Vallance,2016-07-27 Air power today dominates virtually all military operations yet it remains the least well understood form of armed force Technical and tactical details of aviation forces are widely available but few understand how such forces are best used in prosecuting defence and security policy The Air Weapon seeks to address this deficiency by setting out the doctrines which guide the use of air power at the strategic and operational levels of war It identifies what aviation forces can and cannot be used to achieve It encompasses doctrines for war fighting and also for war prevention And it suggests possible directions for future doctrinal development Following a cohesive top down analytical path the study deals with air power in the only viable way as an integrated entity The Air Weapon is perhaps the only all encompassing high level study of this critically important yet all too little understood form of military power *The Luftwaffe and the War at Sea* David C. Isby,2017-11-30 The Luftwaffe and the War at Sea is a collection of fascinating accounts written by German military officers both Kriegsmarine and Luftwaffe about the naval war in the air in the North Atlantic and around Great Britain Most of the documents were written immediately post war as part of the Allied debriefing programme However some are wartime German originals produced for internal use by military staff but all have the value of immediacy they were written when memories were fresh and in many cases by those who were directly caught up in the action These men were personally involved in all aspects of the German attempts to control the seas through maritime power from the use of Ju 87 Stuka dive bombers during the

invasion of Norway to the missions of FW 200 Condors in cooperation with the U boat campaign against Britain's Atlantic lifelines. The writers include such well known names as Grossadmiral Karl Doenitz, Kontreadmiral Gerhard Wagner, General der Flieger Ulrich O E Kessler and Vizeadmiral Eberhard Weichold. The history recounted in these reports is unique and first hand, allowing the reader a fresh perspective on those famous campaigns. Furthermore, much of that wartime experience was harnessed during the formation of the Bundesmarine's Marineflieger in the 1950s that then served throughout the Cold War. Today it still participates in the global war on terror with its Atlantic marine patrols. **The Marine Corps Gazette**, 1975

A National Force Peter Kasurak, 2013-11-01. Canadians consider the period between the Second World War and the unification of the armed services in 1968 as a golden age, a time when their army dropped the shackles of its imperial past and emerged as a truly national peacekeeping force. In this landmark book, Peter Kasurak draws on recently declassified documents to show that this era was in fact clouded by the army's failure to loosen the grasp of British army culture, produce its own doctrine, and advise political leaders effectively. The discrepancy between the army's goals and the Canadian state's aspirations as a peacemaker in the postwar world resulted in a series of civilian military crises that ended only when the scandal of the Somalia Affair in 1993 forced reform. Kasurak offers an illuminating account of the organizational growing pains that wracked the Canada's army as it evolved into a force that could reflect the aspirations of both its country and military leadership.

Baghdad or Bust Mike Ryan, 2003-12-04. This is the true and compelling story of the sensationally successful joint US and UK campaign to liberate Iraq from the oppressive regime of Saddam Hussein from its conception to dramatic conclusion. The author describes the meticulous planning and looks into the logistical and political problems. He also delves into those curses of modern warfare: friendly fire incidents and collateral damage. **Air University Library Index to Military Periodicals**, 1985

The Statesman's Year-Book 1997-8 B. Hunter, 2016-12-28. Widely respected as an authoritative and accessible reference work, *The Statesman's Year Book* provides up-to-date world facts about every country in the world: constitution and government, international relations, industry, agriculture, trade, and social issues. Known as a people events and statistics work, this year's edition includes accounts of the latest developments in trouble spots such as Israel and Northern Ireland and records all recent election results. **Task Force** John Parker, 2013-02-28.

The Royal Navy at the start of the twenty-first century had undergone the most remarkable transformation. The Fleet is today the smallest since the start of the Napoleonic wars as surface vessels are no longer viable as a principal line of defence. That preserve is now in the hands of Britain's nuclear armed submarine fleet, well chronicled in *THE SILENT SERVICE* and the Air Force as outlined in *STRIKE COMMAND*. This book will complete the triangle of our essential military might, telling the story of today's sea-going ultra-mobile rapid reaction missile and aircraft carrying task force. John Parker includes personal interviews from the men and women who have served in the Senior Service to bring his story vividly to life. **Joint Force Quarterly**, 1997. Individual performance while being important is not the primary determinant of mission success force integration interoperability adaptability and teamwork are key factors Team and collective training which fully addresses these factors is fundamental to the development and delivery of military capability As a consequence the requirement to determine training requirements and specify effective systems for the delivery of team and collective training is critical to operational success Training Needs Analysis also known as Front End Analysis is a well established methodology for analysing training requirements and specifying training solutions used extensively by the UK and its NATO partners However the analytical techniques employed are optimised for individual training with little guidance being offered on its application in the team and collective context Team and Collective Training Needs Analysis TCTNA has been developed to close this methodological gap It addresses the issues of the relationship of individual and team tasks teamwork command and control task and training environments scenario definition instructional strategy team training approaches instructional functions and wide ranging organisational and procurement considerations Part One of the book develops an integrated set of models which underpin the analytical approach presented in Part Two Worked examples and case studies illustrate the application of the approach Between 2005 and 2015 the authors worked on numerous training related research projects at Cranfield University and Coventry University for the Human Factors Integration Defence Technology Centre and the Defence Human Capability Science and Technology Centre on behalf of the Defence Science and Technology Laboratory UK Ministry of Defence
