Memory And Memorials The Commemorative Century:

Memory and Memorials William Kidd, Brian Murdoch, 2017-05-15 The twentieth century perhaps more than any other was shaped by war and conflict In particular the two world wars have had a profound influence on the development of world history especially in western Europe The aim of *Memory and Memorials* however is not to seek the effects war has had on the twentieth century but rather to explore how societies chose to remember wars and manipulate this memory for political and cultural purposes Tackling issues of actual memory distorted memory and reconstructions of the past the use and nature of the war memorial and the reflection of all these points in selected art literature and film the main theme of *Memory and Memorials* is to stress both continuity and change in memory and memorial

War Memory and Popular Culture Michael Keren, Holger H. Herwig, 2014-01-10 This collection of essays investigates such diverse vehicles for war commemoration as poems battlefield tours souvenirs books films architectural structures comics websites and video games Drawing on essayists from Australia Canada Great Britain Israel and the United States this work explores the evolution from traditional to contemporary forms of war commemoration while addressing the fundamental question of whether these new forms of memorial are meant to encourage the remembering or the forgetting of the experience of war as well as what implications the process of commemoration may have for the continuation of the modern nation state Instructors considering this book for use in a course may request an examination copy here

[Chartism, Commemoration and the Cult of the Radical Hero](#)

Matthew Roberts, 2019-08-15 Chartism the British mass movement for democratic and social rights in the 1830s and 1840s was profoundly shaped by the radical tradition from which it emerged Yet little attention has been paid to how Chartists saw themselves in relation to this diverse radical tradition or to the ways in which they invented their own tradition Paine Cobbett and other founding fathers dead and alive were used and in some cases abused by Chartists in their own attempts to invent a radical tradition By drawing on new and exciting work in the fields of visual and material culture cultures of heroism memory and commemoration critical heritage studies and the history of political thought this book explores the complex cultural work that radical heroes were made to perform

[Commemorative Spaces of the First World War](#) James Wallis, David C. Harvey, 2017-07-20 This is the first book to bring together an interdisciplinary theoretically engaged and global perspective on the First World War

through the lens of historical and cultural geography Reflecting the centennial interest in the conflict the collection explores the relationships between warfare and space and pays particular attention to how commemoration is connected to spatial elements of national identity and processes of heritage and belonging Venturing beyond military history and memory studies contributors explore conceptual contributions of geography to analyse the First World War as well as reflecting upon the imperative for an academic discussion on the War's centenary This book explores the War's impact in more unexpected theatres blurring the boundary between home and fighting fronts investigating the experiences of the war amongst civilians and often overlooked combatants It also critically examines the politics of hindsight in the post war period and offers an historical geographical account of how the First World War has been memorialised within official spaces in addition to those overlooked and often undervalued alternative spaces of commemoration This innovative and timely text will be key reading for students and scholars of the First World War and more broadly in historical and cultural geography social and cultural history European history Heritage Studies military history and memory studies

The Holocaust Jeremy Black, 2024-06-04 In *The Holocaust History and Memory New Edition* Jeremy Black revisits his brilliant and wrenching account of the brutal mass slaughter of Jews during World War II and the subsequent remembrance and misremembering of this genocide Black challenges the prevailing view that separates the Holocaust from Germany's military objectives with compelling evidence that Germany's war on the Allies was deeply intertwined with Hitler's war on Jews As Hitler expanded his control over more territories the extermination of Jews became a significant war aim particularly in the east Long before the establishment of extermination camps the German army and collaborators carried out mass shootings resulting in the deaths of many and the extermination of entire Jewish communities Notably Rommel's attack on Egypt was a crucial step toward the larger goal of annihilating 400 000 Jews living in Palestine Additionally Hitler interpreted America's initial focus on war with Germany rather than Japan as evidence of influential Jewish interests in American policy which further justified and escalated his war against Jewry through the Final Solution In chilling detail Black also unveils compelling evidence that many ordinary Germans must have been aware of the genocide happening around them *The Holocaust History and Memory New Edition* is an essential concise and highly readable history Now extensively revised and updated it continues to offer a powerful testimony to those forever silenced by the Holocaust ensuring that their horrifying fate will never be forgotten

Heritage and Memory of War Gilly Carr, Keir Reeves, 2015-04-17 Every large nation in the world was directly or indirectly affected by the impact of war during the course of the twentieth century and while the historical narratives of war of these nations are well known far less is understood about how small islands coped These islands often not nations in their own right but small outposts of other kingdoms countries and nations have been relegated to mere footnotes in history and heritage studies as interesting case studies or unimportant curiosities Yet for many of these small islands war had an enduring impact on their history memory intangible heritage and future cultural practices leaving a legacy that demanded some form of local response

This is the first comprehensive volume dedicated to what the memories legacies and heritage of war in small islands can teach those who live outside them through closely related historical and contemporary case studies covering 20th and 21st century conflict across the globe The volume investigates a number of important questions Why and how is war memory so enduring in small islands Do factors such as population size island size isolation or geography have any impact Do close ties of kinship and group identity enable collective memories to shape identity and its resulting war related heritage This book contributes to heritage and memory studies and to conflict and historical archaeology by providing a globally wide ranging comparative assessment of small islands and their experiences of war Heritage of War in Small Island Territories is of relevance to students researchers heritage and tourism professionals local governments and NGOs The Cambridge History of the First World War: Volume 3, Civil Society Jay Winter, 2014-01-09 Volume 3 of The Cambridge History of the First World War explores the social and cultural history of the war and considers the role of civil society throughout the conflict that is to say those institutions and practices outside the state through which the war effort was waged Drawing on 25 years of historical scholarship it sheds new light on culturally significant issues such as how families and medical authorities adapted to the challenges of war and the shift that occurred in gender roles and behaviour that would subsequently reshape society Adopting a transnational approach this volume surveys the war's treatment of populations at risk including refugees minorities and internees to show the full extent of the disaster of war and with it the stubborn survival of irrational kindness and the generosity of spirit that persisted amidst the bitterness at the heart of warfare with all its contradictions and enduring legacies *France and Its Spaces of War* P. Lorcin, D. Brewer, 2009-09-28 This book offers a critical study of the cultural and social phenomena of war in the French and French speaking world through a number of lenses including memory gender the arts and intellectual history **Designing Memory** Sabina Tanović, 2019-11-28 This innovative study of memorial architecture investigates how design can translate memories of human loss into tangible structures creating spaces for remembering Using approaches from history psychology anthropology and sociology Sabina Tanović explores purposes behind creating contemporary memorials in a given location their translation into architectural concepts their materialisation in the face of social and political challenges and their influence on the transmission of memory Covering the period from the First World War to the present she looks at memorials such as the Holocaust museums in Mechelen and Drancy as well as memorials for the victims of terrorist attacks to unravel the private and public role of memorial architecture and the possibilities of architecture as a form of agency in remembering and dealing with a difficult past The result is a distinctive contribution to the literature on history and memory and on architecture as a link to the past
