Man's Place in Nature, 1863 Thomas Henry Huxley,2004-06-01 Huxley was one of the first adherents to Darwin s theory of evolution by natural selection and advanced its acceptance by scientists and the public Man s Place in Nature was explicitly directed against Richard Owen who had claimed that there were distinct differences between human brains and those of apes Huxley demonstrated that ape and human brains were fundamentally similar in every anatomical detail thus applying evolution to the human race Alfred Russell Wallace Contributions to the theory of Natural Selection, 1870, and Charles Darwin and Alfred Wallace , 'On the Tendency of Species to form Varieties' (Papers presented to the Linnean Society 30th June 1858) David Knight,2004-03-01 Wallace noticed on expeditions to the Amazon and the Malay archipelego that mammals in Southeast Asia are more advanced than their Australian cousins His suggestion was that the two continents had split before the better adapted mammals had evolved in Asia The isolated Australian marsupials were able to thrive whilst those in Asia were driven to extinction by competition from more advanced mammals This led to his theory of natural selection which he presented to the Linnean Society in 1858 with Charles Darwin This volume reprints those papers presented to the Linnean Society **The Oxford English Dictionary** ,1989 **The Evolution Debate 1813-1870** Charles Darwin,2004-06-01 On the Origin of Species caused an uproar when it was first published in 1859 Darwin s theory was that species had evolved from simpler organisms by natural selection acting upon the variability of populations This view was directly opposed to the doctrine of special creation by God and angered the Church and Victorian public opinion This volume is a facsimile of one of the original copies sent to the eminent geologist Leonard Horner The volume also includes sample pages from Darwin s original handwritten manuscript the exclusive property of the Natural History Museum *The Evolution Debate 1813-1870* David Knight,Alfred Russel Wallace,Charles Darwin,2004 **The Evolution Debate, 1813-1870: pt. 1.
