Mental Health Nursing A Socio Psychological Approach:

Mental Health Nursing Helen K. Grace, Janice Layton, Dorothy Camilleri, 1977 **Instructor's Manual, Mental Health Nursing** Helen K. Grace, Dorothy Camilleri, 1981 *Psychiatric Nursing* Peggy Martin, 1987-11-11 In line with the recommendations of Project 2000 and the 1982 RMN syllabus this is an important new book which takes a fresh look at the requirements of trainee psychiatric nurses and their teachers The book is divided into two parts Part One Concepts establishes the nurses approach to psychiatric care as an individual and as a member of a team Part Two Care explores the application of concepts through numerous patient profiles and care plans based on conceptual models The text is well illustrated and attractively designed throughout The author Peggy Martin is closely involved in nurse training and as well as being aware of the needs of the practising nurse has a strong commitment to Peplau's developmental model which she has used in this book **Social Work: the Social Psychological Approach** Glynis M. Breakwell, 2012-12-06 This book was created to describe the social psychological approach SPA to the social work process It has long been asserted that social workers need to understand and use social psychology in their practice Yet the literature available to social workers has been limited There have been no texts on social psychology specifically designed for social workers Instead social workers have been presented with various forms of individual psychology and macrosociology There is however an important contribution which social psychology the study of the individual in a social context can make to the social work process This contribution is the central concern of this book Consequently the book is seen as filling a fundamental gap in the existing social work literature The structure of the book is dictated by the belief that social workers and social psychologists should collaborate in evolving a social psychological model of social work practice Such a model the result of collaboration between a social worker and a social psychologist is presented here The book is addressed not simply to teachers and students of social work but also specifically to social work practitioners and to social psychologists besides all those who deal with social work problems In addressing a wide audience it is important to establish a lingua franca social workers need to understand the basics of social psychology and social psychologists must understand the basis of social work practice **Current Catalog** National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965-70 **Handbook of Family Therapy Training and Supervision** Howard A. Liddle, Douglas C. Breunlin, Richard C. Schwartz, 1988-06-17 Over the last three decades family therapy has revolutionized the mental health field changing the way human problems are conceived and therapy is conducted In concert with the dynamic growth of family therapy the field of family therapy training and supervision has also expanded enormously yielding many new ideas and skills Yet until now few books have been devoted to it and no single volume has attempted to relate the full breadth of this growing field in terms of its conceptual and theoretical expansion as well as its practical application HANDBOOK OF FAMILY THERAPY TRAINING AND SUPERVISION fills this need by presenting a truly comprehensive view of this dynamic area To accomplish this broad yet in depth scope editors

Liddle Breunlin and Schwartz have assembled 30 highly acclaimed authorities to author chapters in their respective areas of expertise For further clarification the editors have included segues that introduce and analyze each of the book s four major sections providing the reader with an overview of the section highlights of themes that run through it and discussion of the issues raised in a way that ties the chapters together The book opens with a presentation of the unique and innovative approaches to training and supervision that have evolved in each separate school of family therapy Offering a panoramic view of the entire field of family therapy these seven chapters allow for fascinating comparisons among the different schools regarding the process by which ideas about therapy evolve into training techniques and philosophies Section II follows with an explication of the pragmatics of family therapy supervision Helping family therapy trainers avoid and anticipate the common mistakes involved with supervision the skills described in this section create an atmosphere conducive to learning and maintaining a working trainer trainee relationship and finally for training of supervisors Practical guidelines for using live and video supervision are included Section III features family therapy trainers in such diverse fields as psychiatry psychology family medicine social work nursing free standing and academic family therapy programs who describe the problems and advantages they encounter teaching these new ideas within their idiosyncratic contexts The book closes with a section that includes reflections on the field by such innovative and respected leaders as Cloe Madanes and Jay Haley Among topics covered are perspectives and recommendations for researchers evaluating family therapy practical advice for incorporating a cultural perspective into training programs feedback on the experience of live supervision from trainees perspectives An appendix follows that provides over 400 references organized by subject for easy reference Given the level and scope of this extraordinary text FAMILY THERAPY TRAINING AND SUPERVISION is an invaluable resource for anyone interested in teaching learning or simply appreciating family therapy
