Crapps,1986 Developed in almost thirty years of classroom experience this book is designed to introduce students and other readers to the psychological study of religion Robert W Crapps deals with the major questions and figures that have dominated the psychological study of religion over the past century dividing the discussion into four parts Two chapters in part one suggest the problems and possibilities for the psychological study of religion in light of the nature of religion and the scientific method Part two sketches the contributions to the study of religion of three intellectual currents in contemporary psychology psychoanalysis behaviorism and humanistic psychology part three explores the relationship between religion and human development while part four directs attention to religious lifestyles and that weave differentiated parts of human experience into a cohesive whole Publisher description *Encyclopedia of African American Religions* Larry G. Murphy,J. Gordon Melton,Gary L. Ward,2013-11-20 Preceded by three introductory essays and a chronology of major events in black religious history from 1618 to 1991 this A Z encyclopedia includes three types of entries Biographical sketches of 773 African American religious leaders 341 entries on African American denominations and religious organizations including white churches with significant black memberships and educational institutions Topical articles on important aspects of African American religious life e g African American Christians during the Colonial Era Music in the African American Church *The Anthropology of Eastern Religions* Murray J. Leaf,2014-05-21 The world s great religions depend on traditions of serious scholarship dedicated to preserving their key texts but also to understanding them and therefore to debating what understanding itself is and how best to do it They also have important public missions of many kinds and their ideas and organizations influence many other important institutions including government law education and kinship Anthropology of Eastern Religions Ideas Organizations and Constituencies is a comparative survey of the world s major religious traditions as professional enterprises and often as social movements Documenting the principle ideas behind eastern religious traditions from an anthropological perspective Murray J Leaf demonstrates how these ideas have been used in building internal organizations that mobilize or fail to mobilize external support *A History of the World's Religions* David S. Noss,Blake Grangaard,2016-09-17 A History of the World s Religions bridges the interval between the founding of religions and their present state and gives students an accurate look at the religions of the world by including descriptive and interpretive details from the original source materials Refined by over forty years of dialogue and correspondence with religious experts and practitioners around the world A History of the World s Religions is widely

regarded as the hallmark of scholarship fairness and accuracy in its field It is also the most thorough yet manageable history of world religion available in a single volume treating many subjects largely neglected in other texts     **God Must Be Pissed! ,     Man, Science and Religion** Tan Boon Tee,Dr Tan Boon Tee,2004 Reflective thinking can be a very powerful tool past but also empowers idea to predict the future more accurately This is a collection of short essays written in the past decade The wide range of topics covers from such title like Why science never flourishes in China to The manifesto of world religions     **History, Religion, and American Democracy** Maurice Wohlgeleer,2021-09-28 History Religion and American Democracy provides a fundamental review of four major themes naturalism and supernaturalism in an American context issues in the history of Judaism American social philosophy and the teaching and learning of democratic ideals in a pluralistic postmodern environment This book provides a naturalistic context for the deep analysis of religious theological as well as social and political themes     *The Philosophy of the Christian Religion* Andrew Martin Fairbairn,1909     **The Philosophy of the Christian Religion** A. M. Fairbairn,2017-03-09 This book may be described as an attempt to do two things first to explain religion through nature and man and secondly to construe Christianity through religion The author conceives religion to be a joint product of the mind within man and the nature around him the mind being the source of the ideas which constitute its soul the nature around determining the usages and customs which build up its body He does not think therefore that any one of its special forms can be explained without the local nature which begot and shaped it or that its general being can be resolved and construed without the reason or thought which is common to the race He sees in religion the greatest of all man s unconscious creations and the most potent of the means which the past while it was still a living present formed for the making of the man and the times that were yet to be From the Preface     **Religion and the Christian Faith** Hendrik Kraemer,2003-06 A rich and profound contribution to the debate on the position of modern Christianity opened up Kraemer s The Christian Message in a Non Christian World In Religion and the Christian Faith he deals with many of the criticisms of his position and offers an apologia at once luminous and massive of the Christian religion as the revelation of God to Man and the faith for all mankind There is a decisive Christian finality about Kraemer s writing and his book is a significant contribution to the sharp discipline of faith and action under which the universal Christian community lives All the way through his formidably marshalled arguments run the undertones of Christian involvement in a real world a world which by his astonishing grasp of philosophy Biblical theology and the claims of religion and religions the Author brings alive to the reader The reading of this formative book with its strenuous demands on the reader s intelligence and Christian understanding is a rewarding experience Its significance for the Christian Church throughout the world is obvious but it is also a monumental witness to the Christian religion for all those who ask not only for a faith once delivered but a faith to believe in their own day and generation     Military Chaplains' Review ,1980     *The Inner Evolution of Man* John Brokaar,2022-05-04 TO FIND ONESELF IN THE DUALITY OF CONTRADICTIONS ONE MUST FIRST LEARN TO KNOW

ONESELF THIS HOWEVER IS NOT A NATURAL PROCESS As contemporary human beings we exist in a one and two dimensional world of fearful desire for food wealth sex recognition and immortality Unaware of its illusory state where perception manifests our reality we are equally unaware of our own hybrid state As beings of physical and metaphysical features for which the attainment of the Higher Dimensions is our very birthright This attainment does not come naturally though it requires our awareness of the conceptual world as well as the acceptance of our conditioned mechanicalness within it These observations and contemplations aim to offer such awareness and to enhance the Seeker of Truth with the means to discover understand and accept his or her undivided Self This book combines philosophy including gnostic thought religion as well as the observed psychology and sociology of contemporary ways within the arenas of politics geopolitics and corporatism through the lens of spirituality and magic It is this that defines the supernatural wonders into which the Seeker of Truth must cross his or her own threshold As with all things of substance the answer to these mysteries will not be found in selected subjects or even the sum of their parts as in such one only finds Chaos It is only in knowing the Whole of the Self that complete acceptance of All can emerge      Essays on the Nature of Art Eliot Deutsch,1996-11-01 In this newest book the author presents a theory of art which is at once universal in its general conception and historically grounded in its attention to aesthetic practices in diverse cultures The author argues that especially today art not only enjoys a special kind of autonomy but also has important social and political responsibilities Deutsch posits that an art work has as its intentionality the striving to be aesthetically forceful meaningful and beautiful with each of these dimensions culturally situated Working from traditional imitation and expression theories he argues that the manner of an artwork s coming into being and one s experience of it constitutes an integral whole Selected aspects of painting poetry dance architecture films and music are offered to deepen an understanding of the concepts presented Also included are several inter connected themes focusing on the difficult and controversial issues of interpreting art truth in art and the relations between art and morality and art and religion
