de atención de servicios de emergencia generada principalmente por las lesiones ocasionadas en accidentes de tráfico y la violencia. Anualmente mueren más de 64000 personas por lesiones de causa externa. Por otra parte, la transición epidemiológica social y ambiental que experimenta la población evidencia una alta probabilidad de sufrir una urgencia médica si consideramos la creciente demanda de atención por enfermedades agudas y crónicas agudizadas más de 27 millones de casos que ponen en peligro la vida y que han provocado que la población exija atención médica oportuna de calidad y con equidad. Ante esta problemática es importante recalcar la necesidad de implementar normas, reglamentos y leyes que regulen la atención médica prehospitalaria, así como profesionalizar al personal que interviene en los cuidados que se proporcionan a los pacientes con una urgencia médica. Actualmente, la educación basada en competencias es un proceso innovador que desarrolla pericia profesional integrando el conocimiento científico y las habilidades y destrezas para el trabajo. Vincula la teoría con la práctica en escenarios reales, conformado en dos vertientes: la educativa y la laboral. La primera es la educación formal, donde se forman los técnicos profesionales básicos y el técnico superior universitario por medio de una institución reconocida tanto por la Secretaría de Educación Pública como por la Dirección General de Profesiones, contando con la documentación necesaria para avalar sus conocimientos. La segunda se refiere a la acreditación de aquellas personas que prestan sus servicios a bordo de ambulancias, cuya formación y capacitación hasta ahora se han realizado de forma empírica y no formal, partiendo de que son los años de experiencia, así como la capacitación a través de cursos, monográficos, diplomados, talleres, seminarios, etc., en diversas instituciones que ofrecen servicios de emergencia. Cruz Roja, Protección Civil e instituciones privadas las que avalan sus capacidades, conocimientos y desempeño.

Enfermería de Urgencias Jean A. Proehl, 2005-03. Manual muy manejable y completo que recoge más de 200 procedimientos que puede llegar a desarrollar un profesional de Enfermería en Urgencias. Todos los procedimientos están profusamente ilustrados para que el lector pueda aprender a realizar las técnicas que los componen y están distribuidos en grupos de actuación por técnicas y zonas corporales, lo que posibilita que puedan encontrarse muy fácilmente. No existe ninguna especialidad en la que se atiendan unos pacientes con trastornos agudos y

situaciones patológicas tan diversas como en Urgencias donde se atiende todo tipo de situaciones críticas en las que la actuación del profesional de Urgencias tiene una importancia decisiva para el bienestar o incluso la supervivencia del paciente. Esto supone que el profesional de Urgencias médicos o enfermeros tiene que tener una formación especialmente cuidada y puesta al día. El libro sigue una estructura muy lógica que fomenta el aprendizaje basado en indicaciones, contraindicaciones, material necesario, preparación del paciente, pasos de la técnica y complicaciones que están explicados de manera que el lector aprenda cuándo y cómo se deben realizar y pueda valorar posibles complicaciones.
