Mandates and Empire Michael D Callahan,2008-04-10 Compares the impact of the League of Nations mandates system on British and French rule in African mandated territories **The Guardians** Susan Pedersen,2015 A sweeping global history of the League of Nations mandates system and the limits of imperial order **Political Thought and the Public Sphere in Tanzania** Emma Hunter,2015-04-27 This book is a study of the interplay of vernacular and global languages of politics during Africa s decolonization **The Oxford Handbook of European History, 1914-1945** Nicholas Doumanis,2016-05-05 The period spanning the two World Wars was unquestionably the most catastrophic in Europe s history Despite such undeniably progressive developments as the radical expansion of women s suffrage and rising health standards the era was dominated by political violence and chronic instability Its symbols were Verdun Guernica and Auschwitz By the end of this dark period tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized If the nineteenth century gave Europeans cause to regard the future with a sense of optimism the early twentieth century had them anticipating the destruction of civilization The fact that so many revolutions regime changes dictatorships mass killings and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis The Oxford Handbook of European History 1914 1945 reconsiders the most significant features of this calamitous age from a transnational perspective It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional continental and global developments Readers will find innovative and stimulating chapters on various political social and economic subjects by some of the leading scholars working on modern European history today *Historical Dictionary of the League of Nations* Anique H.M. van Ginneken,2006-01-16 Created in 1919 shortly after World War I the League of Nations was principally designed to put an end to war But it went into hibernation when World War II broke out and was formally wound up in 1946 Not having achieved its primary objective it was deemed a failure However the many accomplishments it did realize certainly allows for arguments against this idea During its two decade existence the League of Nations resolved and defused many conflicts and crises as well as established a rapport among its members It was also active in many other political social and technical fields including minorities refugees human rights labor health telecommunications and supervision of former colonial territories which had become mandates Above all the League of Nations proved to be training ground for the United Nations and the countless other organizations both governmental and non governmental which now surround us Just what the League of Nations was able to do during its brief but hectic career is summed up in this book The dictionary section contains several hundred cross referenced entries on its founders and supporters its rather small staff and secretariat the various subordinate or related organizations and their overwhelming tasks The historical background is described in the introduction and plotted year by year in the chronology while the bibliography points to further reading [Encyclopedia of the United Nations and](#)

International Agreements: G to M Edmund Jan Osmańczyk, 2003 This thoroughly revised and updated edition is the most comprehensive and detailed reference ever published on United Nations The book demystifies the complex workings of the world's most important and influential international body

Invention of Palestinian Citizenship, 1918-1947 Banko Lauren Banko, 2016-07-08 In the two decades after the First World War nationality and citizenship in Palestine became less like abstract concepts for the Arab population and more like meaningful statuses integrated into political social and civil life and as markers of civic identity in a changing society This book situates the evolution of citizenship at the centre of state formation under the quasi colonial mandate administration in Palestine It emphasises the ways in which British officials crafted citizenship to be separate from nationality based on prior colonial legislation elsewhere a view of the territory as divided communally and the need to offer Jewish immigrants the easiest path to acquisition of Palestinian citizenship in order to uphold the mandate's policy In parallel the book examines the reactions of the Arab population to their new status It argues that the Arabs relied heavily on their pre war experience as nationals of the Ottoman Empire to negotiate the definitions and meanings of mandate citizenship

You, the People Simon Chesterman, 2005 The governance of post conflict territories embodies a central contradiction how does one help a population prepare for democratic governance and the rule of law by imposing a form of benevolent autocracy Transitional administrations represent the most complex operations attempted by the United Nations The operations in East Timor and Kosovo are commonly seen as unique in the history of the UN perhaps never to be repeated But they may also be seen as the latest in a series of operations that have involved the United Nations in state building activities where it has attempted to develop the institutions of government by assuming some or all of those sovereign powers on a temporary basis The circumstances that have demanded such interventions certainly will be repeated Seen in the context of earlier UN operations such as those in Namibia Cambodia and Eastern Slavonia the view that these exceptional circumstances may not recur is somewhat disingenuous Moreover the need for such policy research has been brought into sharp focus by the weighty but ambiguous role assigned to the UN in Afghanistan and the possibility of a comparable role in Iraq This book fills that gap Aimed at policy makers diplomats and a wide academic audience including international relations political science international law and war studies the book provides a concise history of UN state building operations and a treatment of the five key issues confronting such an operation on the ground peace and security the role of the UN as government judicial reconstruction economic reconstruction and exit strategies

A World Divided Eric D. Weitz, 2019-09-24 Through vivid histories drawn from virtually every continent Weitz describes how since the 18th century nationalists have struggled to establish their own states that grant human rights to some people At the same time they have excluded others through forced assimilation ethnic cleansing or even genocide

Globalizing Social Rights S. Kott, J. Droux, 2013-03-20 Based on the case of the ILO both as an actor and driver of international social policy this collection explores the internationalization process of social rights in a

number of national and international contexts This collection brings together a variety of new scholarship by a group of highly qualified and internationally renowned scholars

Empires of Intelligence Martin Thomas, 2008 Empires of Intelligence argues that colonial control in British and French empires depended on an elaborate security apparatus Thomas shows the crucial role of intelligence gathering in maintaining imperial control in the years before decolonization

The Practice of Socialist Internationalism Talbot C. Imlay, 2018 How did the early twentieth century socialist parties of Britain France and Germany cooperate with each other to create a united vision on international issues Talbot Imlay offers a new perspective on how European socialists practised internationalism addressing issues such as post war reconstruction European integration and decolonization

The Wilsonian Moment Erez Manela, 2007-07-23 During the Paris Peace Conference of 1919 while key decisions were debated by the victorious Allied powers a multitude of smaller nations and colonies held their breath waiting to see how their fates would be decided President Woodrow Wilson in his Fourteen Points had called for a free open minded and absolutely impartial adjustment of all colonial claims giving equal weight would be given to the opinions of the colonized peoples and the colonial powers Among those nations now paying close attention to Wilson's words and actions were the budding nationalist leaders of four disparate non Western societies Egypt India China and Korea That spring Wilson's words would help ignite political upheavals in all four of these countries This book is the first to place the 1919 Revolution in Egypt the Rowlatt Satyagraha in India the May Fourth movement in China and the March First uprising in Korea in the context of a broader Wilsonian moment that challenged the existing international order Using primary source material from America Europe and Asia historian Erez Manela tells the story of how emerging nationalist movements appropriated Wilsonian language and adapted it to their own local culture and politics as they launched into action on the international stage The rapid disintegration of the Wilsonian promise left a legacy of disillusionment and facilitated the spread of revisionist ideologies and movements in these societies future leaders of Third World liberation movements Mao Zedong Ho Chi Minh and Jawaharlal Nehru among others were profoundly shaped by their experiences at the time The importance of the Paris Peace Conference and Wilson's influence on international affairs far from the battlefields of Europe cannot be underestimated Now for the first time we can clearly see just how the events played out at Versailles sparked a wave of nationalism that is still resonating globally today

Fulfilling the Sacred Trust Mary Ann Heiss, 2020-12-15 Fulfilling the Sacred Trust explores the implementation of international accountability for dependent territories under the United Nations during the early Cold War era Although the Western nations that drafted the UN Charter saw the organization as a means of maintaining the international status quo they controlled newly independent nations saw the UN as an instrument of decolonization and an agent of change disrupting global political norms Mary Ann Heiss documents the unprecedented process through which these new nations came to wrest control of the United Nations from the World War II victors that founded it allowing the UN to become a vehicle for global reform Heiss examines the

consequences of these early changes on the global political landscape in the midst of heightened international tensions playing out in Europe the developing world and the UN General Assembly She puts this anti colonial advocacy for accountability into perspective by making connections between the campaign for international accountability in the United Nations and other postwar international reform efforts such as the anti apartheid movement Pan Africanism the Non Aligned Movement and the drive for global human rights Chronicling the combative history of this campaign Fulfilling the Sacred Trust details the global impact of the larger UN reformist effort Heiss demonstrates the unintended impact of decolonization on the United Nations and its agenda as well as the shift in global influence from the developed to the developing world

The Fragility of the 'Failed State' Paradigm Neyire Akpinarli,2010 The absence of effective government one of the most important issues in current international law became prominent with the failed state concept at the beginning of the 1990s Public international law however lacked sufficient legal means to deal with the phenomenon Neither attempts at state reconstruction in countries such as Afghanistan and Somalia on the legal basis of Chapter VII of the UN Charter nor economic liberalisation have addressed fundamental social and economic problems This work investigates the weaknesses of the failed state paradigm as a long term solution for international peace and security arguing that the solution to the absence of effective government can be found only in an economic and social approach and a true universalisation of international law

The Politics of Mass Violence in the Middle East Laura Robson,2020-09-17 The Middle East today is characterized by an astonishingly bloody civil war in Syria an ever more highly racialized and militarized approach to the concept of a Jewish state in Israel and the Palestinian territories an Iraqi state paralyzed by the emergence of class and region inflected sectarian identifications a Lebanon teetering on the edge of collapse from the pressures of its huge numbers of refugees and its sect bound political system and the rise of a wide variety of Islamist paramilitary organizations seeking to operate outside all these states The region s emergence as a zone of violence characterized by a viciously dystopian politics of identity is a relatively recent phenomenon developing only over the past century but despite these shallow historical roots the mass violence and dispossession now characterizing Syria Lebanon Israel Palestine and Iraq have emerged as some of the twenty first century s most intractable problems In this study Laura Robson uses a framework of mass violence encompassing the concepts of genocide ethnic cleansing forced migration appropriation of resources mass deportation and forcible denationalization to explain the emergence of a dystopian politics of identity across the Eastern Mediterranean in the modern era and to illuminate the contemporary breakdown of the state from Syria to Iraq to Israel Colonialism Norrie Macqueen,2014-07-22 Europe s rapacious hunger for other people s lands is one of the key shaping forces of our contemporary world Everything is touched by our colonial past from the way we see the world to the food we eat Our contemporary preoccupations and ills from globalization to humanitarian intervention to international terrorism have colonialism somewhere in their genetic make up The character and policies of contemporary international organizations from

the United Nations to the European Union have also been deeply affected by the colonial inheritance of their members whether as perpetrators or victims Weaving together the complex strands of history and politics into one compact narrative this book addresses the key theories of colonialism examining them against contemporary realities It goes on to look at how the different policies of colonisers have had profoundly contradictory effects on the way different empires ended in the 20th century These endings in turn affected the entire nature of modern day international relations It also exposes the moral ambiguities of colonialism and the hypocrisies which underlay colonial policies in the 19th and 20th centuries *Talking Conflict* Anna M. Wittmann, 2016-12-05 In today's information era the use of specific words and language can serve as powerful tools that incite violence or sanitize and conceal the ugliness of war This book examines the complex twisted language of conflict Why is the term collateral damage used when military strikes kill civilians What is a catastrophic success What is the difference between a privileged and unprivileged enemy belligerent How does deterrence differ from detente What does hybrid warfare mean and how is it different from asymmetric warfare How is shell shock different from battle fatigue and PTSD These are only a few of the questions that *Talking Conflict The Loaded Language of Genocide Political Violence Terrorism and Warfare* answers in its exploration of euphemisms warspeak doublespeak and propagandistic terms This handbook of alphabetically listed entries is prefaced by an introductory overview that provides background information about how language is used to obfuscate or minimize descriptions of armed conflict or genocide and presents examples of the major rhetorical devices used in this subject matter The book focuses on the loaded language of conflict with many of the entries demonstrating the function of given terms as euphemisms propaganda or circumlocutions Each entry is accompanied by a list of cross references and Further Reading suggestions that point readers to pertinent sources for further research This book is ideal for students especially those studying political science international relations and genocide as well as general readers **The League of Nations, International Terrorism, and British Foreign Policy, 1934-1938** Michael D. Callahan, 2018-05-02 This book examines the League of Nations state supported terrorism and British foreign policy after the rise of Hitler in the 1930s It argues that with strong leadership from Britain and France the League made it possible for states to preserve the peace of Europe after terrorists aided by Italy and Hungary killed the King of Yugoslavia in 1934 This achievement represents the League at its most effective and demonstrates that the organization could carry out its peacekeeping functions The League also made it possible to draft two international conventions to suppress and punish acts of terrorism While both conventions were examples of productive collaboration in the end few governments supported the League's anti terrorism project in itself Still for Britain Geneva served the cause of peace by helping states to settle their differences by mediation and concession while promoting international cooperation a central conviction of British appeasement policy in the 1930s *Visions of African Unity* Matteo Grilli, Frank Gerits, 2021-02-09 This collection of essays analyzes different iterations of African unity exploring the political and cultural visions that informed projects aimed at

African unification It explores the cultural economic and non state aspects of the Organisation of African Unity OAU as the principal institution dedicated to the cooperation of African states from its establishment in 1963 to its transformation into the African Union AU in 2000 as well as how ideas of African unity shaped the Cold War and African liberation struggles Bringing together contributors from a diverse range of disciplinary backgrounds across Africa Europe and the US this book investigates the ideological origins and historiography of Pan African and unification projects and considers how African intellectuals leaders and populations engaged with these ideas
