Menopause A Midlife Passage:

Menopause Joan C. Callahan, 1993-09-22 In *Menopause A Midlife Passage* questions about menopause are considered in depth from a dazzling variety of angles This is just the serious feminist discussion of menopause that I have been longing for its exquisite analyses renew us in our struggles to make sense of it all Alice Dan Women s Review of Books *Menopause* has become a hot with or without the flashes topic in America That s because a critical mass of us have reached it and are educated aggressive and confident enough to want to know what s happening to us and then to talk about it Smart useful funny *Menopause A Midlife Passage* is a fine addition to the discussion a healthy companion for this all important life passage Susan Stamberg Special Correspondent National Public Radio Editor Callahan takes anything but a trendy approach to a very trendy topic She s gathered essays by scholarly women who have thought through society s position on menopause and menopausal women and don t like what they see older women denied positive portrayals in mainstream media menopause treated by the medical establishment as if it were a disease rather than a natural occurrence and devaluation of older women Determined to change people s minds with their words these women speak both powerfully and empoweringly A must for feminist and women s health collections Booklist a bold attempt to go beyond the standard medical framing of women s experience and to contest the notion that the menopause is straightforwardly a hormonal deficiency disease New Scientist an entertaining and informative book that takes a very positive attitude toward the midlife passage Fertility News This book should be required reading for all women s health care providers and anyone else doing counseling of menopausal women Journal of Women Aging Essayists from various walks of life present female defined perspectives on menopause and the passage to new physical social and cultural development Reinterpreting Menopause Paul Komesaroff, Philipa

Rothfield, Jeanne Daly, 2013-05-13 *Reinterpreting Menopause* brings together a number of reflections from a broad range of areas including feminism cultural studies clinical medicine sociology philosophy and political science and includes the voices and experiences of menopausal women themselves In an innovative series of essays current thinking about medicine society and the body is critically examined Particular attention is given to the medical representations of menopause biology and aging the history of medical approaches to women and the tensions between bio medical models and other explanations of menopause Contributors include E Ann Kaplan Emily Martin Mia Campioni Fiona Mackie Roe Sybylla Wendy Rogers Kwok Lei Leng Margaret Morganroth Gullette and Robyn Gardner *Discourses of Ageing in Fiction and Feminism* J.

King, 2012-11-13 This book explores the way older women are represented in society Through close readings of novels by major 20th century novelists compared with the more dominant representations of female ageing to be found in popular culture it suggests that they offer a feminist understanding of the invisible woman sometimes lacking in feminism itself

Women And Health Sue Wilkinson, Celia Kitzinger, 2013-10-11 this comprehensive volume provides a broad sample of contemporary British feminist work on women and health It spans the disciplines of psychology sociology social policy social

anthropology and economics and demonstrates the development of feminist theorizing and activism in these areas over the past decade Topics include global and national politics of women s health the psychologization of health sexuality and AIDS body image and pregnancy reproductive technology substance abuse breast cancer and the long term health problems of women Calling for a greater understanding of women and health the contributors acknowledge the gender based inequities of women s experiences and address the need for social and political change in order to improve the health and health care of women across the lifespan *Menopause, Me and You* Ellen Cole, Esther D Rothblum, Ann M Voda, 2013-11-12 Menopause Me and You will help you put menopause in proper perspective as a normal and natural developmental process in the lives of women not as a disorder or state that causes disease This informative book gives you self monitoring tools for collecting information and monitoring changes in your body during menopause These tools will also help you understand the dynamics of the change process A guideline as to how to best use this information when interacting with care providers especially those who view menopause as a disorder to be treated is also included Menopause Me and You is filled with information gathering tools scientific facts and stories from the true experts on menopause the women themselves who have experienced or are experiencing menopause In chapter after chapter you ll gain valuable information for viewing menopause from a woman centered perspective Specifically the book includes detailed information on conception and fertilization reconceptualizing these events from a woman centered feminist perspective a description and reconceptualization of the menstrual cycle and menstruation providing the knowledge base the physiological endocrinological and biochemical mechanisms that regulate the menstrual cycle and menstruation to understand menopause as the closure of menstrual life and not the end of life a journey into the steroid hormone target cell shows at a scientific level that women were genetically programmed to end the production of reproductive hormones a description and clarification of some of the terms used to describe menopause common menopausal changes and diseases attributed to being estrogen deficient tools for gathering information for discovering knowledge about yourself a menstrual calendar card hot flash body diagrams a basal body temperature record a body composition record a menstrual bleeding scale and factors to consider when choosing a care provider The women who share their experiences in Menopause Me and You represent women at various stages of menopause They describe for you what they are feeling as well as what it means to be a mid life woman at the closure of reproductive life they celebrate the end of menstruation but curse the changes including mood swings hot flashes and vaginal bleeding changes they are experiencing These changes are normal and expected however and need to be understood in that context They are not symptoms of disease or an excuse for care providers to instantly prescribe hormones or drugs With the information in Menopause Me and You women nearing or experiencing menopause health care providers such as nurses health educators and physicians and counselors will better understand how women view this transition and come to accept it as another normal necessary and beautiful process in the lives of women **Embodying Bioethics** International

Preface **Ecocritical Menopause** Nicole Anae,2024-07-08 Ecocritical Menopause Women Literature Environment The Change is the first volume of its kind to bring together cross sectional ecofeminist voices privileging women s menopausal positionality within literary works This collection reexamines menopause across the disciplinary fields of ecofeminism and ecocriticism as clearly the most neglected phase of the menstrual cycle and aims to develop a critical discourse in counterpoint to the persistent cultural and critical legacies that sustain underrating women in midlife In highlighting selected literary representations of female being in transition this volume includes Exploration of the core motifs mediating the fashioning of menopausal women including biology the body body shaming climacterium hysteria the crone hag figure femininity gender identity reproduction sexlessness and asexuality Reexamination of histo cultural biases that continue to perpetuate a devaluation of women after menopause such as ageism degeneration loss of fertility and myths of essentialism patriarchy and hegemony social taboos the medicalization of menopause and cultural menophobia Analysis of literature genres in which we find portraiture of peri post menopause subjectivity such as autofiction crime fiction detective fiction folktales frame tale fiction mystery poetry short story and the whodunit Managing the Monstrous Feminine Jane M. Ussher,2006-01-18 Jane Ussher takes a unique approach to the study of the material and discursive practices associated with the construction and regulation of the female body Wise Women Phyllis Freeman,Jan Schmidt,2013-12-02 Wise Women is a collection of autobiographical essays by important and renowned teachers at mid life The essays which are deeply personal will focus on how these women negotiate the psychological physical and social changes brought on by menopause and how the aging process affects their lives as professionals feminists writers mentors and instructors in the academy The book addresses such questions as the following What challenges are left for the feminists who came of age during the women s movement and now have achieved academic success How do women teachers experience their aging selves in the classroom What legacy will mid life women leave their younger women colleagues All of these questions as well as many others are covered in this insightful and groundbreaking work **Mother Time** Margaret Urban Walker,2000-03-09 This collection of original essays opens up a novel area of inquiry the distinctively ethical dimension of women s experiences of aging Fifteen distinguished contributors here explore assumptions experiences practices and public policies that affect women s well being and dignity in later life The book brings to the study of women s aging a reflective dimension missing from the empirical work that has predominated to date Ethical studies of aging have so far failed to emphasize gender And feminist ethics has neglected older women even when emphasizing other dimensions of difference Finally work on aging in all fields has focused on the elderly while this volume sees aging as an extended process of negotiating personal and social change
