**New Perspectives on**

**(Im)Politeness and Interpersonal Communication** Lucis Fernández Amaya, María de la O Hernández López, Reyes Gómez Morón, 2012-12-18 New Perspectives on Im Politeness and Interpersonal Communication gathers eleven studies by prominent scholars which explore issues related to im politeness in human communication. The study of linguistic im politeness is undoubtedly one of the central concerns in the field of pragmatics as attested to by the numerous conferences and journals currently dedicated to the topic the various theoretical models and approaches developed or developing so far and the seemingly endless list of insightful and inspiring empirical studies tackling the topic from a wide variety of angles. This volume contributes to the subfield of social pragmatics by putting together works that review the state of the art of im politeness studies analysing im politeness in media contexts like the Internet or dubbed films and other contexts looking into the effects and consequences of some speech acts for social interaction drawing implications for language teaching and approaching some of the linguistic mechanisms which help to communicate im politeness. Resulting from the efforts made by specialists in the field the chapters in this volume offer additional evidence that examining the complexity of interpersonal communication from different standpoints can benefit a more complete understanding of social interaction in general. Their scope and practical applications demonstrate the transversality and versatility of interpersonal communication. The editors hope that these works will retain scholars interest and attention for some time to come and spark off further research.

### **Periodismo informativo e interpretativo. El impacto de Internet en la noticia, las fuentes y los géneros**

Concha Edo Bolós, 2009-09. El siglo XXI nos ha situado ante una nueva encrucijada para el periodismo. La paulatina generalización de internet como canal de comunicación nos obliga a reconceptualizar el propio trabajo informativo y a enfrentarnos ante un importante momento de transformaciones en los medios de comunicación de masas. Presentamos en esta segunda edición datos de interés y distintas reflexiones acerca de las consecuencias de las constantes novedades tecnológicas así como la evolución que se ha producido en las redacciones en gran parte de ellas a lo largo del año, produciendo y sus consecuencias en el quehacer informativo. Sin embargo considero más prudente ofrecer ahora ese material como complemento de un corpus rico y práctico aceptado y reconocido en todo el ámbito universitario y de una experiencia docente ya contrastada. Concha Edo es profesora de Redacción Periodística en la Universidad Complutense de Madrid. Ha publicado en esta misma editorial el libro *Del papel a la pantalla la prensa en internet*.

*Gabinetes de comunicación on line. Claves para generar información corporativa en la red* Berta García Orosa, 2009-09-15. Este libro nos descubre cómo construir un gabinete de comunicación on line a través del análisis de las salas de prensa y de la descripción y propuesta de usos concretos de los recursos técnicos. Es un momento importante para las grandes organizaciones pero también la ocasión para que aquellas con menos recursos tengan presencia ante la opinión pública a través de la red. Aunque somos conscientes de la interrelación de diferentes públicos en internet y de la necesidad de conversar con todos ellos, centramos esta obra en una de las funciones básicas del gabinete: la relación con los periodistas. Con este objetivo pretendemos dar a conocer a los dircom de entidades pequeñas y grandes lo que se está haciendo en comunicación organizacional en internet. Ofrecer las claves técnicas fundamentales para construir un gabinete de comunicación on line siempre desde el punto de vista de la comunicación organizacional. Tras contextualizar lo que es un gabinete de comunicación y su situación en los sistemas comunicativos en la actualidad, se definen los gabinetes on line y se ofrece una panorámica de la situación actual en la red: las claves para crearlo y utilizarlo, la descripción y análisis de cada uno de los instrumentos, las soluciones técnicas para implementarlos y las ventajas e inconvenientes en cada caso.
