The Bioarchaeology of Mummies Kenneth C. Nystrom,2018-09-03 The modern manifestation of mummy studies began to take shape in the 1970s and has experienced significant growth during the last several decades largely due to biomedical interest in soft tissue pathology Although this points to a vibrant field there are indications that we need to take stock of where it is today and how it may develop in the future and this volume responds to those demands In many ways mummy studies and skeletal bioarchaeology are sister disciplines sharing data sources methodologies and practitioners Given these close connections this

book considers whether paradigmatic shifts that influenced the development of the latter also impacted the former Whilst there are many available books discussing mummy research most recent field wide reviews adopt a biomedical perspective to explore a particular mummy or collection of mummies The Bioarchaeology of Mummies is a unique attempt at a synthetic state of the field critical analysis which considers the field from an explicitly anthropological perspective This book is written for both skeletal bioarcheologists that may not be familiar with the scope of mummy research and mummy researchers from biomedical fields that may not be as acquainted with current research trends within bioarchaeology

**Unwrapping Ancient Egypt** Christina Riggs, 2014-04-10 First runner up for the British Kuwait Friendship Society Book Prize in Middle Eastern Studies 2015 In ancient Egypt wrapping sacred objects including mummified bodies in layers of cloth was a ritual that lay at the core of Egyptian society Yet in the modern world attention has focused instead on unwrapping all the careful arrangements of linen textiles the Egyptians had put in place This book breaks new ground by looking at the significance of textile wrappings in ancient Egypt and at how their unwrapping has shaped the way we think about the Egyptian past Wrapping mummified bodies and divine statues in linen reflected the cultural values attached to this textile with implications for understanding gender materiality and hierarchy in Egyptian society Unwrapping mummies and statues similarly reflects the values attached to Egyptian antiquities in the West where the colonial legacies of archaeology Egyptology and racial science still influence how Egypt appears in museums and the press From the tomb of Tutankhamun to the Arab Spring Unwrapping Ancient Egypt raises critical questions about the deep seated fascination with this culture and what that fascination says about our own

**Molecular and Structural Archaeology: Cosmetic and Therapeutic Chemicals** Georges Tsoucaris, Janusz Lipkowski, 2012-12-06 Recent progress in the analysis and structural characterisation of materials has an increasing impact on studies of archaeological specimens A need to embody such research into a new interdisciplinary field has appeared In this ARW we intended to bring together archaeologists and historians with physicists chemists crystallographers and pharmacists around the theme of structural information on complex archaeological materials Within this vast area the ARW has mainly focused on cosmetic therapeutic chemicals The objectives of this NATO ARW were twofold Delineating the contour of molecular and structural archaeology as an emerging interdisciplinary field based on structural analysis at the molecular level Examining novel methodologies to reconstruct the scenario of synthesis and transformation in the long term of compounds used in antiquity for health and beauty The strong interdisciplinarity of this meeting has been greatly favoured by the NATO ARW organisation allowing the mixing of different fields and disciplines with convergent general goals This Workshop has shown that the molecular and structural sensibility is a powerful tool towards the setting and often the solution of difficult archaeological and historical problems Ten different nationalities Europe Egypt USA were represented in the ARW and this mixing has contributed to the large range of subjects and archaeological contexts Thus a mutual interaction between Archaeology and Physical Sciences is expected The most obvious part is associated with extended use of any possible technique and method to get as much information about the archaeological samples as possible

*Phytochemical Resources for Medicine and Agriculture* H.N. Nigg, D. Seigler, 2013-06-29 This book was the result of a symposium held at the American Chemical Society meeting in Miami Beach Florida September 10-15 1989 The symposium was jointly sponsored by The Society for Economic Botany and the American Chemical Society Food and Natural Product sub division There were five speakers During the social sessions

mostly over drinks in a hotel room it became obvious that regardless of the discipline we were all speaking the same language. Yet prior to the symposium only a few of the participants knew one another. We decided to expand the symposium into a book. The book would help accomplish for others what we had discovered in ourselves. That is the field of Natural Products is broad but similar in techniques and approach, ancient but modern and has been and continues to be extremely valuable to humankind. We wanted the book to serve as an introductory text for courses and as a reference work for the future. We also determined to include the structure of every chemical in the chapter where it was mentioned so the reader would not have to find the structure somewhere else or to try and deduce the structure from the chemical name. Little did we know what an undertaking these goals would be or the time this would take.

Based on years of prestigious academic work, Professor Rosalie David cleverly presents every aspect of life in ancient Egypt through the lives of various characters, all based on mummies from the Manchester Museum, whom Professor Rosalie David has led the study of. Characters hail from all walks of life, including royalty, nobles, officials, craftsmen, and peasants, allowing us an insight into absolutely every aspect of everyday ritual and religious life in ancient Egypt. The book provides an overview of the many dynasties and kingdoms of ancient Egypt before beginning to tell the story of the lives of one family. All three seasons of inundation, planting and growing, and harvesting are covered, as well as all ritual and religious events, including birth and death.
