Men Who Overturned Empires Fighters Dreamers And Schemers:

Men who Overturned Empires Hugh Tinker, 1987 **Empire and Cold War** Scott L. Bills, 1990-11-12 The Second World War shattered and remade the world Two great powers the United States and the Soviet Union warily confronted each other across the smoking ruins of Europe But the end of war for Europeans prompted a surge of renewed struggle in colonial areas as nationalist groups sought greater autonomy or independence The weakened tottering empires of Britain France and the Netherlands their myths of military and racial superiority destroyed by the wartime line of march were beset American policymakers were no longer afforded the luxury of ignoring colonial problems as they began to fashion a new globalism to counter Soviet influence **The Long War - Insurgency, Counterinsurgency and Collapsing States** Mark T. Berger, Douglas A. Borer, 2013-09-13 The rise and fall of the Cold War coincided with the universalization and consolidation of the modern nation state as the key unit of the wider international system A key characteristic of the post Cold War era in which the US has emerged as the sole superpower is the growing number of collapsing or collapsed states A growing number of states are or have become mired in conflict or civil war the antecedents of which are often to be found in the late colonial and Cold War era At the same time US foreign policy and the actions of other organizations such as the United Nations may well be compounding state failure in the context of the post 9 11 Global War on Terror GWOT or what is also increasingly referred to as the Long War The Long War is often represented as a new era in warfare and geopolitics This book acknowledges that the Long War is new in important respects but it also emphasizes that the Long War bears many similarities to the Cold War A key similarity is the way in which insurgency and counterinsurgency were and continue to be seen primarily in the context of inter state rivalry in which the critical local or regional dynamics of revolution and counter revolution are marginalized or neglected In this context American policy makers and their allies have again erroneously applied a grand strategy that suits the imperatives of conventional military and geo political thinking rather than engaging with what are a much more variegated array of problems facing the changing global order This book provides a collection of well integrated studies that shed light on the history and future of insurgency counterinsurgency and collapsing states in the context of the Long War This book was previously published as a special issue of Third World Quarterly **The Routledge Companion to World History since 1914** Chris Cook, John Stevenson, 2006-01-27 The Routledge Companion to World History since 1914 is an outstanding compendium of facts and figures on World History Fully up to date reliable and clear this volume is the indispensable source of information on a thorough range of topics such as the Arab Israeli conflict anti semitism and the Holocaust all the world s major famines and natural disasters since 1914 whether all countries of the world have a king president prime minister or other governance GNP of the world s major states year by year biographies of key figures civil rights movements the Vietnam War the rise of terrorism globalization Thematically presented the book covers topics relevant from the First World War to the Iraq war of 2003 and from post colonial Africa to conflicts and movements in

Southeast Asia With maps chronologies and full bibliography this user friendly reference work is the essential companion for students of history politics and international relations and for all those with an interest in world history Imperialism in the Modern World William Bowman, Frank Chiteji, J. Megan Greene, 2016-11-03 Imperialism in the Modern World combines narrative primary and secondary sources and visual documents to examine global relations in the nineteenth and twentieth centuries The three co editors Professors Bowman Chiteji and Greene have taught for many years global history classes in a variety of institutions They wrote Imperialism in the Modern World to solve the problem of allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history some readers use primary materials exclusively Some focus on secondary arguments This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses one important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper division levels The reader will allow show students how to read historical documents through a hands on demonstration in the introduction The book also incorporates images as visual documents Finally the book conceives of global history in the widest possible terms it contains pieces on political diplomatic economic and military history to be sure but it also has selections on technology medicine women the environment social changes and cultural patterns Other readers can not match this text s breadth because they are chronologically and thematically so extended Human Rights in the Shadow of Colonial Violence Fabian Klose, 2013-04-22 Human Rights in the Shadow of Colonial Violence explores the relationship between the human rights movement emerging after 1945 and the increasing violence of decolonization Based on material previously inaccessible in the archives of the International Committee of the Red Cross and the United Nations Human Rights Commission this comparative study uses the Mau Mau War 1952 1956 and the Algerian War 1954 1962 to examine the policies of two major imperial powers Britain and France Historian Fabian Klose considers the significance of declared states of emergency counterinsurgency strategy and the significance of humanitarian international law in both conflicts Klose s findings from these previously confidential archives reveal the escalating violence and oppressive tactics used by the British and French military during these anticolonial conflicts in North and East Africa where Western powers that promoted human rights in other areas of the world were opposed to the growing global acceptance of freedom equality self determination and other postwar ideals Practices such as collective punishment torture and extrajudicial killings did lasting damage to international human rights efforts until the end of decolonization Clearly argued and meticulously researched Human Rights in the Shadow of Colonial Violence demonstrates the mutually impacting

histories of international human rights and decolonization expanding our understanding of political violence in human rights discourse
