a secondary school in Hong Kong who are instructed to switch from teaching in Cantonese to Mandarin or lose their jobs. Apolitical and focusing on surviving and thriving in their professional environment, Wai and Ling each approach the challenge differently. Wai, awkward and unpopular, becomes obsessed with Mandarin learning. Ling, knowing how to please her superiors and colleagues, thinks she can tactfully dodge the Mandarin challenge by deploying her social savviness. Wai eventually crumples under the pressure and dies by suicide, leaving her colleague Ling to face seismic political and cultural change alone as she considers how far she will go to survive such a ruthlessly competitive work environment. Sharp, darkly humorous, and politically pointed, *Tongueless* presciently engages with important issues facing Hong Kong today during which so much of the city's uniqueness, especially its language, is at risk of being erased.

Language and National Identity in Asia Andrew Simpson, 2007. *Language and National Identity in Asia* is a comprehensive introduction to the role of language in the construction and development of nations and national identities in Asia. Leading scholars from all over the world investigate the role languages have played and now play in the formation of the national and social identity in countries throughout South East and Southeast Asia. They consider the relation of the regions' languages to national, ethnic, and cultural identity and examine the status of and interactions between majority, official, and minority languages. Illustrated with maps and accessibly written, this book will interest all those concerned to understand the dynamics of social change in some of the most important countries in the world. It will appeal to all those studying, researching, or teaching issues in Asian society, language, and politics from a comparative perspective.

The Tyranny of Writing Constanze Weth, Kasper Juffermans, 2018-01-25. This book examines the powerful role of writing in society. The invention of writing independently at various places and times in history always stood at the cradle of powerful civilizations. It is impossible to imagine modern life without writing. As individuals and social groups, we hold high expectations of its potential for societal and personal development. Globally, huge resources have been and are being invested in promoting literacy worldwide. So what could possibly be tyrannical about writing? The title is inspired by Ferdinand de Saussure's argument against writing as an object of linguistic research and what he called *la tyrannie de la lettre*. His critique denounced writing as an imperfect, distorted image of speech that obscures our view of language and its structure. The chapters of the book, written by experts in language and literacy studies, go beyond this and explore tyrannical aspects of writing in society through history and around the world, from Medieval Novgorod, the European Renaissance, and 19th-century France and Germany, over colonial Sudan, to postcolonial Sri Lanka and Senegal, and present-day Hong Kong and Central China, to the Netherlands and Spain. The metaphor of tyranny of writing serves as a heuristic for exploring ideologies of language and literacy in culture and society and tensions and contradictions between the written and the spoken word.

Multidisciplinary Perspectives on Multilingualism Simona Montanari, Suzanne Quay, 2019-10-08. Multilingualism is a typical aspect of everyday life for most of the world's population; it has existed since the beginning of humanity and among individuals of all

backgrounds Nonetheless it has often been treated as a variant of bilingualism or as a phenomenon unique to individual areas of study The purpose of this book is to review current knowledge about the acquisition use and loss of multiple languages using a multidisciplinary perspective highlighting the common themes and stimulating insights that can emerge when multilingualism is viewed from different but related areas of investigation The chapters focus on research evidence showing that multilingualism is a complex phenomenon that involves a myriad of linguistic and extra linguistic forces and that should be studied in its own right as evidence of human potential and capacity for language The book is primarily addressed to students and scholars interested in deepening their understanding of the different facets of multilingualism including the individual and societal circumstances that contribute to it the cognitive and neural mechanisms that make it possible and the dynamics involved in the acquisition use and loss of multiple languages
