**bovine pleuropneumonia - A policy for coordinated actions** Food and Agriculture Organization of the United Nations, 2019-03-27 Contagious bovine pleuropneumonia CBPP is an insidious disease that lingers in herds causing significant morbidity and mortality The policies to address the control and management of CBPP are in disarray at both the national and international levels There has not been significant improvement in the efficacies of available vaccines or diagnostic assays for several decades Classic strategies of mass vaccination and strict movement control that once were perceived as successful in rolling back the disease have largely fallen due to high costs concerns of declining impact and growing public resistance Officially treatment with antibiotics is discouraged or prohibited yet their use is widespread CBPP is by all means an enigmatic disease whose control probably requires a new paradigm or out of the box thinking and executing approach The purpose of this document is to provide an evidence based policy for the implementation of sound control of CBPP by all stakeholders at all levels global regional and national It describes a road map to CBPP control that is cognizant of the situation on the ground While not being prescriptive the document includes examples of combinations of interventions and control measures that should offer the opportunity to improve impact and hence offer better livelihoods to livestock producers **PROBIOTICS IN ANIMAL NUTRITION** Food and Agriculture Organization of the United Nations, 2018-08-22 This document presents a unique and exhaustive review of the state of knowledge on the use of

probiotics in diverse livestock production systems and their impact on animal productivity It focuses specifically on definitions production mechanisms of action applications effects safety and potential public health risks of probiotics In addition the labelling of probiotic products and global regulatory status of probiotics in animal feed is also covered This publication will inform those that are interested in identifying and designing interventions for increasing animal productivity It would also give an impetus to the development of new probiotics having consistent long term effects that could possibly be used in feed in place of antibiotic growth promoters **Global assessment of soil carbon in grasslands** Dondini, M., Martin, M., De

Camillis, C., Uwizeye, A., Soussana, J.-F., Robinson, T., Steinfeld, H., 2023-02-14 Soils contribute to the achievement of the UN Sustainable Development Goals through carbon sequestration By enhancing soil health and fertility soils can play a crucial role in climate action land degradation neutrality and alleviating hunger The present study provides a spatially explicit report on the state of grassland soils and can be used as a baseline for future work to explore the impacts of livestock management on soil carbon at regional country and farm levels Assessing the current state of grassland systems and their potential to sequester carbon in the soil is of key importance to understand the trade offs between grassland services on food security biodiversity conservation and climate mitigation *Assessing Quality and Safety of Animal Feeds* Samuel Jutzi, Food and Agriculture Organization of the United Nations, 2004-01-01 This publication provides information on the impact of animal feeds on food quality food safety and the environment and thus improves the basis for managing such risks The book brings together in printed form six reviews from the FAO electronic journal AGRIPPA available online **Mulberry for Animal Production** Manuel D. Sanchez, Food and Agriculture Organization of the United Nations, 2002-01-01 Mulberry the feed of silkworm was one of the first domesticated forages in the world and has been the subject of intensive research over the last few decades Its intensive cultivation and use specifically for animal production only started during the last two decades This publication presents a number of articles given at the first electronic conference on mulberry for animal production held during 2000 This conference was organised in response to the growing interest in the cultivation and use of mulberry to feed various domestic animals Issues discussed include germplasm resources in various countries agronomic aspects chemical composition nutritive value and animal performance *The economics of pastoralism in Argentina, Chad and Mongolia* Wane, A.; Cesaro, J.D.; Duteurtre, G.; Touré, I.; Ndiaye, A.; Alary, V.; Juanès, X.; Ickowicz, A.; Ferrari, S. and Velasco, G., 2020-10-19 Pastoralists make the most of resources distributed unevenly over space and time to provide a range of goods and services Operating in a shock prone environment pastoralists deploy endogenous strategies such as mobility diversification in agriculture or in non agricultural activities management of social networks etc However accurate and reliable knowledge about the economics of pastoralism is yet to be understood and absorbed at the local regional and national levels based on reliable data In the absence of such knowledge governments and private firms neglect investment that would allow those systems to better connect to markets and are unable to provide appropriate services infrastructure and tenure security With Argentina Chad and Mongolia as pilot cases this study by CIRAD commissioned by FAO funded by IFAD and facilitated by pastoralist associations Fundación Gran Chaco Río Salado Billital Maroob and the National Federation of Pasture User Groups aimed to fulfil this knowledge gap through a multifunctional assessment of pastoral production systems and their economic contribution Importantly incorporating self consumption of pastoralist households productions themselves as an key component of gross revenue shows a significant increase in their contribution to national GDPs The diversified sources of revenue and the importance of self consumption also indicate that pastoral systems fulfil a range of

functions income food security flexible labor etc Further the study promotes close cooperation between pastoralist associations research institutions and development partners Such new partnerships allow strengthening the capacity of those pastoralist associations in collecting and managing their own data as well as using this data in policy dialogue *Qualitative risk assessment for African swine fever virus introduction* Rozstalnyy, A., Roche, X., TagoPacheco, D., Kamata, A., BeltranAlcrudo, D., Khomenko, S., Lockhart, C., Urdaz, J., Gioia, G., Gonzalez Serrano, A., VonDobschuetz, S., Dhingra, M., Sumption, K.,2022-02-28 Following the re introduction of the African swine fever virus ASFV in the Americas after 40 years of absence FAO conducted a qualitative risk assessment for the likelihood of entry of ASF from the Dominican Republic and Haiti to unaffected countries and territories of the Americas and the likelihood of exposure to susceptible animal populations should the disease be introduced In addition the potential economic and social impact of ASFV spreading across the continent was assessed The risk assessment covers the period of December 2021 to February 2022 and considered six risk pathways of introduction and spread The methodology information used and results of the risk assessment and economic impact assessment are available in this publication along with recommendations for prevention and control of ASFV introduction and spread in the region In addition the publication compiles information collected from 35 countries territories in the Americas through a questionnaire and presents evidence on the complex swine pork value chains in the region retrieved from various sources **Pastoralism - Making variability work** Food and Agriculture Organization of the United Nations,2021-07-21 Pastoral systems have evolved to function with the natural environment and therefore with variability By identifying variability as an entry point this paper aims at i engaging FAO in the mainstreaming of pastoralism by establishing the understanding of pastoralism and its systematic inclusion in the normal operations of FAO and at ii presenting an evidence based narrative on pastoralism to a specialists audience Two main points are made in this document First pastoral systems are emblematic of farming with nature Second pastoral systems make use of variability in inputs the environment by matching it with variability in their own operational processes flexibility in movements animal breeds labour force etc in such a way as to reduce the variability in outputs animal production and health household s food security etc Since 2015 the Pastoralist Knowledge Hub PKH has helped creating an institutional space for connecting and coordinating work on pastoralism within FAO An Inter Departmental Working Group on Pastoralism has been formed The conceptual framework of this paper and early versions have benefited from comments and guidance of FAO staff as well as of specialists of pastoralism worldwide *Informe Anual 2001 IICA* Instituto Interamericano de Cooperación para la Agricultura,2002 *Introduction and spread of lumpy skin disease in South, East and Southeast Asia* Roche, X., Rozstalnyy, A., TagoPacheco, D., Pittiglio, C., Kamata, A., Beltran Alcrudo, D., Bisht, K., Karki, S., Kayamori, J., Larfaoui, F., Raizman, E., VonDobschuetz, S.,Dhingra, M.S. and Sumption, K.,2021-03-30 Lumpy skin disease LSD is a vector borne disease of cattle and Asian water buffalo that is included on the OIE World Organisation for Animal Health list of notifiable diseases In July 2019 LSD was

introduced to Bangladesh China and India and then spread to Nepal and Bhutan and in 2020 to various provinces of China and India A qualitative risk assessment was conducted to assess the likelihood of introduction and or spread of LSD in 23 countries in South East and Southeast Asia based on information available up to 31 October 2020 The economic impact of LSD for South East and Southeast countries was estimated to be up to USD 1 45 billion in direct losses of livestock and production These losses may be higher due to the severe trade implications for infected countries This document provides an overview of LSD control approaches including prevention The cost effectiveness estimation demonstrates a strong economic justification for vaccination and advocates for a regional approach to harmonize control measures Handbook of Small Animal Imaging George C. Kagadis,Nancy L. Ford,Dimitrios N. Karnabatidis,George K. Loudos,2018-09-03 The use of small animal models in basic and preclinical sciences constitutes an integral part of testing new pharmaceutical agents prior to their application in clinical practice New imaging and therapeutic approaches need to be tested and validated first in animals before application to humans Handbook of Small Animal Imaging Preclinical Imaging Therapy and Applications collects the latest information about various imaging and therapeutic technologies used in preclinical research into a single source Useful to established researchers as well as newcomers to the field this handbook shows readers how to exploit and integrate these imaging and treatment modalities and techniques into their own research The book first presents introductory material on small animal imaging therapy and research ethics It next covers ionizing radiation and nonionizing radiation methods in small animal imaging hybrid imaging and imaging agents The book then addresses therapeutic research platforms and image quantification explaining how to ensure accurate measurements of high quality data It concludes with an overview of many small animal imaging and therapy applications that demonstrate the strength of the techniques in biomedical fields

*Annual Report 2001 IICA* , **Feed Supplementation Blocks** Food and Agriculture Organization of the United Nations,2007-01-01 In facing ever more limited resources and changing market conditions and in the attempt to enhance productivity for strengthening livelihoods many technologies have been used to improve feed use and animal performance at the farm level A particularly successful example in terms of both geographic range of use and relative simplicity in formulation and preparation is the urea molasses multi nutrient block technology This publication provides a comprehensive overview of development and use of the block technology in countries around the world and it might be of great practical value to extension workers students researchers and those thinking of using such feed supplementation technology or of starting commercial production , *Employment Generation Through Small-scale Dairy Marketing and Processing* Amos O. Omore,Food and Agriculture Organization of the United Nations,2004-01-01 Dairy markets can offer employment opportunities in developing countries particularly in informal milk markets which rely on traditional labour intensive technologies rather than modern milk processing equipment This publication contains case studies from Kenya Bangladesh and Ghana which give strategic insights into how small scale dairy marketing and processing can contribute significantly to

rural and urban employment generating jobs in rural communities as well as in peri urban and urban areas      *Animal nutrition strategies and options to reduce the use of antimicrobials in animal production* Food and Agriculture Organization of the United Nations,2021-07-15 Antimicrobial resistance is a global and increasing threat Stewardship campaigns have been established and policies implemented to safeguard the appropriate use of antimicrobials in humans animals and plants Restrictions on their use in animal production are on the agenda worldwide Producers are investing in measures involving biosecurity genetics health care farm management animal welfare and nutrition to prevent diseases and minimize the use of antimicrobials Functional animal nutrition to promote animal health is one of the tools available to decrease the need for antimicrobials in animal production Nutrition affects the critical functions required for host defence and disease resistance Animal nutrition strategies should therefore aim to support these host defence systems and reduce the risk of the presence in feed and water of potentially harmful substances such as mycotoxins anti nutritional factors and pathogenic bacteria and other microbes General dietary measures to promote gastrointestinal tract health include the selective use of a combination of feed additives and feed ingredients to stabilize the intestinal microbiota and support mucosal barrier function This knowledge used to establish best practices in animal nutrition could allow the adoption of strategies to reduce the need for antimicrobials and contain antimicrobial resistance      A Technology Review D. J. Alexander,Jonathan G. Bell,Robyn G. Alders,2004-01-01 Previously released in June 2004 and temporarily withdrawn Now available Keeping poultry contributes substantially to household food security throughout the developing world One of the principal constraints to increasing small scale poultry production is Newcastle Disease This acute viral disease can typically kill up to 80 percent of unprotected poultry in rural areas and is found throughout the developing world This technology review presents the latest understanding of Newcastle Disease its characteristics epidemiology symptoms and control It will be of practical value to state and private veterinarians and to all those involved with rural poultry production who wish to control this disease      **HIV Infections and Zoonoses** Paolo Pasquali,Food and Agriculture Organization of the United Nations,2004 Infections between animals and humans are truly complex and health care providers should be aware of the potential role of animals in infectious diseases of HIV infected patients The aim of this guideline is to outline the most important zoonoses that play a significant role in the epidemiology of AIDS and to provide a practical and manageable tool for health workers involved in the care of HIV infected humans      ,
