strategies in the post HIV blood contamination era Finally consideration is given to a range of policy and legal strategies that should underpin effective risk governance involving multi valued human biological materials **What Really Matters**

Arthur Kleinman,2007 Through arresting narratives we meet a woman aiding refugees in sub Saharan Africa facing the chaos of a meaningless society and a doctor trying to stay alive during Mao s cultural revolution individuals challenged by their societies and caught up in existential moral experiences that define what it means to be human *Informed Choice of*

Medical Services: Is the Law Just? Marj Milburn,2017-09-29 This title was first published in 2001 This work is a uniquely multi disciplinary contribution to the existing bioethical literature on the topic of informed choice of medical services It is also the first comprehensive bioethical text to confront the central issue of power in the clinical encounter and to argue for statutory protection of the right to informed choice While the majority of bioethicists argue for a conciliatory rather than adversarial approach to the chronic problem of uninformed consent the author of this work argues that the external regulation of medicine is essential if the right to informed choice is to be protected This argument is based upon an extensive review of the bioethical legal political medical sociological and philosophical literature as well as a wide range of empirical and anecdotal evidence evolving from a detailed exploration of power and the limits of rationality in the clinical encounter

Historical and Philosophical Perspectives on Biomedical Ethics: From Paternalism to Autonomy? Andreas-Holger Maehle,Johanna Geyer-Kordesch,2017-11-01 This title was first published in 2002 This volume discusses the subject of biomedical ethics Various views historical and contemporary are discussed with the editors using the contrasting concepts in the shift from paternalism to autonomy in 20th century medicine as a heuristic tool for the critical study of ethics in medicine As far as the evidence in this volume goes paternalistic medical practices and patient autonomy had an uneasy relationship by the beginning of the 20th century A hundred years later full autonomy in decisions on medical treatment is still subject to numerous caveats The text pays close attention to the interplay between various players noting how factors such as social contexts governmental organizations and the biotechnological industry influence and shape responses to the principle of bioethics **The Ethics of Medical Involvement in Capital Punishment** Joseph B.R. Gaie,2006-04-11 The morality of capital punishment has been debated for a long time This however has 1 not resulted in the settlement of the question either way Philosophers are still divided In this work I am not addressing the morality of capital punishment per se My question is different but related It is this Whether or not capital punishment is morally right is it moral or immoral for medical doctors to be involved in the practice To deal with this question I start off in Chapter One delineating the sort of involvement the medical associations consider to be morally problematic for medical doctors in capital punishment They make a distinction between what they call 2 medicalisation of and involvement in capital punishment and argue that there is a moral distinction between the two Whilst it is morally acceptable for doctors to be involved in capital punishment according to the medical associations it is immoral to medicalise the practice I clarify this position and show what moral issues arise I then suggest

that there should not be a distinction between the two The medical associations argue that the medicalisation of capital punishment especially the use by medical doctors of lethal injection to execute condemned prisoners is immoral and therefore should be prohibited because it involves doctors in doing what is against the aims of medicine
