the relationship between innovation and employment using empirical material to analyse the effects that different kinds of innovations have upon job creation and destruction. Finally the volume summarizes the findings and addresses conclusions as well as policy implications. This book will be of great interest to those involved in research and policy in the fields of macroeconomics, economic growth and employment, industrial economics and innovation.

Services in Switzerland Peter Zweifel, 2012-12-06 by Rolf M. Jeker, Federal Office for Foreign Economic Affairs. Services have only quite recently become an important issue in foreign economic policy and particularly in international trade negotiations. Trade policy was traditionally perceived to deal almost exclusively with exports and imports of goods. The increasing importance of services both nationally and internationally is mainly due to the gains in agricultural and industrial productivity freeing resources for services activities and the progress in communication technology facilitating trade in invisibles. Notable examples of contractual and legal frameworks for services in international trade relations are the internal market program of the European Community extended by the Agreement on the European Economic Area (EEA) to EFTA countries, the multi-lateral Uruguay Round negotiations under the auspices of the GATT on a General Agreement on Trade in Services (GATS) and the North American Free Trade Agreement (NAFTA) signed by the United States, Canada and Mexico. This trend is of particular significance to Switzerland, a country where services contribute about 65% to the value added of the economy, a share which will probably still increase somewhat. Services also contribute to an important extent to the traditional surplus in the current account of the Swiss balance of payments. Switzerland clearly has comparative advantages in the field of services as is well demonstrated by its long and successful tradition in key services sectors like banking, insurance, tourism, consulting and engineering.

EBOOK: Managing Consultants Timothy Clark, 1995-11-16. Managers are increasingly being convinced from all sides that traditional structures, systems and cultures are no longer appropriate to today's competitive conditions and that organizations must change fundamentally. It is in the context of these pressures that managers feel it increasingly necessary to seek external support by turning to those who offer some solution to these dilemmas: the management consultants. This book argues that the initial selection of a management consultancy and the subsequent evaluation of the quality of service they deliver are inherently problematic. Two root causes are identified: the structure and dynamics of the management consultancy industry and the characteristics of the management consultancy service. Timothy Clark examines how these problems are overcome by revealing the foundations of a successful and long-term client-consultant relationship. In a departure from previous analyses of management consultancy, he argues that the key to understanding consultancy and its success is to appreciate that successful consultancy in its methods at least emphasizes the active management of the client-consultant relationship. At the

core of successful consultancy is the art of impression management A consultant seeks to create a reality which persuades the client that they have purchased a high quality service The work of consultants is analysed and understood in terms of the theatrical analogy or dramaturgical metaphor A consultancy intervention is therefore conceived of as a dramatic event This is illustrated with reference to two types of consultancy work executive search i e headhunting and the work of management gurus
